

**TOWN OF LAKE PARK**

# **Solid Waste Rate Study**

**FINAL REPORT / JUNE 2023**

June 12, 2023

Mr. Roberto F. Travieso, MPA  
Director, Public Works Department  
Town of Lake Park  
640 Old Dixie Highway  
Lake Park, FL 33403

Subject: **Solid Waste Rate Study**

Dear Mr. Travieso:

Raftelis Financial Consultant's, Inc. (Raftelis) has completed its study to evaluate the adequacy of the solid waste management system's (System) utility rates for the Town of Lake Park, Florida (Town), and has summarized the results in this report for your consideration. The solid waste utility rates are collected annually through a non-ad valorem special assessment for residential customers and through the Town's monthly utility billing process for nonresidential customers. This report summarizes the financial forecast and proposed annual assessments for the six- (6) year period ending September 30, 2028 (Study Period).

To develop the financial forecast and proposed solid waste rates, we have relied upon certain information and data collected from the Town including the Town's annual financial reports; the adopted Fiscal Year 2023 operating budget; estimated capital expenditures and vehicle replacement plan; customer statistics; periodic reports; records of operation; and other information and data provided by the Town. To the extent we have performed our analyses using certain data and information obtained from the Town and others in the preparation of this report, we have relied upon such information to be accurate, and no assurances are intended, and no representation or warranties are made with respect thereto or the use made herein.

## Introduction

The Town's solid waste utility collects solid waste and recycling from residential and commercial properties, providing cart and dumpster service of varying sizes and frequencies on a weekly basis. Roll-off disposal services are provided as well through franchise agreements with three haulers. The utility's services assist in the protection of the environment and serve as the first line of defense for the health of the community. During fiscal years 2021 and 2022 the Town collected approximately 30.6 million pounds of garbage, 8.9 million pounds of bulk trash and vegetation debris, and 2.3 million pounds of recyclable materials. The waste that is collected is transported to the Palm Beach County Solid Waste Authority's (SWA) North county Transfer Station. Solid waste is then incinerated to generate electricity while recyclable materials are sorted, packaged and commercialized. The utility has nine fulltime employees and a fleet of 10 collection trucks that provide service to the Town's residential and commercial customers. In addition to its collection services, the utility also provides a variety of education opportunities during regular public outreach events. The Town also partners with national, regional, and local public/private organizations for continuous process improvement.

The Town's solid waste system is established as a self-supporting enterprise fund with separate accounting from other departments and resources. The Town has historically used operating reserves to cover actual expenses that exceeded the budgeted amounts while phasing in rate adjustments over time as follows:

### Historical Sanitation Annual Assessment - Residential

Assessment Year	Single-Family and Multi-family <5	Multi-Family >4
2018-2019	\$215.49	\$145.93
2019-2020	\$234.88	\$159.06
2020-2021	\$234.88	\$159.06
2021-2022	\$246.62	\$167.01
<b>2022-2023</b>	<b>\$258.37</b>	<b>\$174.97</b>

Based on information provided by Town staff, the total projected program requirements during the Study Period exceeds \$20.0 million as summarized below:

As shown above, the program requirements include operating expenses, capital lease payments to replace existing solid waste trucks, purchases for minor equipment, and allowances to establish and create cash reserve

funds to address unforeseen contingencies and natural disasters. There are several primary cost drivers that have had a significant impact on System costs:

- Current operating deficiency
  - FY23 operating expenses exceed current revenues by approximately \$250,000 (12% of existing rates)
- High costs, frequency, and severity of mechanical repairs
  - Replacement of major components due to aging fleet
  - Emergency contract operations / limited providers and high cost during service interruptions
  - Urgent and specialized repair needs have sole source providers with little competition
- Compensation and Recruitment:
  - Highly competitive labor market
  - Sanitation Truck Operator positions vacant 12+ months
  - Recommended changes to operating salaries and associated benefits
- Competition: long lead times for materials, supplies, equipment, and vehicles
  - Inflationary increases on all business expenditures

The solid waste utility has nearly exhausted its reserve funds, and therefore cannot continue to operate without a balanced budget that meets the annual expenditure requirements. On January 18, 2023, the Town Commission engaged Raftelis to prepare a solid waste utility rate analysis. The goal of this study is to assist the Town in establishing solid waste rates that are sufficient to recover the cost of operating, maintaining, repairing, and financing the System. In order to achieve this goal, certain criteria were established in conjunction with the Town staff that served as guidelines for developing the proposed solid waste rates. The criteria established included: i) proposed rates should fund operations, maintenance, and vehicle replacement needs; ii) rate increases should be phased-in over time to the extent possible; and iii) the Town Commission should consider adopting a reserve policy for the System to provide adequate working capital reserves equal to not less than 90 days of annual expenditures as well as funding an emergency debris removal fund.

As outlined in this report, solid waste rates are proposed to be adjusted so that the revenues derived from such rates will support the revenue requirements of the System on a stand-alone basis without any contributions from the Town's General Fund. The proposed rate adjustment is higher in the first year than the subsequent years due to the current year's operating deficiency, projected increasing operating costs, increasing lease payments, and the need for additional working capital. The solid waste rate revenues have been specifically pledged to pay operating costs, existing lease payments, and to provide a source of funding for current and future vehicle replacements. Based on the projected financial results summarized herein, the study shows that by implementing a series of annual rate increases over the next five years, the Town can stabilize its operating budget while providing a source of additional funding to make significant capital improvements to the System.

The recommendations of this study are based on a financial forecast developed for the System. The financial forecast starts with a projection of customers and revenues, proceeds next with identification of utility operating

and capital/vehicle replacement needs, evaluates the availability and proposed use of existing operating reserves, and, finally, establishes the timing of rate adjustments. The basis for the study's recommendations is a financial forecast developed for Fiscal Years 2023 through 2028 (previously defined as the Study Period).

## Projected Revenues

During Fiscal Year 2023, it is estimated that the Town serves an average of approximately 2,100 solid waste accounts representing approximately 2,700 carts and dumpsters. The Town collects the solid waste utility rates and charges through an annual non-ad valorem special assessment for residential customers and through monthly charges for commercial dumpster customers. The current revenues are approximately \$2.1 million per year after considering that most residential property owners take advantage of the 4.0% early payment discount. In January 2023 the Town Commission adopted an ordinance that moves multi-family dumpster accounts to the standard dumpster rates. The projected revenues were prepared based on the adopted service classifications.

Town staff has identified several construction projects within the community that will place additional demands on the solid waste utility system. The Town's Community Development Department provided a preliminary list of property developments occurring over the Study Period. As shown in Table 1 on Page 14 of the Report, the Town anticipates residential growth to continue at approximately 1% per year while commercial units are estimated to increase by approximately 1.6% per year during the Study Period. The overall impacts to projected rate revenues are about a 3% increase in revenues at existing rates per year. Specific construction projects include, but are not limited to, Congress Warehouse, Nautilus 220, and Silver Beach Industrial Park.

**(Remainder of page intentionally left blank)**

Based on the projected units anticipated to be served over the Study Period, Table 2 on Page 21 of the Report provides an estimate of projected revenues based on the current solid waste rates. The following chart summarizes the projected revenues for the Study Period:

## Projected Solid Waste Program Revenue Requirements

The various components of cost associated with operating and maintaining a municipally owned solid waste utility system, as well as the cost of funding the renewal and replacement of associated facilities and capital improvements for additions and upgrades, are generally referred to as the utility cash revenue requirements. The sum of these cost components, after adjusting for other income and other operating revenues available to the utility, represents the net revenue requirements of the utility system. The revenue requirements for the Study Period were based on an estimate of solid waste utility costs for the current budget year, plus the five- (5) fiscal year period ending September 30, 2028. The projected revenue requirements include the various generalized cost components described below:

- **Operating Expenses:** These expenses include the cost of labor and personnel related costs, disposal costs, vehicle maintenance and repairs, utilities, operating supplies, fuel, container replacements, and other items necessary for the operation and maintenance of the System.

- **Other Revenue Requirements:** This component of cost includes, in general, any recurring capital improvements to be funded from revenues such as vehicle lease payments, minor equipment replacement, and funding of contingency reserves for emergency debris removal.

## Principal Assumptions and Considerations

The projected cash revenue requirements, as summarized at the end of this section, reflect certain assumptions, considerations, and analyses. The principal assumptions, considerations, and analyses that are included in the development of the projected System revenue requirements for the Study Period are as follows:

1. The adopted Fiscal Year 2023 budget associated with the operations of the System was used as the basis for the expenditure projections set forth herein. Unless otherwise noted, the underlying assumptions and expenditure amounts included therein are assumed to be reasonable and reflect anticipated operations. Such budgetary amounts are incorporated into the revenue requirement component of the study, except for adjustments and assumptions as noted hereunder.
2. Projected revenues from current solid waste rates are based on the schedule of rates currently in effect as of the date of this report, which became effective on October 1, 2022. Such rates were applied to the customer and units forecast previously discussed in this report and shown in Table 1 on Page 14 of the Report. Table 2 on Page 21 of the Report also summarizes the projected rate revenue under existing rates for the Study Period. Annual rate revenues under existing rates are projected to be approximately \$2.1 million increasing to \$2.5 million by 2028 as customer growth comes online.
3. The operations and maintenance expenses of the System budgeted for Fiscal Years 2023 are summarized in Table 3 on Page 22 of the Report. The amounts for Fiscal Year 2023 are then projected for the remaining five (5) years of the Study Period (i.e., through Fiscal Year 2028) as shown in Table 4 on Page 24 of the Report. The projected operating costs are based on certain inflation assumptions and other adjustments provided by Town staff for the Study Period. The adjustment factors and disposal expense allowances are identified in Tables 5 and 6 on Pages 27 through 28 of the Report, respectively, which were used to estimate the annual expenses summarized in Table 4 on Page 24 of the Report. The projected operating expenses were developed for the Study Period as follows:
  - a. An adjustment was made to budgeted disposal costs based on an estimated increase in tonnage for 2023 of approximately \$92,000.
  - b. An adjustment for operating and revenue contingencies was also made for approximately \$27,000 in 2023.
  - c. To improve solid waste collection service and increase code enforcement/compliance, Town staff proposes to hire one (1) additional Sanitation Truck Operator II during Fiscal Year 2025 at an estimated annual cost of approximately \$70,000 per year and one (1) new Solid Waste Code Officer during Fiscal Year 2025 at \$87,000 per year.

d. Expenses beyond Fiscal Year 2023 were increased based on estimated inflationary adjustments as follows:

- Labor: 11% (Fiscal Year 24); then 4% per year
- Health and Liability Insurance: 15% per year
- Fuel and Utilities: 5% per year
- General Inflation: 3% per year

The following chart summarizes the projected operating expenses as follows:

4. The Town has decided to prioritize its vehicle replacement program in order to provide a more reliable service and reduce its repair and maintenance related operating costs. The total vehicle replacement / capital program is projected to be approximately \$4.0 million over the Study Period as shown on Table 7 on Page 29 of the Report. This program includes \$3.9 million for the replacement of 10 trucks including 3 front end loaders, 3 side loaders, 3 grapple trucks, and 1 rear loader truck. Other capital outlay for minor equipment and machinery is also included at \$0.1 million. The vehicle replacement schedule and ages of the vehicles being replaced is shown below.

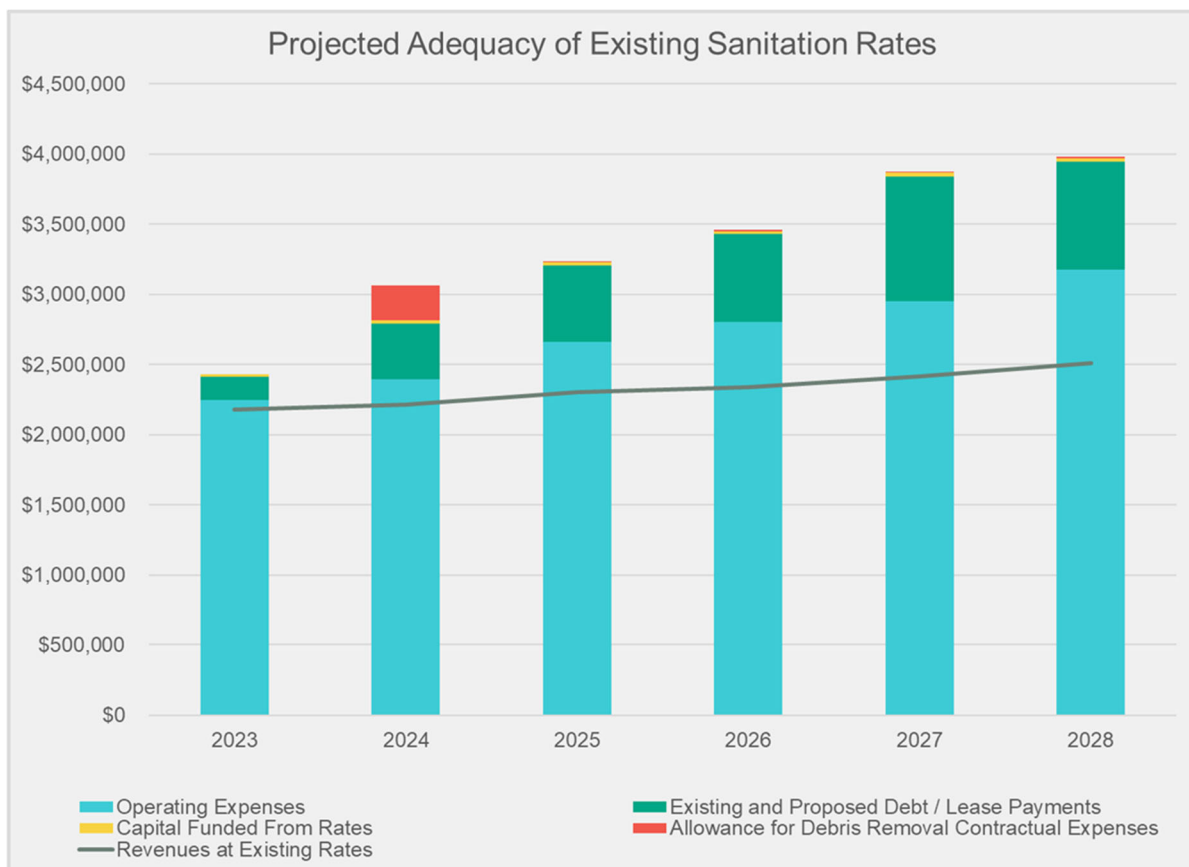

5. As of the date of this report, the System has two existing capital leases and one loan payable to the general fund outstanding. The annual payments are approximately \$161,000 per year, which end in Fiscal Year 2026. Additionally, the Town anticipates additional lease payments associated with the funding of the vehicle replacement program. Payments on these proposed leases are anticipated to begin at approximately \$239,000 in 2024 and increase to \$768,000 in 2028. The proposed leases are assumed to all have 4-year payback terms with interest rates between 5.99% - 6.75% per year. A projection of the total annual lease payments is shown below and also on Table 8 on Page 31 of the Report.

6. Based on discussions with Town Staff an allowance account for emergency contractual debris removal services associated with storm events is to be established. A transfer of \$250,000 in 2024 is the initial deposit with subsequent annual deposits of about \$8,000 per year to keep pace with inflation.
7. A minimum balance in unrestricted operating reserves of 60 days of annual expenditures is the proposed target balance for 2024. Additional deposits to the operating fund are anticipated over the Study Period to increase the balance to at least 90 days of reserves. A projection of ending reserve balances can be found of Table 9 on Page 32 of the Report.

Table 10 on Page 33 of the Report provides a summary of the projected net cash flows of the System for the Study Period. Based upon the assumptions used to prepare the System's financial forecast regarding operating expenses and capital requirements, the projected net revenue requirements of the System when compared to revenues under existing rates are summarized as follows:

As can be seen in the above summary, and in Table 10 on Page 33 of the Report, the projected revenue deficiency is estimated to be approximately \$250,000 in Fiscal Year 2024, which may increase to \$1.6 million by Fiscal Year 2028.

**(Remainder of page intentionally left blank)**

## Existing and Proposed Rates

The Town currently charges \$258.37 per month per residential cart account and \$11.31 per cubic yard (per pickup per week) of solid waste volume for all properties utilizing dumpsters. To meet the solid waste utility program requirements identified for the Study Period, the following assessments and monthly rates are proposed:

### Proposed Solid Waste Rates

Description	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
<b>Funds Total Program</b>					
Percent Rate Increase	48%	3%	3%	3%	3%
<b>Proposed Annual Charge per Cart (Current Fee: \$258.37)</b>	<b><u>\$382.39</u></b>	<b><u>\$393.86</u></b>	<b><u>\$405.68</u></b>	<b><u>\$417.85</u></b>	<b><u>\$430.38</u></b>
Proposed charge per Cubic Yard per pickup/week (Current Fee: \$11.31)	<b><u>\$16.74</u></b>	<b><u>\$17.24</u></b>	<b><u>\$17.76</u></b>	<b><u>\$18.29</u></b>	<b><u>\$18.84</u></b>

As shown above, this study recommends that a series of adjustments be made to the annual assessment and monthly rates. A full detailed listing of the Town's existing and proposed rates can be found on Table 11 on Page 34 of the Report. Key benefits of the proposed rate plan include the following:

- Utility becomes self-sufficient through Fiscal Year 2028
- Utility can fund the prioritized vehicle replacement program
- Builds reserves over time (operating and debris removal funds)

(Remainder of page intentionally left blank)

If the proposed assessments and monthly rates are approved and implemented over the Study Period, by Fiscal Year 2028, the proposed fees are estimated to fund the following expenditures:

## Conclusions and Recommendations

Based on our studies, assumptions, considerations, and analyses as summarized herein, we are of the opinion that:

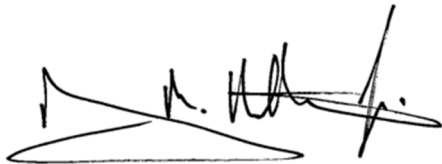

1. The solid waste utility should operate as a self-supporting enterprise fund with separate accounting from other Town departments.
  - a. The Town has consistently used operating reserves to cover actual expenses, but those reserves have been nearly exhausted.
2. The existing rates are not adequate to cover the current operations.
  - a. Additional adjustments are also needed to adequately fund the projected operating expenditures and planned vehicle replacement program.
3. The Town Commission should consider adopting a reserve policy for the solid waste utility to provide working capital and to help address unforeseen contingencies.

- a. Adopting a reserve policy of 90 days of annual expenditures for the solid waste utility to be achieved by fiscal year 2026 is recommended.
  - b. A separate contingency fund of \$250,000 for emergency debris removal should also be established.
4. On or about January 18, 2023, the Town Commission adopted an ordinance that moves the multi-family dumpster accounts to the standard dumpster rates.
  - a. The projected financial results were prepared based on the adopted service classifications.
  - b. The Town Commission should consider adopting the proposed non-ad valorem assessment and monthly utility billing schedule for Fiscal Years 2024 through 2028 as outlined in this study.
5. This study should be updated within five (5) years.

We appreciate the opportunity to be of service to the Town and would like to thank the Town's staff for their assistance and cooperation during the course of this study.

Respectfully submitted,

Footnotes:

- [1] Based on budgeted figures for the Fiscal Year 2023 revised Budget. FY23 amounts exclude any rate increase or index that was assumed in the budget.
- [2] Escalation factors and attributes derived from Table 5.
- [3] Interest earnings, if any, was removed from this schedule which is then calculated in Table 9 based on the annual average balance of each fund.
- [4] Transfers from Retained Earnings reflect the amount of annual expenditures in excess of revenues for each Fiscal Year. Such amounts, if any, are calculated in Table 10.
