Subject: Temporary overnight at park

Gentlemen.

We will be signing a contract with Saffold Paving to repair our parking lot. Saffold will need one day to perform the repairs and another day will be needed to allow for the paving to cure.

We will need to relocate resident vehicles for several nights during the work. Some of our vehicles will be able to park in the lot of 401 Lake Shore Drive, but it only has limited excess parking. Would it be possible to utilize the parking lot at the park adjacent to our property for overnight parking? We're also willing to hire a police detail during those overnight hours.

Also would it be possible to temporarily ban parking in the public parking spaces across the street from our entrance. This would allow for equipment to make the swing into our property. Your consideration is greatly appreciated.

John
