4 Ways CentralSquare Makes Procurement Easier For Local Governments

1 Cut Processing Time

Processing time of P.O.s and requisitions is cut dramatically with Finance Enterprise. The solution uses powerful workflow automation tools that are perfectly aligned with your processes. Seamlessly move requests through the procurement process from one step to the next, automatically notifying people in the approval process. Approval time is cut from weeks to days and in some cases, just hours.

2 Provide Greater Visibility

Finance Enterprise gives you a 360-degree view of the procurement process, enabling you to see exactly where your request is in the process. If your request is waiting for approval or held up at any point, you can easily identify the bottleneck and take appropriate action to get it moving again through the system.

3 Eliminate Paper

Paperwork for P.O.s and requisitions is virtually eliminated with Finance Enterprise. Simply enter the necessary information into the system and attach any supporting documents, such as invoices, to the request. No more paper forms to fill out or paperwork to file. The solution does it all for you.

4 Reduce Errors

Finance Enterprise helps you avoid incorrect data entries with alerts that align with your processes to ensure correct information, such as cost codes, is used. As a result, error-free requests sail through the system, resulting in faster approval and eliminating time wasted on correcting errors.
