### Notes Continued...

The property owner is responsible for pulling any and all permits that may be required by the city or township for tree removal / trimming.

All work is to be completed in a workmanlike manner according to our standard practices. Any alteration or deviation from above specifications involving extra labor or costs will become an extra charge over and above the original estimate. All agreements are contingent upon accidents and delays beyond our control. Upon finding any unforeseen hazards that change the intended approach to complete the scope of the work such as finding large splits, cracks or cavities in the canopy of the tree that make the tree unsafe for a climber to operate in or that change the intended rigging approach may result in the requirement of a crane or lift for safe and successful completion. If a crane or lift is found to be necessary the property owner would be responsible for the additional cost of such equipment to be brought in - if the property owner chooses to continue the project with Timber Beast after the discovery of such hazards.

Any materials that impede our ability to complete the work will result in one of the following: additional costs for the property owner above the original agreement or cease of operations and the existing balance is due. For example: finding that the trunk is full of metal or concrete and impeding the use of our chainsaws to finish cutting down the trunk of the tree. The home owner would be responsible for covering the cost of additional chainsaw chains required or the operations would cease and the existing balance would be due, minus any stump grinding costs that may have been originally quoted.

Please contact us to discuss any questions or concerns you may have.

This quote is valid for the next 7 days, after which our availability or the costs may be subject to change.
