Subject: DDA questions from the DDA Meeting Packet for tonight

Darwin,

I noticed in the Executive Director's Report for tonight's meeting a couple of things that stand out.

1. Matt references they are now without a cleaning contractor for their offices and the public restrooms at the fire station. Who cleans our village hall, and would it make sense to combine the services into one contract for economies of scale?
2. Matt also references several holdups on the lumberyard project specifically related to getting things through our village administration. I'm confident you're helping knock down any roadblocks, but perhaps it would help all of us if any issues were more visible. We talked at our last council meeting about having a standing agenda slot for Matt to provide DDA updates to council. I believe this would be an excellent forum to escalate any areas where Matt might need help. What is the status of revising our agenda to accommodate Matt's updates? Is that something you can do, or do we need council action to revise our standing agenda? If we need council action, would you please put it on next week's council agenda.

Thanks,

George
