Full Environmental Assessment Form Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action of Project:				
NY Lansing I, LLC - Proposed Commercial Solar Facility				
Project Location (describe, and attach a general location map):				
North Triphammer Road (County Route 122), Town of Lansing, Tompkins County, NY (Tax I	Map Nos. 441-1.2 and 441-3.3)			
Brief Description of Proposed Action (include purpose or need):				
The proposed action includes the development of an approximate 5-megawatt of alternating current (M 66.83± acres located on the east side of North Triphammer Road (County Route 122) (hereinafter the bacres of the subject property to the applicant (i.e., NY Lansing I, LLC). The area of disturbance for the pituated on the central portion of the northern tax parcel (441-1.2) and the western portion of the sout installation of solar modules with a maximum height of 15 feet, an eight (8)-foot-high deer fence around nouse electrical equipment (i.e., two [2] inverters and two [2] transformers) and electric utility lines to come west side of the subject property. The proposed action would also include the construction of a grays noted that the project area would be seeded with a northeast solar pollinator mix. All solar power ger Distributed Generation. This program allows subscribed participants to share the benefits of clean energonmercial customers, specifically New York State Electric and Gas (NYSEG) customers, would be about the construction of a gray of the subject property.	"subject property"). The owner would lead proposed project would be 22.68± acres whern tax parcel (441-3.3). The proposed of the proposed solar facility, two (2) continued the solar panels to the existing divel access road from North Triphammer herated by the proposed action would be tryp production. According to the applications	ase approximately 19.60 b. The solar facility would be ad action would include the crete equipment pads to sistribution power line along Road (County Route 122). It e sold as Community nt, a mix of residential and

h. Federal agencies ☐Yes ☑No				
i. Coastal Resources.i. Is the project site within a Coastal Area, or	or the waterfront area of a Designated Inland W	aterway?	□Yes ∠ No	
 ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? iii. Is the project site within a Coastal Erosion Hazard Area? 				
C. Planning and Zoning				
C.1. Planning and zoning actions.				
Will administrative or legislative adoption, or a only approval(s) which must be granted to ena • If Yes, complete sections C, F and G. • If No, proceed to question C.2 and con		-	∐Yes . ∕⁄⁄⁄No	
C.2. Adopted land use plans.				
a. Do any municipally- adopted (city, town, vil) include the site	✓ Yes□No	
If Yes, does the comprehensive plan include sp would be located?		proposed action	Z Yes□No	
b. Is the site of the proposed action within any Brownfield Opportunity Area (BOA); design or other?) If Yes, identify the plan(s):	local or regional special planning district (for enated State or Federal heritage area; watershed		□Yes ☑ No	
c. Is the proposed action located wholly or part or an adopted municipal farmland protection If Yes, identify the plan(s):	•	ipal open space plan,	∐Yes ∏ No	

C.3. Zoning	
a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. If Yes, what is the zoning classification(s) including any applicable overlay district? The subject property is located within the Residential - Moderate Density (R2) Zoning District.	∠ Yes No
b. Is the use permitted or allowed by a special or conditional use permit?	☐ Yes Z No
c. Is a zoning change requested as part of the proposed action? If Yes, i. What is the proposed new zoning for the site?	□Yes ☑ No
C.4. Existing community services.	
a. In what school district is the project site located? <u>Ithaca City School District</u>	
b. What police or other public protection forces serve the project site? Tompkins County Sheriff's Department	
c. Which fire protection and emergency medical services serve the project site? Lansing Fire Department provides both fire protection and emergency medical services.	
d. What parks serve the project site? N/A - the proposed use includes a commercial solar facility.	
D. Project Details	
D.1. Proposed and Potential Development	
a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed components)? Commercial solar energy facility	, include all
b. a. Total acreage of the site of the proposed action? b. Total acreage to be physically disturbed? c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 66.83± acres (The property owner would I subject property to the applicant or project to the applicant or project sponsor)	ease 19.60± acres of the
c. Is the proposed action an expansion of an existing project or use? i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles,	☐ Yes ✓ No
square feet)? % Units: d. Is the proposed action a subdivision, or does it include a subdivision? If Yes, i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)	□Yes ☑ No
ii. Is a cluster/conservation layout proposed?iii. Number of lots proposed?iv. Minimum and maximum proposed lot sizes? Minimum Maximum	□Yes□No
e. Will the proposed action be constructed in multiple phases? i. If No, anticipated period of construction: 5 months ii. If Yes: Total number of phases anticipated Anticipated commencement date of phase 1 (including demolition) Anticipated completion date of final phase Generally describe connections or relationships among phases, including any contingencies where progred determine timing or duration of future phases:	

	t include new resid				☐Yes Z No

b. Would the proj	oosed action cause	or result in alterati	on of, increase or de	crease in size of, or encroachment	✓ Yes No
			ich or adjacent area?		<u> </u>
If Yes:					
				water index number, wetland map numb	
		and areas located on	the western and centra	al portions of the subject property would be di	sturbed as part of the
F	proposed action.				

	scribe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of				
alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres: The proposed action would involve excavation and fill associated with the mounting posts for the solar panels and construction of the					
	proposed access road. Excavation would be approximately 3.18 acres and fill material would be approximately 0.13 acres.				
	proposed mounting posts and access road would be built upon a portion of the existing wetland vegetati				
clea	ring would be performed as necessary for larger wooded/dense vegetated areas within the wetlands.				
	I the proposed action cause or result in disturbance to bottom sediments?	∠ Yes □ No			
	es, describe: The proposed action would require regrading/excavation for the mounting posts for the solar panels and cons				
	ll the proposed action cause or result in the destruction or removal of aquatic vegetation?	✓ Yes No			
If Y					
•	acres of aquatic vegetation proposed to be removed: 3.31± acres to be built upon and/or removed expected acreage of aquatic vegetation remaining after project completion: 10.40± acres				
•	purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):				
•	Construction of the proposed access road and the mounting post for the solar panels				
•	proposed method of plant removal: Mechanical clearing and grubbing, as necessary.				
•	if chemical/herbicide treatment will be used, specify product(s): None				
v. Des	cribe any proposed reclamation/mitigation following disturbance:				
rosi <u>on ar</u>	nd sedimentation control measures would be undertaken prior to and during construction.				
c. Will	the proposed action use, or create a new demand for water?	☐Yes Z No			
If Yes:					
	al anticipated water usage/demand per day: gallons/day				
	I the proposed action obtain water from an existing public water supply?	□Yes □No			
If Yes:					
•	Name of district or service area:				
•	Does the existing public water supply have capacity to serve the proposal?	☐ Yes☐ No			
•	Is the project site in the existing district?	☐ Yes ☐ No			
•	Is expansion of the district needed?	☐ Yes☐ No			
•	Do existing lines serve the project site?	☐ Yes☐ No			
	l line extension within an existing district be necessary to supply the project?	□Yes □No			
If Yes:					
•	Describe extensions or capacity expansions proposed to serve this project:				
•	Source(s) of supply for the district:				
iv. Is a	new water supply district or service area proposed to be formed to serve the project site?	☐ Yes ☐No			
If, Yes:		_			
•	Applicant/sponsor for new district:				
•	Date application submitted or anticipated:				
•	Proposed source(s) of supply for new district:				
v. If a	public water supply will not be used, describe plans to provide water supply for the project:				
vi. If w	rater supply will be from wells (public or private), what is the maximum pumping capacity: gall	ons/minute.			
d. Will	the proposed action generate liquid wastes?	☐ Yes Z No			
If Yes:					
i. Tota	al anticipated liquid waste generation per day: gallons/day				
ii. Nat	ure of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all con-	mponents and			
appi	roximate volumes or proportions of each):				
iii Will	the proposed action use any existing public wastewater treatment facilities?	□Yes□No			
If Y		1 C31\0			
•	Name of wastewater treatment plant to be used:				
•	Name of district:				
•	Does the existing wastewater treatment plant have capacity to serve the project?	☐ Yes ☐ No			
•	Is the project site in the existing district?	☐ Yes ☐ No			
•	Is expansion of the district needed?	□Yes □No			

Do existing sewer lines serve the project site?	□Yes□No
Will a line extension within an existing district be necessary to serve the project?	□Yes□No
If Yes:Describe extensions or capacity expansions proposed to serve this project:	
Describe extensions of capacity expansions proposed to serve this project:	
iv. Will a new wastewater (sewage) treatment district be formed to serve the project site?If Yes:	□Yes□No
Applicant/sponsor for new district:	
Date application submitted or anticipated:	
What is the receiving water for the wastewater discharge?	
v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including spec	ifying proposed
receiving water (name and classification if surface discharge or describe subsurface disposal plans):	
vi. Describe any plans or designs to capture, recycle or reuse liquid waste:	
e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point	Z Yes □No
sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point	
source (i.e. sheet flow) during construction or post construction? If Yes:	
<i>i.</i> How much impervious surface will the project create in relation to total size of project parcel?	
Square feet or 0.02± acres (impervious surface)	
Square feet or 66.83± acres (parcel size)	
ii. Describe types of new point sources. Solar panels, concrete equipment pad, footings and gravel access road	
iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent p	
groundwater, on-site surface water or off-site surface waters)?	reperces,
The proposed design would include two (2) rain gardens and water bars. Stormwater runoff would flow towards the rain gardens in the	e southern portion of
the project area, and to the surrounding on-site wetland areas which is where stormwater currently flows.	
 If to surface waters, identify receiving water bodies or wetlands: Stormwater runoff would flow towards the rain gardens in the southern portion of the project area, and to the surrouding or 	
which is where stormwater currently flows.	n-site wettand areas
Will stormwater runoff flow to adjacent properties?	☐ Yes Z No
<i>iv.</i> Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater?	
f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel	□Yes Z No
combustion, waste incineration, or other processes or operations?	
If Yes, identify:	
i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)	
ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)	
iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)	
g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit,	□Yes Z No
or Federal Clean Air Act Title IV or Title V Permit?	
If Yes:	
i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet	□Yes□No
ambient air quality standards for all or some parts of the year) ii. In addition to emissions as calculated in the application, the project will generate:	
• Tons/year (short tons) of Carbon Dioxide (CO ₂)	
• Tons/year (short tons) of Nitrous Oxide (N ₂ O)	
• Tons/year (short tons) of Perfluorocarbons (PFCs)	
•Tons/year (short tons) of Sulfur Hexafluoride (SF ₆)	
Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)	
Tons/year (short tons) of Hazardous Air Pollutants (HAPs)	

h. Will the proposed action generate or emit methane (includandfills, composting facilities)? If Yes: i. Estimate methane generation in tons/year (metric): ii. Describe any methane capture, control or elimination melectricity, flaring):	neasures included in project design (e.g., combustion to g	Yes No
Will the proposed action result in the release of air pollut quarry or landfill operations? If Yes: Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations and nature of emissions (e.g., describe) Output Describe operations (e.g., describe)		∐Yes Z No
j. Will the proposed action result in a substantial increase in new demand for transportation facilities or services? If Yes: i. When is the peak traffic expected (Check all that apply Randomly between hours of to	r):	Yes
 iii. Parking spaces: Existing	ng? isting roads, creation of new roads or change in existing available within ½ mile of the proposed site? portation or accommodations for use of hybrid, electric	∐Yes □No
 k. Will the proposed action (for commercial or industrial proposed for energy? If Yes: i. Estimate annual electricity demand during operation of ii. Anticipated sources/suppliers of electricity for the projectother): 	the proposed action:	
iii. Will the proposed action require a new, or an upgrade, t	to an existing substation?	☐Yes ☐ No
1. Hours of operation. Answer all items which apply. i. During Construction: Monday - Friday: Saturday: Saturday: N/A Holidays: N/A	 ii. During Operations: Monday - Friday: 24/7* Saturday: 24/7* Sunday: 24/7* Holidays: 24/7* 	

^{*}The site would not be occupied 24/7. It would be remotely monitored and inspections would occur as needed to ensure a properly maintained site.

	Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both?	Z Yes □No
	yes:	
	Provide details including sources, time of day and duration:	
Tem Satu	porary noise during construction would be expected. Construction would occur during non-sensitive hours (i.e., 8:00am-6:00pm Nurday with no construction on Sundays or holidays).	Monday through
	Will the proposed action remove existing natural barriers that could act as a noise barrier or screen?	∠ Yes □No
	Describe: The project area would result in the clearing of 6.47± acres of woodland for the proposed solar facility. However, upon the proposed action, 21.15± acres of woodland would remain.	n implementation of
n. '	Will the proposed action have outdoor lighting?	☐ Yes Z No
	yes: Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:	
	Will proposed action remove existing natural barriers that could act as a light barrier or screen? Describe:	☐ Yes ☐ No
_ 1	Danada anno and a di an laranda and and and and an anada and an anada an anada an anada an anada an anada an an	
0. 1	Does the proposed action have the potential to produce odors for more than one hour per day? If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures:	☐ Yes Z No
If Y	Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? Yes: Product(s) to be stored	☐ Yes Z No
ii.	Volume(s) per unit time (e.g., month, year)	
iii.	Generally, describe the proposed storage facilities:	
	Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? Yes:	☐ Yes Z No
	i. Describe proposed treatment(s):	
	i. Will the proposed action use Integrated Pest Management Practices?	☐ Yes ☐No
	Will the proposed action (commercial or industrial projects only) involve or require the management or disposal	✓ Yes □No
	of solid waste (excluding hazardous materials)? Yes:	
	Describe any solid waste(s) to be generated during construction or operation of the facility:	
	• Construction: 0.1 tons per month (unit of time)	
	• Operation: 0 tons per (unit of time)	
ii.	. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:	
	 Construction: According to the applicant, waste would consist of office waste and cardboard items from deliveries, which the maximum extent practicable. 	would be recycled to
	Operation: N/A	
	•	
iii.	Proposed disposal methods/facilities for solid waste generated on-site:	
	Construction: A refuse container would be placed on-site during construction and would be emptied by a licensed hauler	as needed.
	Operation: N/A	

If Yes:	s. Does the proposed action include construction or modification of a solid waste management facility?				
	If Yes: Type of management or handling of wests proposed for the site (e.g., recycling or transfer station, compacting, landfill, or				
<i>i.</i> Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities):					
ii. Anticipated rate of disposal/processing:					
• Tons/month, if transfer or other non-		ent, or			
• Tons/hour, if combustion or thermal					
	years				
t. Will the proposed action at the site involve the comme	ercial generation, treatment,	storage, or disposal of hazard	ous 🗌 Yes 🗸 No		
waste? If Yes:

^{*}Upon implementation of the proposed action, 0.49± acre of gravel would be installed for the proposed access road.

c. Is the project site presently used by members of the community for public recreation? i. If Yes: explain:	□Yes☑No
d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? If Yes, i. Identify Facilities:	∏Yes , No
e. Does the project site contain an existing dam? If Yes: i. Dimensions of the dam and impoundment:	☐Yes Z No
• Dam height: feet	
• Dam length: feet	
• Surface area: acres	
Volume impounded: gallons OR acre-feet	
ii. Dam's existing hazard classification:	
iii. Provide date and summarize results of last inspection:	
f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facil If Yes:	☐Yes ☑ No ity?
<i>i</i> . Has the facility been formally closed?	☐Yes☐ No
• If yes, cite sources/documentation:	
ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:	
w. Describe the recurrent of the project the relative to the countaines of the softa waste management facility.	
iii. Describe any development constraints due to the prior solid waste activities:	
g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? If Yes:	☐Yes ☑ No
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred	ed:
h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? If Yes:	☐Yes ☑ No
<i>i.</i> Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply:	□Yes□No
Yes – Spills Incidents database Provide DEC ID number(s):	
☐ Yes – Environmental Site Remediation database Provide DEC ID number(s):	
ii. If site has been subject of RCRA corrective activities, describe control measures:	
iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? If yes, provide DEC ID number(s):	□Yes☑No
iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):	

v. Is the project site subject to an institutional control	limiting property uses?	□Yes□No
• If yes, DEC site ID number:	., deed restriction or easement):	
 Describe the type of institutional control (e.g Describe any use limitations: 	., deed restriction of easement).	
• Describe any engineering controls:		
 Will the project affect the institutional or eng 	rineering controls in place?	☐ Yes ☐ No
Explain:		
E.2. Natural Resources On or Near Project Site		
a. What is the average depth to bedrock on the project	site? 3± feet below grade surface	on (has)
	Site: SIT lett below grade surface	
b. Are there bedrock outcroppings on the project site? If Yes, what proportion of the site is comprised of bedr	rock outcroppings?%	☐ Yes Z No
c. Predominant soil type(s) present on project site:	Langford channery silt loam, 2-8% slopes (LaB) 26 %	
	Tuller channery silt loam, 0-6% slopes (TeA) 24 %	
	Lordstown channery silt loam, 5-15% slopes (LnC) 21 %)
d. What is the average depth to the water table on the p		
e. Drainage status of project site soils: Well Drained	d: <u>34 % of site</u>	
✓ Moderately V ✓ Poorly Drain	Well Drained: 26 % of site	
-		
f. Approximate proportion of proposed action site with	1 slopes: ✓ 0-10%: ✓ 10-15%: ———————————————————————————————————	
	15% or greater:% of site	
g. Are there any unique geologic features on the project If Yes, describe:		☐ Yes Z No
h. Surface water features.		
i. Does any portion of the project site contain wetland	ds or other waterbodies (including streams, rivers,	✓ Yes No
ponds or lakes)? <i>ii.</i> Do any wetlands or other waterbodies adjoin the pr	oject site?	∠ Yes□No
If Yes to either <i>i</i> or <i>ii</i> , continue. If No, skip to E.2.i.	oject site:	V I CS_INO
<i>iii.</i> Are any of the wetlands or waterbodies within or a	djoining the project site regulated by any federal,	✓ Yes □No
state or local agency?		
	dy on the project site, provide the following information: Classification	
Lakes or Ponds: Name	Classification	
• Wetlands: Name Federal Waters	Classification Approximate Size *See	below
• Wetland No. (if regulated by DEC)	t recent compilation of NVS water quality impaired	□Yes ☑ No
waterbodies?	t recent compliation of N 13 water quanty-impaired	
If yes, name of impaired water body/bodies and basis f	for listing as impaired:	
i. Is the project site in a designated Floodway?		□Yes Z No
j. Is the project site in the 100-year Floodplain?		□Yes Z No
k. Is the project site in the 500-year Floodplain?		∐Yes Z No
l. Is the project site located over, or immediately adjoint If Yes: i. Name of aquifer:		∐Yes Z No

^{*}There are areas on the eastern portion of the subject property with perched water at approximately 2 feet bgs and 6 feet bgs.

*The EAF Mapper indicates the presence of federal waterbodies on or adjoining the subject property. Review of the U.S. Fish and Wildlife Services
National Wetlands Inventory (NWI) Mapper indicates that a 13.14-acre Freshwater Forested/Shrub Wetland habitat classified as PFO1/4E is located on
the southeastern portion of the southern tax parcel (44.-1-3.3) and adjoining area. It is noted that review of the NYSDEC Environmental Resource Mapper
indicates that there are no state-regulated freshwater wetlands or streams located on or adjacent to the subject property.

m. Identify the predominant wildlife species	that occupy or use the proj White-tailed deer	ect site:	
Grey squirrels	Field rodents		
Raccoons	1 Icia roaciită		
n. Does the project site contain a designated s	ignificant natural commun	itv?	☐ Yes Z No
If Yes:	-8	,	
i. Describe the habitat/community (composi	ition, function, and basis for	or designation):	
ii. Source(s) of description or evaluation:			
iii. Extent of community/habitat:			
• Currently:		acres	
• Following completion of project as p	proposed:		
• Gain or loss (indicate + or -):		acres

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

B.i.i [Coastal or Waterfront Area]	No
B.i.ii [Local Waterfront Revitalization Area]	No
C.2.b. [Special Planning District]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h [DEC Spills or Remediation Site - Potential Contamination History]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
