FlockOS Features & Description

FlockOS Features	Description
Convoy Search	Unearth hidden connections by detecting suspect vehicles that frequently travel together. This tool is invaluable for investigating organized or serial crimes and identifying accomplices.
Visual Search	Transforms any digital photo into a potent investigative lead, enhancing evidence collection. Upload the image of a vehicle into FlockOS® to initiate a reverse image search that will help you identify crucial suspect vehicle information and unlock dead-end investigations.
Multi Geo Search	Connects the dots between multiple crimes and crime scenes. Link a suspect vehicle to multiple incidents based on location, without needing a vehicle description or plate number.
Custom Hot List Attachments	The ability to add case notes, photos, reports, and other relevant case information to Custom Hot List Alerts
Custom Hot List Deconfliction	Allows Flock Safety users to identify overlapping investigations within their agency and within other law enforcement agencies and provide the contact information of opted-in parties to facilitate collaboration.
Unlimited Vehicle Description Alerts	Users can set up and receive notifications for suspect vehicles based on body type, make, color, location and timeframe. Notifications are sent via app, SMS or email when a vehicle matching the predetermined criteria passes a camera in your organization's network.
