MEMORANDUM

To: DDA Board of Directors
From: Susie Stec, DDA Director
Date: January 21, 2022
RE: Geotechnical Pavement Investigation

Prior to beginning paving work in the alleys and approaches, it will be necessary to have pavement core/soil borings. The city engineer has obtained a quote for \$6,100 (see attached) to have a geotechnical pavement investigation done in the spring, with an additional \$900 to field paint pavement core/soil boring locations. This is a one-time expenditure.

Suggested motion: Approve the G2 Consulting proposal for pavement core/soil borings in the amount of \$6,100.
