MEMORANDUM

To: DDA Board of Directors
From: Susie Stec, DDA Director
Date: March 17, 2023
RE: 2025 MDOT Safety Improvement Program

Hubbell, Roth & Clark (HRC) are the traffic engineers designing the HAWK signal at Margate Avenue/Southfield Road. At our initial meeting with HRC, I had indicated that the DDA is interested in installing several traffic signals/pedestrian crossings along the corridor but that we would need to securing grant funding to do so. HRC indicated at that time that HAWK signal installations are great projects for MDOT's Safety Program and that they would keep an eye out for the call for projects. HRC shared information this week related to the 2025 MDOT Safety Program.

There is a maximum award of \$750,000 per project which would allow the DDA to install 3 additional pairs of HAWK signals. Construction funding would be 80/20 with the DDA's match being approximately \$150,000. Project & construction engineering costs would be borne by the DDA. Applications are due Monday, May 1st, 2023, and HRC can put together that application for a cost of \$5,000.

Suggested Motion: To authorize the DDA Director to contract with Hubbell, Roth & Clark in the amount of \$5,000 to complete an application for MDOT's 2025 Safety Improvement Program for the purpose of installing additional HAWK signals along the Southfield Road corridor.
