RE: Resolution – To Approve Plans and Estimate for Ditch Repair for Cambridge Blvd. and to Direct City Treasurer to Make a Special Assessment Roll

The 2022/23 Street Project includes 13 properties in the area of Cambridge that will require the upgrading/repair of the culvert and ditches. The property owners will be responsible for the costs associated with the drainage improvements. A special assessment district is being proposed. The total cost is estimated at \$107,652. The average cost is \$8,280 per property. They will have the option to pay the entire amount up front or over ten (10) ten years.

This is the first of 2 required public hearings on the Special Assessment District. Notices were mailed to all of the property owners of the public hearing. A notice was published in the Southfield Sun and on the city website.
