CONSTRUCTION COST SCHEDULE

The International Code Council square foot construction cost table is to be used with the City of Lathrup Village Building Permit and Plan Review Fee Schedules for computation of the total cost of construction improvement.

The building permit and plan review fees are based on the estimated construction value as calculated per the International Code Council's square foot construction code table (gross area x

sq. ft. construction cost). The most current (BVD) Building Valuation Data Table in effect on July 1st of each year at the (ICC) International Code Council website (www.iccsafe.org/) will be the table utilized for present and future calculations. ICC BVD outlines the base cost per square foot for any given Use/Group/Type of construction combination. These figures are not intended to reflect the actual cost of construction but are used as a basis for the determination of fees related to services rendered for projects.

Projects where it is not feasible to determine the construction value using the BVD Table will have the construction value set by the Building Official. The Building Officials' decision may be based on executed contracts, the BVD Table, other similar projects, or other engineer or architect estimates. The Building Officials' decision will be final.
