

MEMORANDUM

To: City Council

Department: Public Works

Date: June 12, 2025

Subject: Monthly meter replacement report

BACKGROUND

The La Vernia Public Works Department is actively engaged in the city-wide meter replacement project. To date, 344 meters have been successfully installed out of a total of 847 accounts. The initial priority remains the replacement of broken or zero-consumption meters. These are identified and assigned as work orders in the Sentryx system, enabling Public Works to target the necessary replacements efficiently. Currently, there are 5 open work orders, with 13 broken or zero-read meters.

SETBACKS

Public works has temporarily paused putting in meters at the moment until we hear the results from Mueller on what's going on; we returned 100 meters to them.
