RE: Rezoning Request for Approximately 177 acres of Property Generally Located at the Northeast Intersection of Hwy 87 and County Road 361 ("Subject Property"), La Vernia, Texas

Dear Ms. Farrow:

King Fish Development, LLC ("King Fish") is under contract to purchase approximately 237 acres of property generally located at the intersection of Hwy 87 and County Road 361, of which approximately 177 acres is located within the City of La Vernia ("City") and approximately 60 acres is located within the City's extraterritorial jurisdiction ("ETJ"). The Subject Property is the portion of the overall property that is within the City and is also described as Wilson County Appraisal District Property Identification Numbers 77242 and a portion of 12405.

King Fish intends to develop and construct a coordinated single-family residential project ("Project") on the overall property. The Project is currently proposed to include approximately 626 single-family homes, with approximately 440 homes planned within the City limits and approximately 177 homes planned within the ETJ. While the development plan remains subject to refinement through the entitlement, engineering, and review processes, we are enclosing the conceptual site plan for reference.

The original PD zoning application was submitted to the City on August 28, 2026. Following its initial review, the City provided comments on September 15, 2026. This revised submittal is intended to respond to those comments and to provide additional information, clarifications, revised development standards, and variance information request by City staff. To allow for the proposed Project, King Fish is requesting that the City rezone the Subject Property from its current "R-A" Single Family Agriculture zoning designation to a "PD" Planned Development District with a base zoning of "R-1" Single Family District.

The proposed PD is intended to establish a coordinated framework for the development of the Project, including site-specific residential development standards, infrastructure, connectivity, landscaping, and other requirements applicable to the Property. Although a portion of the overall property is currently located within the City's ETJ, that portion is intended to be annexed into the City as part of the overall development process. Following annexation, the entire property is intended to be governed by a unified development framework. In addition, the entire property is envisioned to be subject to a development agreement with the City and included within a Public

Improvement District ("PID"). Accordingly, the Project is intended to be planned and implemented as one coordinated development rather than as separate City and ETJ projects.

The proposed development agreement and PID will provide a framework for coordinating the development of the overall property, including infrastructure, phasing, connectivity, and applicable public improvements. The proposed PD, development agreement, and PID will therefore allow the City and King Fish to consider and administer the Project comprehensively as it proceeds through development and annexation.

I. Requested Variances

As part of the PD request, King Fish is requesting the following four site-specific variances from the otherwise applicable standards:

1. Side Yard Setback. A reduced side yard setback from the applicable R-1 standard to the setback proposed in the PD.

2. Rear Yard Setback. A reduced rear yard setback from the applicable R-1 standard to the setback proposed in the PD.

3. Front Yard Setback for Irregular Lots. A reduced front yard setback for certain irregularly shaped lots, as reflected in the proposed PD standards and conceptual site plan.

4. Public Sewer Connection. A variance from Section 36-312(d) to permit individual on-site sewage facilities for the approximately one-half-acre residential lots proposed within the applicable portion of the Project rather than requiring connection to public sewer where the City's 100-foot connection requirement would otherwise apply.

With respect to the requested public sewer connection variance, the Applicant believes the variance is particularly important to the proposed development of the Property. Due to the existing topography of the applicable portion of the Property, requiring the approximately one-half-acre lots to connect to public sewer would require the construction of a lift station, force main, and associated infrastructure. In addition to the significant upfront costs associated with constructing and installing this infrastructure, a lift station would create ongoing obligations and costs for the City associated with its operation, maintenance, repair, and eventual replacement.

Requiring a lift station would affect the feasibility of the proposed approximately one-half-acre lot configuration, such that the Applicant would not be able to proceed with the proposed larger-lot development in this portion of the Project and would increase the overall density of the development. The requested variance would allow the Applicant to preserve the proposed larger-lot configuration while utilizing appropriately designed and permitted on-site sewage facilities consistent with the proposed development and the physical characteristics of the Property.

II. Revised and Clarified Development Standards

In response to the City's comments, the revised PD materials also clarify and incorporate a number of development standards that are intended to conform to, or expressly reference, the City's existing requirements. These revisions include the following:

- Minimum Lot Size. The revised PD materials clarify no single-family residential lot within the Residential Project shall be smaller than 6,000 square feet.

- Lot Width and Depth. The revised standards expressly identify the minimum lot width shall be fifty feet (50') and the minimum lot depth shall be one hundred feet (100'), consistent with the dimensions reflected on the conceptual development plan.

- Building Height. The revised PD materials clarify the no building or residential structure may exceed two and one-half (2 ½) stories in height as measured in accordance with Section 38-208 of the Code

- Cul-de-Sacs. The revised development standards clarify the applicable cul-de-sac dimensions and measurement shall conform with the standards set forth in Section 30-605(e) of the City's Code.

- Sidewalks. The revised PD standards provide for sidewalks on both sides of interior streets, in accordance with Section 30-615(a) of the City's Code.

- Accessory Structures. The revised PD standards provide that accessory structures, if permitted, will be regulated in accordance with the City's applicable Code requirements, including the City's requirements governing the timing, location, separation, and placement of accessory structures.

These revisions are intended to provide greater clarity within the PD document while preserving the four specific variances identified above as the requested deviations from the City's otherwise applicable standards.

III. Other Development Items

King Fish also acknowledges and appreciates the City's comments concerning landscaping, drainage, and project amenities. With respect to landscaping and irrigation requirements, the Applicant intends for the Project to comply with the landscaping and irrigation ordinance and requirements that are in effect at the time of final PD approval, including any applicable amendments adopted by the City prior to such approval.

King Fish is continuing to evaluate whether to satisfy the City's drainage requirements through payment of the applicable drainage impact fee or through the applicable pervious-cover option. King Fish will identify the selected approach as the development plans and engineering are finalized.

King Fish is also continuing to finalize the proposed amenities for the Project. A more specific list of proposed amenities will be provided as the amenity package is finalized and incorporated into the overall development plan.

IV. Overall Project Benefits and Development Framework

The requested PD standards are intended to respond to the particular characteristics of the Property and the overall development plan while maintaining an orderly and coordinated development pattern. The requested setback variances also have local context, as the City has previously approved residential plats incorporating reduced setbacks comparable to those proposed herein. King Fish believes those prior approvals provide relevant context for consideration of the proposed residential development standards.

The Project represents an opportunity to establish a new residential community through a single, coordinated development framework. The anticipated annexation of the ETJ portion, together with the development agreement and PID covering the entire property, will allow the Project to be addressed comprehensively with respect to development standards, infrastructure, phasing, connectivity, and public improvements. This coordinated approach is intended to facilitate orderly growth and provide the City with a consistent framework for evaluating and administering the Project as it develops.

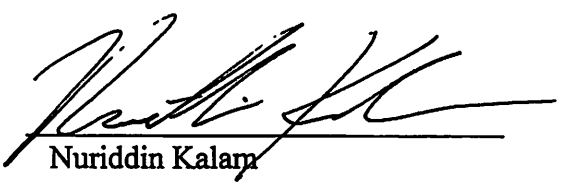

The proposed PD also provides an opportunity to establish development standards specifically tailored to the Property and the proposed community rather than relying solely on standards designed for development generally throughout the City. The requested variances are limited to the specific standards identified above and are intended to accommodate the physical characteristics and development plan of the Property while maintaining the overall character and functionality of the proposed residential community.

We appreciate the City's review of the revised application and the comments provided during the initial review. The enclosed materials have been revised to address the City's comments and to more clearly identify the proposed development standards and requested variances. We look forward to continuing to work with City staff to refine the PD, development agreement, PID, infrastructure plan, and related development requirements so that the Project can proceed as a coordinated development consistent with the City's development objectives.

If you have any questions regarding this matter, please do not hesitate to email me at nuriddin@kgftx.com, or call me at (210) 960-2750.

Sincerely,

KILLEN, GRIFFIN & FARRIMOND, PLLC

Requested Variances from Base Zoning and Subdivision Standards

Requested Variances from Base Zoning and Subdivision Standards

Pursuant to Section 38-202(c)(4) of the City Code, King Fish Development, LLC (the "Applicant") respectfully requests the following variances from the standard requirements applicable to the underlying R-1 zoning district and applicable subdivision design standards. The requested variances are intended to facilitate the development of the Property as a cohesive single-family residential community while allowing the development to incorporate site-specific residential design and development standards.

1. Side Yard Setback

Base Standard: Section 38-208 requires a minimum side yard setback of 10 feet in the R-1 District.

Requested PDD Standard: A minimum side yard setback of 5 feet.

Reason for Variance: The reduced side yard setback is requested to accommodate the proposed residential lot configuration and building pattern within the PDD. The Applicant will coordinate with the City's applicable fire, building, and engineering requirements to ensure that the reduced setback does not interfere with required emergency access, life-safety requirements, or applicable building-code requirements.

2. Rear Yard Setback

Base Standard: Section 38-208 requires a minimum rear yard setback of 20 feet in the R-1 District.

Requested PDD Standard: A minimum rear yard setback of 15 feet.

Reason for Variance: The reduced rear yard setback is requested to accommodate the proposed residential lot configuration and provide flexibility in the placement and design of single-family residences while maintaining adequate private yard areas and the overall residential character of the development.

3. Front Yard Setback for Irregularly Shaped Lots

Base Standard: Section 38-208 establishes a 20-foot minimum front yard setback for the R-1 District. The City has indicated that the base zoning regulations do not provide a general reduction in the front setback for irregularly shaped lots.

Requested PDD Standard: A minimum front yard setback of 15 feet for designated irregularly shaped residential lots, with a 20-foot minimum front yard setback applicable to standard lots.

Reason for Variance: The reduced setback is requested only for irregularly shaped lots where strict application of the standard 20-foot setback would unnecessarily constrain the placement and design of the residence due to the unique configuration of the lot. The variance is intended to provide reasonable flexibility for such lots while maintaining a consistent residential development pattern throughout the PDD.

4. Public Sewer Connection Requirement

Base Standard: Section 36-312(d) requires property located within 100 feet of a public sewer line to connect to the public sewer system.

Requested PDD Standard: The Applicant requests a variance from Section 36-312(d) to permit the approximately 63 one-half-acre residential lots within the applicable unit of the development to be served by individual on-site septic facilities ("OSSF") rather than connect to the available public sewer system.

Reason for Variance: The requested variance is necessitated by the unique topographic condition of the Property. Due to the existing elevation and grade within the portion of the Property containing the approximately one-half acre residential lots, conventional gravity sewer to those lots is not practicable. Strict application of Section 36-312(d) would require the constructions and operation of a lift station, force main, and associated infrastructure solely to overcome the site's topographic constraints.

In addition to the costs associated with the construction and installation of the lift station and related infrastructure, requiring a lift station would result in ongoing costs for the City associated with the operation, maintenance, repair and eventual replacement of the system.

The affected lots are substantially larger than conventional single-family residential lots and are proposed to be served by individual OSSF designed and permitted in accordance with all applicable regulatory requirements. If a lift station is required, the approximately one-half-acre lots proposed within the Project would no longer be feasible as currently contemplated, and the Applicant would not be able to proceed with the proposed larger-lot configuration. The requested variance is limited to the identified portion of the development and is intended to accommodate the Property's unique conditions while providing an appropriate wastewater disposal solution for the proposed large-lot residential use.

Residential Construction Standards

"PDD Standards"

RESIDENTIAL CONSTRUCTION STANDARDS

As and if applicable, the specifications hereinafter provided may be modified to the extent contrary specifications are included in the Consultant's Plan and identified as having direct application to the Residential Project. Except as specifically provided in the Development Agreement, all development of the Residential Project shall be governed by the City of La Vernia Code of Ordinances ("Code") (including the City Subdivision Ordinance). The Residential Plan shall minimally incorporate the elements hereafter described.

- Centralized location of the amenity center.
  - Proposed amenity center will include playscapes, water features (potential swimming pool), and community gathering spaces.
- Developer will meet or exceed the area requirement set for total pond and open space inclusive of amenity center site.
- No single-family residential lot within the Residential Project shall be smaller than 6,000 square feet.
- The minimum lot width shall be fifty feet (50') and the minimum lot depth shall be one hundred feet (100').
- Maximum Density: Overall single-family density will not exceed 4 units per acre.
- Minimum Building Setbacks:
  - Front Setback Line: twenty feet (20') and fifteen feet (15') on irregular shaped lots;
  - Side Setback Line: five feet (5'); and
  - Rear Setback Line: fifteen feet (15').

- Residential Street and Walkway Construction:
  - Cul-de-sacs shall conform to the standards set forth in Section 30-605(e) of the Code.
  - Residential areas will be connected by sidewalks as required by Section 30-615(a) of the Code.

- Prohibited Elements applicable to single-family residences:
  - Flat roofs;
  - Stove pipe chimneys;
  - Random roof penetrations or skylights facing the street;
  - White skylights;
  - Mirrored glass or any reflective film or windows;
  - Wood siding
  - Stone which appears glued on (cultured stone accents may be permitted);
  - Vivid, strong, bright colors; and/or
  - More than four (4) materials on front elevation.

- Minimum House Size; Slab and Exterior Construction Standards
  - All single-family houses shall consist of a minimum of 1,300 square feet in gross floor area.
  - Site-built on engineered, concrete slabs.

- Design Elements:
  - Variation to roof or building lines are required.
  - Decorative window shutters are encouraged.
  - The below design elements are encouraged:

- Windows and/or entries recessed into the façade by a minimum of one inch (1");
- Pillar posts;
- Balconies, porches or patios;
- Window hoods/screens; and/or
- Use of varying building materials; however, the use of more than four (4) building materials is prohibited.

- Heights and Views:
  - No building or residential structure may exceed two and one-half (2 ½) stories in height as measured from the elevation of the finished slab, exclusive of chimneys and ventilators, in accordance with Section 38-208 of the Code.

- Masonry:
  - Defined as Stone, Stucco, Stucco Board, or Brick
  - Masonry accents are masonry materials to create diversity in the façade or emphasis of architectural features.
  - 25% Masonry on the front elevation.
  - Siding: Any siding shall be vertical board and batten or horizontal lap.
  - Decorative Shakes or Decorative Siding such as shakes, scallops or other decorative siding facades shall be no more than 20% of the front elevation, 20% of each side, or 20% of the rear of the home.

- Driveways:
  - Developer shall provide for two (2) parking spaces on the driveway (which are in addition to the two (2) garage spaces identified and described below).

- Roofing:
  - 30-year dimensional shingles, standing seam metal, tile or similar are allowable roofing materials.
  - Roof pitches shall be no less than 4:12.
  - Accent or decorative roof pitches shall be no less than 2:12.
  - Accent or Decorative Roofs include porches, dormers, shed roofs over windows, box or bay windows, etc.

- Architectural Features:
  - Porches, patios, and/or courtyards may protrude into the front or rear setback by no more
    than five feet (5').
  - Eaves and roof extensions may protrude into setbacks by no more than two feet (2').
  - Windowsills, belt courses, cornices, and other architectural features may protrude into setbacks by no more than twelve inches (12").

- Front Doors:
  - Front doors shall be a solid core door not less than six foot eight inches (6'8") in height.
  - Clear leaded glass or eight (8) panel distinguished by mullions are encouraged.
  - The use of double doors, enhanced by side lights or transoms is encouraged.

- Floorplan Restriction:
  - Homes with identical elevations shall be restricted from being built on adjacent lots or on lots directly across from each other on the same street and shall have two full lots separation between them on the i) same or ii) opposite side of the street.

- Garage Doors:
  - Garage doors shall be of a non-warping, non-peeling material, design and color complimentary of the adjacent elevation of the residence and consistent with the overall architectural style of the residence.
  - Windows along the top of the garage doors are permitted.
  - Must not extend beyond the front of the home or front porch, J-drive and side entry garages shall be exempt from this requirement. The garage may extend up to five (5') feet in front of the body of the home.
  - Detached, J-swing, side entry, and recessed garages are encouraged.

- Accessory Buildings:
  - Accessory buildings, if permitted, shall comply with Section 38-410(a) of the Code.

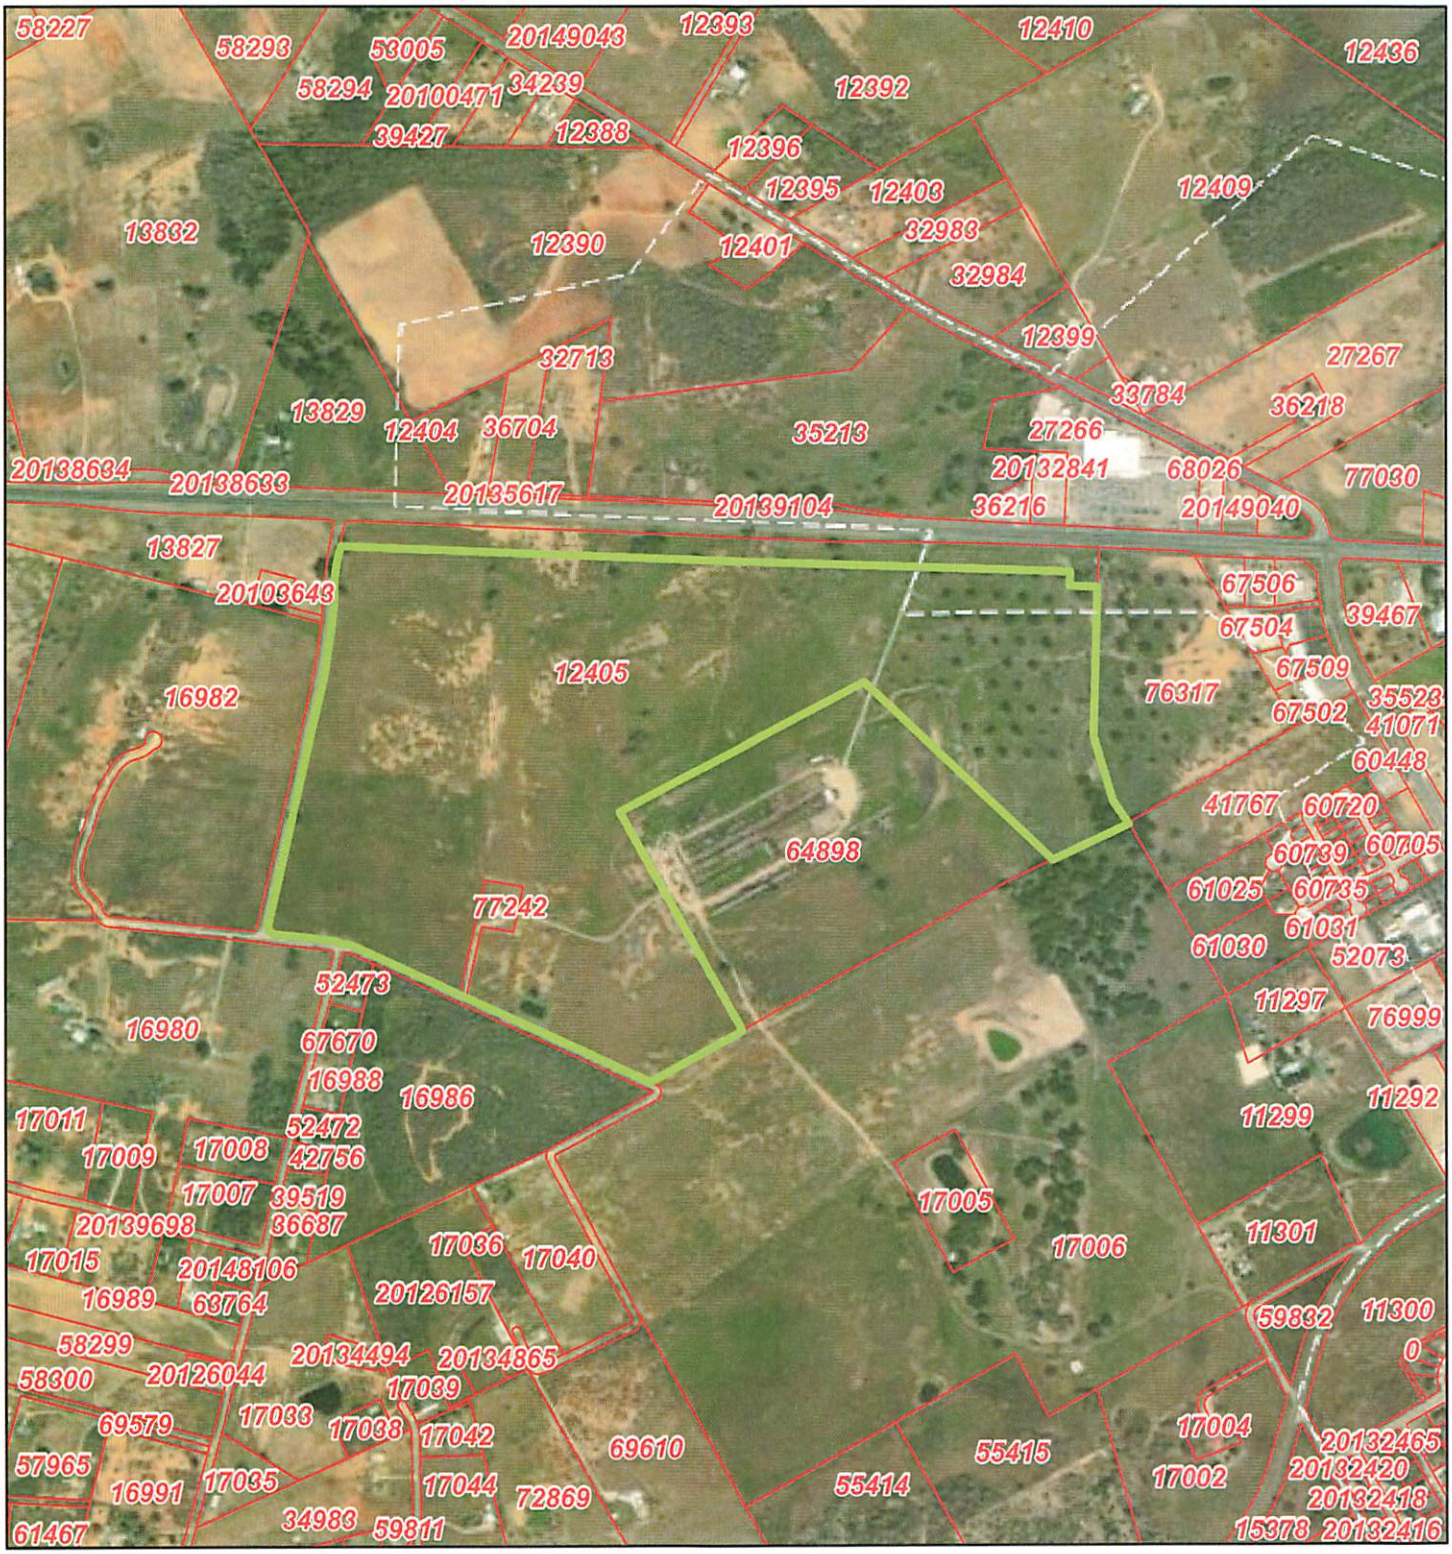

- Address Markers
  - Address markers shall be centrally located on the residence and well-lit, so as to be visible from the street.

- Enclosures:
  - Air conditioning compressors and pool equipment shall be enclosed by a structural screening element constructed of the same masonry materials as the principal residence, lot fencing, or non-deciduous landscaping.
  - In the event non-deciduous landscaping is used to screen any air conditioning compressor, at the time of installation, the non-deciduous landscaping shall screen one-half (1/2) of the vertical height of the air conditioning compressor.

- Landscaping Requirements:
  Landscape irrigation system for entire front yard, side yard and rear yard shall be installed and metered in accordance with the requirements in effect at the time the property is rezoned to PD.
  - Minimum of 100 square foot mulched landscape bed in the front yard.
  - Front yard shall be fully sodded, except for landscape bed, and rear yard shall be fully sodded, except for any landscape bed(s).
  - Minimum of ten (10) one (1) gallon plants in the front yard.
  - Minimum of six (6) three (3) gallon plants in the front yard.
  - Minimum of one (1) two-inch (2") caliper hardwood tree shall be planted within the rear yard inside of any fencing.
  - Minimum of two (2) three-inch (3") caliper hardwood tree shall be planted within the front yard or side yard in front of any fencing.
  - Landscape irrigation system for entire front and rear yard shall be installed.
  - Any Lots which are corner lots or side open space lots shall include the following:
    - Minimum of 100 square foot mulched landscape bed in the front yard.
    - Minimum of 100 square foot mulched landscape bed in the side yard.
    - Front yard and rear yard shall be fully sodded, except for landscape bed(s).
    - Minimum of fifteen (10) one (1) gallon plants in the front yard.
    - Minimum of 6 (6) three (3) gallon plants in the front yard.
    - Minimum of three (3) three-inch (3") caliper hardwood trees, planted not less than twelve feet (12') apart, two (2) of which shall be a side yard tree, and one (1) of which shall be front yard trees.
    - Minimum of six (6) one (1) gallon plants in the side yard.
    - Minimum of five (5) five (5) gallon plants in the side yard.

Property Deeds

Deed in Lieu of Foreclosure

Date: 3-17-14, 2014

Grantor: P-Bar Development Co.

Grantor's Mailing Address: P.O. Box 10, Hwy. 87 West,
La Vernia, Wilson County, Texas 78121

Grantee: FLP Development, LLC

Grantee's Mailing Address: P.O. Box 10, Hwy. 87 West,
La Vernia, Wilson County, Texas 78121

Note: That certain Promissory Note dated September 14, 2012, executed by P-Bar Development Co., LLC, payable to the order of F-4 Cattle Co., Inc. in the original principal amount of One Million, Six Hundred Fifty Thousand and no/100 Dollars ($1,650,000.00).

Deed of Trust: Dated September 14, 2012 from P-Bar Development Co., LLC to North O. West, Trustee.

Consideration: TEN AND NO/100 DOLLARS ($10.00) and further the release of Grantor from all liability for the indebtedness and obligations under the Note and Deed of Trust, except that no release is given of any liens or warranties of title and further except that the indebtedness under the Note is not canceled or extinguished.

Property (including any improvements): Being 306.937 acres of land, more or less, and being approximately 188.807 acres out of the F. Herrera Survey No. 6, Abstract 15, approximately 101.43 acres out of the J.H. San Miguel Survey No. 129, Abstract 290, and approximately 16,637 acres out of the Y. P. Alsbury Survey, Abstract 33, Wilson County, Texas; and also being comprised of the remaining portion of a 172.15 acre tract described as "Tract A" and a 0.38 acre tract described as "Tract E" in Volume 439, Page 47, a 101.255 acre tract described in Volume 658, Page 567, the remaining portion of a 46.68 acre tract described in Volume 678, Page 102, a 0.43 acre tract described in Volume 691, Page 71, a 1.44 acre tract described in Volume 720, Page 677, a 3.08 acre tract described in Volume 446, Page 98 of the Deed Records of Wilson County, Texas and a 2.799 acre tract described in Volume 1062, Page 817 of the Official Records of Wilson County, Texas, and the said 306.937 acres of land being more particularly described in Exhibit "A" attached hereto and made a part hereof.

Exceptions to Conveyance and Warranty: The liens described in this Deed and the exceptions to conveyance and warranty in the Deed of Trust.

Grantor, for the Consideration and subject to the Exceptions to Conveyance and Warranty, grants, sells, and conveys to Grantee the Property, together with all and singular the

rights and appurtenances thereto in any way belonging, to have and to hold it to Grantee and Grantee's heirs, successors, and assigns forever. Grantor binds Grantor and Grantor's heirs and successors to warrant and forever defend all and singular the Property to Grantee and Grantee's heirs, successors, and assigns against every person whomsoever lawfully claiming or to claim the same or any part thereof, except as to the Exceptions to Conveyance and Warranty.

Conveyance in Lieu of Foreclosure. This Deed and the conveyances being made are executed, delivered, and accepted in lieu of foreclosure and will be interpreted and construed the same as a foreclosure of the liens and as an absolute conveyance to Grantee of all right, title and interest in and to the Property, including specifically but without limitation any equity or rights of redemption of Grantor in or to the Property.

Continuing Nature of Lien. Notwithstanding the release of Grantor from all liability for the indebtedness and obligations under the Note and Deed of Trust, the indebtedness has not been canceled or extinguished and the Property continues to be subject to the performance of the obligations under the Deed of Trust. The Deed of Trust lien is not released or relinquished in any manner, and the indebtedness, obligations, and lien will remain valid and continuous and in full force and effect, unless and until the indebtedness, obligations, and liens are expressly released by written instrument executed and delivered by the holder thereof, at the holder's sole discretion.

Nonmerger. Neither Grantor nor Grantee intend that there be, and there will never be, a merger of the Deed of Trust lien with the fee simple title or any other interest of Grantee in the Property by virtue of this conveyance, and the parties expressly provide that any interest in the Deed of Trust lien and fee simple title will be and remain at all times separate and distinct.

GRANTEE ACCEPTS AND AGREES:

BRANDON WADE PIERDOLLA

METES AND BOUNDS DESCRIPTION OF A 1.783 ACRE TRACT

Being a 1.783 acre tract situated in the J. H. San Miguel Survey No. 129, Abstract 290, Wilson County, Texas, and being out of a 306.937 acre tract as described in a conveyance from P-Bar Development, LLC to FLP Development, LLC recorded in Volume 1785, Page 279, Official Public Records of Wilson County, Texas; said 1.783 acre tract surveyed by Jeffrey B. Berger, R.P.L.S. No. 5558 and being more particularly described as follows:

BEGINNING at a 1/2" steel rod with a red plastic cap stamped "RPLS 5558" set on the northeast line of County Road 359 for the southwest corner of the herein described tract; said point being located South 79° 56' 29" East 547.06 feet (deed call South 79° 56' 29" East 546.97 feet) and South 63° 25' 47" East 655.90 feet (deed call South 63° 25' 49" East) with said northeast line of County Road 359 from a 1/2" steel rod found at the southeast end of the northeast cutback line of said County Road 359 and County Road 361;

THENCE over and across said 306.937 acre tract with the following calls:

North 13° 00' 38" East 679.89 feet generally along a barbed wire fence to a wood fence corner post found for the northwest corner of the herein described tract;

South 80° 40' 53" East 227.49 feet to a 1/2" steel rod with a red plastic cap stamped "RPLS 5558" set for the northeast corner of the herein described tract;

South 13° 00' 38" West 268.63 feet to a 1/2" steel rod with a red plastic cap stamped "RPLS 5558" set for the most northerly southeast corner of the herein described tract;

North 80° 40' 53" West 187.41 feet to a 1/2" steel rod with a red plastic cap stamped "RPLS 5558" set for an interior corner of the herein described tract;

and South 13° 00' 38" West 423.49 feet to a 1/2" steel rod with a red plastic cap stamped "RPLS 5558' set on said northeast line of County Road 359 for the most southerly southeast corner of the herein described tract;

THENCE North 63° 25' 47" West 41.15 feet (deed call North 63° 25' 49" West) with said northeast line of County Road 359 to the POINT OF BEGINNING and containing 1.783 acres.

Surveyor's Notes:
1. Bearings are based on the deed of 306.937 acre tract recorded in Volume 1785, Page 279, Official Public Records of Wilson County, Texas.
2. A survey plat was prepared this same date as a part of this survey.
