MEMORANDUM

Engineering Services

Date: January 13, 2026

To: Mayor Jackola and City Council
From: Mike Trippett, City Engineer
Subject: **Approval to Advertise Project for Bids**
Vine Street Water Line Replacement (Fifth Street to Seventh Street)
Project 25713

Background

A Small Water Line Replacement Project was included in the FY25/26 Budget. City staff has chosen the Vine Street two-inch waterline between 5th and 7th Street to replace this year. The improvements include approximately 795 feet of 8-inch ductile iron water and 18 feet for 4-inch ductile iron water pipe, along with associated valves, services, meters and boxes, along with 180 square yards of concrete walks and driveways and 460 square yards of trench resurfacing.

Udell Engineering is currently completing design for the city. We are estimating the project to cost between \$225,000.00 and \$275,000.00, which will be paid for using water improvement funds. The water funds will be pulled from the Grant Street Waterline Replacement Project which is budgeted for this fiscal year; however, due to the need for a rail crossing permit the project will be pushed to next fiscal year.

Recommendation

Staff recommends that City Council pass a motion authorizing city staff to advertise the Vine Street Water Line Replacement Project for bids. Staff will evaluate the bids and bring a recommendation to City Council for award
