

As the homeowner of 7500 Linkside and 7504 Linkside I believe the request to install sidewalks along both property's frontages are an unreasonable hardship. We believe this to be unreasonable due to the grade/ slope of the front yard of 7500 Linkside. The grade will result in a very expensive engineered retaining wall having to be built prior to side walk installation. We however are willing to place a sidewalk along the frontage of 7540 Linkside . This sidewalk would extend from the existing property lines of 7504 Linkside, this is where the planned new construction will be added (house addition and driveway). Please see the attached diagram (highlighted area) for planned sidewalk and driveway.
