

# Sales Proposal

*Prepared for Levy County*

by Sales Rep — [kathy.t@snapinspect.com](mailto:kathy.t@snapinspect.com)

## ● Top 3 Pain Points

### 1. Difficulty verifying inspection authenticity remotely

It is challenging to confirm that submitted photos are taken at the correct property and in real time, creating concerns around compliance and inspection accuracy.

### 2. Can't request structured inspections

Inspectors are still required to travel on-site for many simple inspections, creating inefficiencies, longer turnaround times, and increased workload for the department.

### 3. Limited integration and reporting efficiency

The team needs a smoother process for managing inspection reports within their existing permitting system (OpenGov), without relying on manual uploads and disconnected workflows.

## 1. Streamlined virtual inspection process

SnapInspect enables remote inspections for qualifying permit types through guided mobile workflows, helping reduce site visits while improving operational efficiency and assuring an accurate inspection.

## 2. GPS, time & date verified photo capture

SnapInspect enforces GPS geo-fencing, live photo capture, and automatic time/date stamps to provide greater transparency and confidence in remote inspection submissions.

## 3. Flexible reporting and integration capabilities

SnapInspect can generate customized inspection reports aligned with existing county templates and supports integration opportunities with systems like OpenGov to simplify approvals and record management.

## Feature needs

Your subscription includes	Confirmation
• Advanced Inspections	✓
• Tasks/Work Orders	
• Integrations (Yardi, AppFolio)	
• Multi-language Module	
• AI Functionality	✓
• Scheduler	✓
