RE: Design / Build Holly Hill Pedestrian Bridge Replacement

Dear Mr. Ward,

It is with great pleasure that this referral letter is published on behalf of Live Flyer, Inc. for their high-level performance in; designing, permitting, procuring and constructing the Holly Hill Pedestrian Bridge. Having been selected as the low cost producer and enjoying the highest technical score in the City's Design / Build Request for Proposal solicitation, Live Flyer, Inc. was selected over several firms.

From the onset, your firm established and maintained excellent communications and coordination, so that the City was always aware of the current status of any given component of the work or potential risk factor. One-to-one scale mock-ups of the proposed work were fabricated for the City to ensure program objectives were consistently achieved and adjustments incorporated as needed to accommodate any concern raised by the City.

As the worst of the virus pandemic impacts occurred during the project permitting phase, the U.S. Army Corps of Engineer's compliance group was particularly affected, causing an extensive permit review delay. However, Live Flyer's persistence ensured that requisite permits were garnered and accelerated field work production, to mitigate the impact of the virus and successfully complete the work on time and within budget.

Sincerely,

Clement Taylor Park Replacement of Existing Seawall  
Letter of Referral - Live Flyer, Inc.

Dear Mr. Ward,

Live Flyer, Inc. displayed high-quality work and timely completion on a recent work project at the City's Clement Taylor Park, while performing the following work: structures demolition, aluminum bulkhead wall sheet pile driving, tiebacks, deadmen and beach sand fill for the seawall replacement. It is our pleasure to recommend Live Flyer, Inc. as a turnkey marine contracting and environmental firm.

Located along the Choctawhatchee Bay, Clement Taylor Park historically demonstrates the presence of artifacts of interest for preservation and analysis. As a known historical site for native Indian materials, high level coordination was established and maintained by the contractor with the onsite archeologist consultant, to evaluate proposed excavations.

During the sea wall replacement, Live Flyer routinely reported potential finds to the City's archeologist and suspended excavation as needed to assess artifacts of interest. Alternative locations of available production were identified, thereby mitigating artifact discovery delays. Live Flyer, Inc. achieved all the City's goals with excellence, and we look forward to future contracts.

Sincerely,

To Whom It May Concern:

The Jewell Cove Mangrove Pod Project was a pilot project successfully constructed by Live Flyer, Inc. The company owner, John Ward placed a sectional barge along the existing seawall with a crane. He acquired the limestone rock and arranged the trucking and loading of the rock onto the barge. He then pushed the barge around the bridge with a rigid inflatable boat. Using a hydraulically controlled excavator with a thumb, he placed the limerock revetment in five discrete piles to provide additional oyster and mangrove habitat in the Lake Worth Lagoon. The five pods were planted with five mangroves in each pod.

The planting of large mangroves into rock was a novel concept and John and his crew were enthusiastic and helpful in coming up with a new approach to the creation of additional wetland habitat.

ERM would like to thank John for his timely performance in the construction of the living shoreline project.
