5. Describe the existing system

Levy County's existing primary E911 system is a Type 4, E911 Intrado Viper call handling equipment with MapFlex mapping display, located in the Levy County Sheriff's Office. This system has been serving Levy County since October 2009. The original system was upgraded in July of 2015 and again in December of 2021. Levy County's PSAP consists of 5 positions. The system includes a Nice recorder and Power Metrics is used for MIS.

6. Describe the scope of work

Levy County's goal is to ensure our E911 (Positron Viper) system and MapFlex are covered under 24x7 maintenance contracts for mitigation of failure and software upgrade assurance. The objective includes maintaining the system at the latest revision level for continued E911 system operations. Our county 911 coordinator will monitor each deliverable to ensure the tasks performed by the vendor include the following deliverables:

* Viper maintenance tasks include emergency 24x7 two-hour response from certified Lumen technician during annual maintenance period. Updates and documentation are provided when manufacturer releases upgrades. Parts replacement for covered equipment listed in the attached Lumen quote.

* MapFlex maintenance tasks include 24x7 remote tech support from Lumen during annual maintenance period.

* Symantec EndPoint Protection Manager

7. Justification of the need for the proposed project

Without these maintenance contracts we would not be able to maintain the E911 system equipment and software in our county. We do not have the technical and maintenance capabilities for the equipment and have to contract these services through vendors with the expertise on maintaining our E911 systems.

8. Justification of grant funding

Levy County is requesting the Rural County Grant due to rising costs, reduction of landline phones to collect surcharges on and our small rural population. Levy County's current funding is not sufficient to cover the yearly costs for the CPE equipment and software maintenance. Levy County needs financial assistance to fund this project given that our county's current funding is not sufficient to cover the yearly costs for maintenance.

9. Project timeline
