9. **Background: (Why is the action necessary, and what action will be accomplished) (All supporting documentation must be attached if any)**

In order to enhance our emergency services and meet the requirements of Next Generation 911 (NG911), we need to implement two crucial components: an IP-based Emergency Services IP Network (ESInet) and Next Generation Core Services (NGCS).

The ESInet will provide us with a secure and reliable infrastructure by establishing two diverse connections. This network will enable us to receive i3-compliant emergency calls and support NGCS. NGCS encompasses essential software elements and databases that facilitate the processing of 911 calls on the NG9-1-1 network.
