Re: Wesley at Levy County Landfill

To Whom it may Concern;

My husband and I had to go take the trash to the landfill on a Saturday, my husband just had major spine surgery about 3-weeks prior. While inside the building our truck crapped out. Would not start. An employee named Wesley stopped what he was doing and, with a happy attitude, he helped me push the truck out into the paved lot and out of the way of all. It was a very hot day. He said we could go up to the building, where recycle goes, out of the sun - we called AAA to come tow us, Wesley came back to check on us and gave us each a cold bottle of water. We were there waiting for triple A (AAA) for almost 5 hours. Wesley continued to check on us and bring us water and continuing to do his work. AAA never came, after many phone calls. We ended up calling our own tow truck, but it was getting close to time for the landfill.

Re: Wesley at Levy County Landfill

to close, so we knew we had to get the truck outside the gate, Wesley again came to the rescue and used his vehicle to push up up the hills and just outside the gate. He even offered to drive us home, but we had to wait for the tow truck. He still continued to make sure we were ok (we are old)!

We need for Levy County to know what a hard-working, kind, selfless human being this young man is. He has renewed our faith in young people of today. If we were well-to-do we would give him a huge Thank You reward. This young man should be appreciated and make sure you keep him! We cannot say Thank You enough! Wesley made all the difference to a very tough day for us.

Please do not hesitate to contact us if you have questions.

Sincerely,
John & Elizabeth Stanley
