Re: Timber Harvest Update

The Levy County Procurement Department contacted the Levy County Forester and AW Power's Forestry. The Levy County Forester visited the 4 parcels and provided an update on the parcels (email attached).

AW Power's Forestry sent a staff down to look at the parcels. They identified that all of the trees were Sand Pines and that we should wait approximately 5 more years before they are harvested. He also stated that Sand pines are not sought after; additionally the ground would need to be wet when they are harvested.

Respectfully,

Ali Tretheway
