You don't often get email from cpigeon@ardurra.com. [Learn why this is important](#)

Stacey, Thanks for the reply. I apologize for the missed email address, I see where the “g” was drop off the .org. Interesting I never got a reply that it was undeliverable.

Please see the One Drive Link below with a file that can be accessed to download the various documents that are in progress for the design and regulatory coordination associated with Shady Hammock Estates. Additional Lidar data collection and aerial imagery has been flown but the full data processing and mapping is still in progress. I have requested copies of the progress work from the surveyor, however have not received the mapping as of this morning. I can forward more information to you when received.

The attached progress engineering Construction Plans are also included in the OneDrive link, but have attached this email as a quick reference.

Thanks for your assistance on this, and should you need anything else please let me know. I will be attending the May 21st BOCC meeting. I anticipate requesting a follow up pre-application meeting with the County Engineer once the final topographic mapping is completed and the construction plans are a little further along with the proposed roadway profile grade line illustrated.

Thanks,
