Levy County has been awarded \$1,000,000 through the Florida Division of Emergency Management for the installation of permanent backup generators at the Levy County Government Complex. The funding was appropriated by the Florida Legislature and Governor for the Levy County Government Complex Permanent Generators project.

The project will provide permanent backup generators and associated electrical improvements necessary to maintain reliable emergency power at designated County facilities. The generators will support two separate electrical feeds to the main office building, each operating on a 400-amp breaker panel. The project also includes appropriately sized transfer switches and a concrete generator pad.

The project is intended to improve the County's power resiliency and maintain continuity of essential government operations during power outages caused by severe weather, flooding, high winds, and other emergency events.
