JUSTIFICATION FOR EQUIPMENT REQUESTED:

This agency's vehicle maintenance has always been performed at the Levy County maintenance shop that is located about 2 miles west of the transit facility. This maintenance location has been used since the transit agency began providing trips. The transit property was awarded through a grant from FDOT and permission was given to the county for the county construction and maintenance to occupy the east side of the building. That agency has finally moved, so we now have access to occupy the other side of the building. This equipment request is the beginning of moving as much of the transit vehicle maintenance to the transit building as possible, with future plans for all maintenance to be done at the transit property. The items requested are pieces of equipment that can be utilized immediately upon set up. This will reduce a lot of time shuttling buses back and forth to the current maintenance shop down the road and the requested equipment service at advised intervals. Maintenance of transit vehicles will be the only vehicles in the county that will utilize the equipment. This is a move that the transit agency has long been waiting on.
