

Letter of Professional Reference
for
Accelerated Data Works, Inc.

June 16, 2019

To Whom it May Concern:

As the primary liaison between Brammer Bio and Acceleration's IT staff I can highly recommend Acceleration for a variety of network and telecommunications services.

I inherited the network and telephone installation just after Brammer Bio purchased the entire Florida Biologix organization in Alachua. Over a thirty-month period, Acceleration helped make the transition simple, guided us through several upgrades and expansions of the network, and serviced critical network issues even when the issues were not directly related to Acceleration implementations.

The digital voice system in particular was never problematic in any way. Acceleration simply added desktop, conference and facsimile units and services as requested and made modification remotely in a timely fashion. The dependability of the digital voice system is critical like any large business. Acceleration's hosted PBX solution was flexible, cost effective and dependable.

Please contact me with any questions.

Sincerely,

Michael Castleman
