Letter of Professional Reference
for
Accelerated Data Works, Inc.

2 July 2019

To Whom it May Concern:

AMJ Group has been working with Accelerated Data Works, Inc. (dba Acceleration) for close to twenty years. Initially those services were web site, email and general office connectivity, but eventually expanded into fiber Ethernet high speed service with office telephones. As a property manager, telecommunications problems could directly affect our ability to sign and maintain tenant relationships. The decision points for making the change to a digital voice system could not simply be reduced to cost savings, but rather needed to focus on availability and function.

With matching fiber Ethernet service in place, both the connectivity and the phone service has been outstanding. Acceleration is quick to address issues, provide training for new or changing features and diagnose conditions on-site when necessary. The service we receive is that of a local service-oriented company and not like that which we have experienced with larger entities. Please contact me with any questions.

Sincerely,

Scott A. Buchanan
Vice President
AMJ Group Inc.
