Subject: SE 53rd lane asphalt Paving Request

Good day,

My name is Andrew Vreeland and I live at 12390 SE 53rd Lane in Morriston and I would like to request that our neighborhood roads be considered for future asphalt pavement. I believe that the condition of the limerock roads could lead to higher maintenance costs for our vehicles. Paving may also save maintenance cost in the future if they no longer require maintenance with grading equipment. Our roads are also very prone to drying out which creates a fine dust when vehicles travel the roads, at any speed. SE 53rd lane west from CR 121 may be the highest trafficked road in the neighborhood but I'm quite certain that paving most or all of the roads in this subdivided neighborhood will lead to more joy and peace for all residents, and possibly more homes being built which could lead to more tax revenue for the county. I understand there are many roads in Levy County scheduled and i know it may be some time before this potential project comes to fruition, but I am looking forward to the day I can enjoy a smooth ride home without worrying about dust or damaging my vehicle.

Thank you for your time and consideration.

Andrew Vreeland
Levy County resident

Re: Road Improvement (SE 53 Lane Morrison, FL)

I am writing in reference to S.E. 53rd Lane, off of S.R. 121 in Levy County, Florida. S.E. 53rd Lane serves as the only viable ingress/ egress into the Morgan Farm Subdivision from S.R. 121 . There are approximately 20 homes that have direct frontage to 53rd Lane. In addition to the many homes located on this street, S.E. 53 rd Lane serves as the main feeder to the vast majority of thoroughfares throughout the Morgan Farms Subdivision.

I am requesting that the County conduct studies in order to determine whether S.E. 53rd Lane meets the criteria to be paved. The large volume of traffic that utilizes this street serves to create large potholes and the rains create a washboard effect through the entire initial 1/4 mile of this ingress. While the County currently provides crews that service this street, the crews have many streets to service and do not have the availability to make improvements at a pace that serves the residents of this community.

In conclusion, S.E. 53rd Lane serves as the only Eastern, Ingress/Egress into the Morgan Farms Subdivision. As the only Ingress and as the main feeder street to the Morgan Farms Subdivision, this street is heavily traveled. Environmental factors and traffic patterns cause this street to be filled with potholes and other obstacles on a regular basis. I am requesting that the County review the criteria for paving this street, as doing so would provide great relief to the citizens that have homes in this area.

Sincerely,

James L. Hobson
