BUSINESS

Farmers Market: Things went well but thought placement of table was not the best. Received a couple drawings. Councilmember Furutani stated that they might need to go out more into the market, get people out to talk to us, bring people back, but good conversations were had.

Go Electric!: Thought it went well, seemed like there were a lot of events going on in LFP this evening along with a beautiful night. Had a Doctor come talk about health issues on gas stoves. Gary Hawkey, a local resident and chef, cooked eggs on his induction stove and answered questions. There are two more workshops coming up, next is in Kenmore on Solar, including shared solar. Third program will be in Shoreline on heat pumps.

Library Project: Library will host a table for two weeks on the activity. Timing is well because kids will be back in school by then.

A. Review DRAFT Climate Action Plan

Group went through the Climate Action Plan Dana created that included an implementation strategy and actions. CAC has taken narrative from other cities, would be helpful for people to have an easy to read section of what we would like to do. Take narrative, description of action, cost, carbon equivalents reduced, and level of difficulty.

Assignment is to fill in sections of strategies and actions tables.

B. Picnic in the Park

September 9th, is a popular event and good outreach. Group will need to figure out what the goal of CAC being at Picnic in the Park will. Communication team will meet and look at next meeting to decide what CAC would like to do.

C. Next Steps

Tamara is waiting for proposal for Environmental Justice review and graphic design.

Mimi will reach out to her contact to see if they would like to review the plan.

Cory will see if Cascadia would look at the plan and cost.
