Prospective Board Member Information (cont.)

Why do you want to join the Lake Forest Park Tree Board?

Trees bring a sense of majesty and wonder to Lake Forest Park. When friends and family come to visit, the first thing they remark upon is the magnificence of the trees. I have such a sense of pride living in a place that treasures this natural splendor.

The fact that honoring the trees is a key tenet of the LFP was a major factor for my family when we chose where to live.

It would be a delight to have a hand in doing right by the trees in my community.

What do you hope to accomplish as a board member?

As a board member, I would promote in outreach and education to the community to continue and grow in an appreciation for our trees. In particular, developing youth programs and dedicated education sites is of interest to me. This may include facets such as invigoration of social media presence, booths at the farmer's market and / or a presence at other community events. I would also love to continue to grow my own knowledge about our native trees and environmental conservation efforts in the area.

Do you have any additional information or comments?

In my work as a speech-language pathologist, I have experience with planning and implementing programs such as summer camps and community events, education, and fundraising within my field. I believe I could transfer these skills to the needs of Tree Board. I consider myself a lifelong learner and defender of the natural world. I love living in Lake Forest Park, and it is important to me to connect to the entire community and foster that connection not only among people but also with the natural resources that make our city so spectacular.

Thank you for your interest in the Lake Forest Park Tree Board.
