Legislative History

- First Presentation – Council Regular Meeting October 22, 2026

Attachments:

1. Water Quality Financial Assistance Application
2. Herrera Technical Memorandum

Executive Summary

The City of Lake Forest Park (City) has been awarded a $353,990 grant for community-based public-private partnerships (CBP3) by the Washington State Department of Ecology (Ecology). Ecology's CBP3 grants support the planning phase for the implementation of green stormwater solutions that provide water quality and flow control benefits to receiving waters.

Background

The City's former Stormwater Coordinator applied for Ecology's CBP3 grant in 2025. In June of 2026, the City was awarded a $353,990 CBP3 grant. This grant will be used to plan a pilot program that will provide water quality and flow control benefits to receiving waters, including Lyon Creek, with the implementation of green stormwater solutions.

The City is currently working with Ecology to develop the grant agreement, which will be brought to Council at an upcoming City Council meeting.

Fiscal & Policy Implications

The CBP3 grant is a pass-through grant and does not require a local matching contribution. This grant will be used during the planning phase only. Other grants and/or funding sources will be utilized during the implementation phase.

Alternatives

Options	***Results***
• Approve	The City will utilize the CBP3 grant to begin the planning phase for the implementation of future green stormwater solutions.
• Do not approve	The City will not begin planning for the implementation of green stormwater solutions at this time.

Staff Recommendation

Review the grant proposal and provide staff with questions or feedback.
