APPLICANT'S RESPONSES TO EVALUATION CRITERIA (Zoning Variance)

In the space provided or in a separate attachment, provide responses to the following questions:

- 1. What extraordinary or exceptional conditions due to size, shape or topography are present on the property in question that support the request for relief?**

Please see attached.

- 2. What other conditions are unique to the property and adversely affect its reasonable use or usability as currently zoned?**

Please see attached

- 3. How does the application of the requirements of the applicable ordinance to the property in question create an unnecessary hardship?**

Please see attached

- 4. Would the requested relief, if granted cause substantial detriment to the public good or impair the purpose and intent of the applicable ordinance?**

Please see attached

- 5. Does the relief requested grant a use of land or building or structure that is otherwise prohibited by the applicable ordinance?**

Please see attached.

**COMBINED LETTER OF INTENT AND APPLICANT'S RESPONSE TO
EVALUATION CRITERIA FOR MAJOR VARIANCE APPLICATION OF
GREEN RIVER BUILDERS, INC.**

Mahaffey Pickens Tucker, LLP submits this Letter of Intent and the attached variance application (the "Application") on behalf of Green River Builders, Inc. (the "Applicant"), relative to a proposed mixed-use development on an approximately 198.082-acre tract of land (the "Property") located at the intersection of Tuck Road and Conyers Road (State Route 20). Unincorporated portions of the Property were annexed into the City of Loganville and the entire Property was rezoned to the PUV zoning classification by City Council at the October 10, 2024 Council meeting pursuant to their approval of case numbers A24-012 and R24-013 (the "Rezoning").

In accordance with the approval of the Rezoning and applicable provisions of Chapter 119 of The Code of the City of Loganville, Georgia (the "Code"), the proposed development includes a mixture of single-family detached homes, attached townhomes, and commercial space. Subsequent to the approval of the Rezoning, the Applicant proceeded with intense engineering and design work, including conducting additional environmental and other site inspections, in preparation for land disturbance and other necessary permit submittals. Those efforts have uncovered additional physical characteristics of the Property which frustrate its use and development pursuant to the current requirements of the Code. Simultaneously, the Applicant also embarked on major marketing efforts for the commercial component. However, as described in more detail below and despite strong interest from commercial tenants, the Applicant has encountered serious reservations from those prospective tenants about the timing of building

permit issuance and the construction of the Tuck Road realignment and Highway 20 improvements.

Accordingly, based on the physical characteristics of the Property, including recently uncovered physical characteristics, and updated information related to the timing of the Tuck Road realignment and Highway 20 improvements, the Applicant submits the Application requesting to modify the building permit concurrency requirements set forth in Section 119-221(d)(2) of the Code. Specifically, the Applicant is requesting relief from the Code to allow the issuance of building permits for up to 75% of the floor area/dwelling units of each use with the remaining 25% of building permits for each use not being issued until certificates of occupancy have been issued for the first 75% of the floor area/dwelling units of each use. As described in the Applicant's Responses to Evaluation Criteria provided below, the strict application of the Code to the Property would create an unnecessary hardship on the Applicant and Property Owner due to unique characteristics of the Property.

APPLICANT'S RESPONSES TO EVALUATION CRITERIA

1. What extraordinary or exceptional conditions due to size, shape or topography are present on the property in question that support the request for relief?

The subject property is exceptionally large and has significant topography. A creek runs along the easterly property boundary line, which presents challenges for the development of the property and construction of buildings. Additionally, after the rezoning was approved by City Council in 2024, additional engineering and environmental inspections were conducted on the property which uncovered another stream running through the middle of the Property. The presence of this stream has disrupted the layout of the proposed development including the commercial portion. While the residential components are more easily adaptable to this reconfiguration, the commercial reconfiguration has caused a delay in the design, marketing, and leasing of the commercial space.

2. What other conditions are unique to the property and adversely affect its reasonable use or usability as currently zoned?

The proposed GDOT project to align Tuck Road with Sharon Church Road and construction of a roundabout provide unique, significant challenges to the reasonable use and usability of the Property as currently zoned. The timeline of these major road improvements has been extended multiple times. The road improvement project directly affects the usability of the commercial components of the Property as they are located along the frontage of Tuck Road and Highway 20. The residential components are largely unaffected. Forcing development of the commercial component of the mixed-use development to occur before planning and/or construction of such major road improvements is completed would create an unnecessary

hardship on the Applicant and the property owner. Through its marketing efforts, the Applicant has encountered strong interest in the commercial component, but with a common and serious concern regarding the timing of the road improvements. Frankly, there is virtually zero desire among potential commercial tenants to open for business in the middle of major road improvements—especially improvements that directly affect visibility and access.

Additionally, as evidenced by commercially-zoned, but vacant properties in the area, commercial development relies on residential critical mass to be successful. Prematurely constructing commercial uses before a stable market is present would result in unnecessary risk and cost to the Applicant and property owner. Artificially restraining residential development would prolong the development timeline and unnecessarily expose the project to market risks. On the other hand, allowing the development to proceed according to timelines dictated by the free market would allow the natural development of the project while also increasing the attractiveness of the commercial component as residential units come online and establish a built-in customer base.

3. How does the application of the requirements of the applicable ordinance to the property in question create an unnecessary hardship?

The application of the ordinance to the subject property creates unnecessary hardship by effectively prohibiting the use of the Property according to the current PUV zoning classification. Despite its best efforts to market the commercial space, prospective tenants are not interested in occupying the Property until the completion of the Highway 20 improvements. Based on feedback from prospective commercial tenants, the lack of residential critical mass on the Property also frustrates the construction of commercial space. Essentially, the Applicant is caught in a “catch-22” wherein residential units on the Property cannot be constructed on the Property until the completion of corresponding commercial space, but the commercial space is not viable until the completion of the residential units. Prematurely forcing construction of commercial components before the market has matured undermines the stability of the overall development. Moreover, the unpredictable GDOT timeline impacts the attractiveness of the commercial component to end users.

4. Would the requested relief, if granted cause substantial detriment to the public good or impair the purpose and intent of the applicable ordinance?

No. To the contrary, granting the requested relief would reduce the risks of a failed development and would provide a benefit to the public good without impairing the purpose and intent of the applicable ordinance. The Applicant is not seeking relief from the prescribed land use mix as set forth in the Ordinance. Rather, the Applicant is merely seeking flexibility regarding the timing of construction. The Applicant would welcome the opportunity to establish certain other development requirements and conditions of approval to safeguard the surrounding community and ensure the timely construction of the project. As requested, the relief would still require the Applicant to complete 75% of the commercial space before building permits for the remaining 25% of residential uses would be allowed.

5. Does the relief requested grant a use of land or building or structure that is otherwise prohibited by the applicable ordinance?

No. The Applicant is not requesting to alter the required land use mix or to allow a use of land or building or structure that is otherwise prohibited by the applicable ordinance. Rather, the requested relief relates only to the timing of construction for land uses that are otherwise allowed by the ordinance.

The Applicant welcomes the opportunity to meet with staff of the City of Loganville Department of Planning and Development to answer any questions or to address any concerns relating to the matters set forth in this letter or in the Application filed herewith. The Applicant respectfully requests your approval of the Application.

Respectfully submitted this 4th day of April, 2025.
