1. General screening standard. Every development shall provide sufficient screening to reasonably protect the privacy, safety, and environment of neighboring residential properties and shield them from adverse external effects of that development.

Walls up to twelve (12) feet in height shall be required for the purpose of attenuating noise, (as determined by an acoustical analysis), odor, air pollution, artificial light, mitigation for grade differential between properties, and providing privacy and safety.
  2. Sites for screening of refuse collection. Every development will be required to provide suitable space for solid waste separation, collection, and storage and shall provide sites for such that are located so as to facilitate collection and minimize any negative impact on persons occupying the development site, neighboring properties, or public rights-of-way.
  3. Lighting. Lighting within any lot that unnecessarily illuminates any other lot and/or substantially interferes with the use or enjoyment of such other lot is prohibited. Lighting unnecessarily illuminates another lot if (i) it clearly exceeds the minimum illumination necessary to provide for security of property and the safety of persons using such roads, driveways, sidewalks, parking lots, and other common areas and facilities or (ii) if the illumination could reasonably be achieved in a manner that would not substantially interfere with the use or enjoyment of neighboring properties.
  4. Air pollution. Any use that emits any "air contaminant" as defined by the Bay Area air quality management district shall comply with applicable state standards concerning air pollution.
  5. Maintenance of common areas, improvements, and facilities. Maintenance of all common areas, improvements, or facilities required by this chapter or any permit issued in accordance with its provisions shall be required except those areas, improvements, or facilities with respect to which an offer of dedication to the public has been accepted by the appropriate public authority.
  6. Odors. No use may generate any odor that may be found reasonably objectionable as determined by an appropriate agency such as the Santa Clara County health department and the Bay Area air quality management district beyond the boundary occupied by the enterprise generating the odor.
  7. Noise. No person shall operate, or cause to be operated, any source of sound at any location within the city or allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person, which causes the noise level when measured on any other property either incorporated or unincorporated, to exceed standards as set forth in Chapter 6.16 of the Los Altos Municipal Code.
- C. In order to attenuate noise associated with commercial development, walls up to twelve (12) feet in height shall be required at a commercial/residential interface. Other conditions may be applied such as, but not limited to, muffling of exterior air conditioning facilities.
