9	CD-01024	General Plan	Studies	The General Plan is the vision about how a community will grow, reflecting priorities and values while shaping the future. The City of Los Altos General Plan was last updated in 2002. Countless State laws have been established which necessitates a comprehensive overhaul of the exististing adopted plan. Most recently the City adopted its 6th Cycle Housing Element to comply with State Housing law. Upon adoption of a City's 6th Cycle Housing Element, the jurisdiction must update its Safety Element. When a jurisdiction is required to update two or more required elements of the General Plan it necessitates the creation of an additional required element, the Environmental Justice Element. Additionally, the City in 2022 adopted both its Climate Acition & Adaptaton Plan (CAAP) and it Complete Streets Master Plan (CSMP) both of which provide direction on how the City should continue to grow and develop well into the future. However, it is important for the City of Los Altos to integrate policies and the overall vision of both documents into the General Plan as it is the highest level regulatory land use document within the City. Cleaning and inspecting sewer lines is essential to maintaining a properly functioning system. These activities further a community's reinvestment into its wastewater infrastructure. Inspection programs are required to determine current sewer conditions and to aid in planning a maintenance or rehabilitation strategy. Closed-circuit television (CCTV) inspections are the most frequently used, most cost efficient, and most effective method to inspect the internal condition of a sewer. The 2013 Sanitary Sewer Master Plan Update recommends full video inspection of the sanitary sewer system every 5 years. Current system CCTV data was last collected between 2021 and 2023. 49	TS-01006	Annual Traffic Sign Replacement	Transportation-Pedestrian/Bicycle Safety	There are approximately 8,000 standard roadway traffic signs throughout the City including street name signs. After time, the signs lose its reflectivity and makes it difficult for the public to see, especially at night. The Traffic Sign Replacement project provides funds to inventory and maintain and replace these signs. This project will also improve signage per the City's Complete Streets Master Plan, where appropriate, to improve safe access for bicycles and pedestrians and safer routes to schools. When appropriate, for economies of scale, this project may be integrated with the annual street resurfacing contract.	RMAA	\$ -	\$ 50,000	\$ 300,000	\$ 300,000	\$ 300,000	\$ 300,000	\$ 1,250,000

This project will replace the 14 failed in-pavement crosswalk lights and adjacent signs with state of the art Rectangular Rapid Flash Beacon systems (RRFBs) and include the installation of RRFBs at four crosswalks that do not have the in-pavement lights. 51	TS-01058	Intersection Access Barrier Removal	Transportation-Pedestrian/Bicycle Safety	The Hetch Hetchy pathway is a multi-use bike and pedestrian trail within the San Francisco Public Utilities Commission (SFPUC) right-of-way, connecting the City to Palo Alto via Arastradero Road. It also serves maintenance access for SFPUC and City staff. The City will reconstruct the existing crossings at Estrellita Way and Los Altos Avenue to meet current ADA standards and improve connectivity.	CIP	\$ 129,734	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 129,734
52	TS-01062	San Antonio Road Complete Street Project	Transportation-Pedestrian/Bicycle Safety	This project would employ best practice street design principles to create designated space for each mode of transporation, separating pedestrians and cyclists from motor vehicle traffic, and reducing conflicts between vulnerable road users and vehicles. This improvement project would facilitate a safer experience for these vulnerable roadway users and would provide a connection where a gap currently exists.
