Walls up to twelve (12) feet in height shall be required for the purpose of attenuating noise, odor, air pollution, artificial light, mitigation for grade differential between properties, and providing privacy and safety.
 2. Access and screening of refuse collection. Every development will be required to provide suitable space on-site for solid waste separation, collection, storage, and pick up and shall site these in locations that facilitate access, collection, and minimize any negative impact on persons occupying the development site, neighboring properties, or public rights-of-way.

All mechanical, venting, and/or exhausting equipment that generates odors shall be located away from residential properties.
 7. Noise. No person shall operate, or cause to be operated, any source of sound at any location within the city or allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person, which causes the noise level, when measured on any other property, either incorporated or unincorporated, to exceed standards as set forth in Chapter 6.16 of the Los Altos Municipal Code. All mechanical, venting, and/or exhausting equipment that generates noise shall be located away from residential properties. Exterior heating, venting, and air-conditioning facilities shall be muffled.

In order to attenuate noise associated with commercial development, walls up to twelve (12) feet in height shall be required at a commercial or residential interface.
