Re: 1800 Alford Ave., Los Altos

Response to comments by DRC

The following revisions have been implemented:

- Garage door style: the garage door has been redesigned to increase the solid area and to incorporate a glazed portion that matches the style of the windows.
- Eave overhangs at the garage have been modified to match the 12" overhang at the rest of the house, with the crown molding showing a return at the front for continuity.
- Enhance the presence of the front entrance: the entrance porch has been modified to protrude beyond the stair element. The roof overhang across the front of the stair wall has been removed and the stone finish has been raised. The lower window has been eliminated and the upper window is now taller.

We hope these modifications will meet the intent of the committee.

Thank you,

Cornelia Haber
