

# Electrification Working Pair Update

LOS ALTOS ENVIRONMENTAL COMMISSION  
March 12, 2024

# Proposed Electrification Working Group Suggested Goals

---

*Develop recommendations to support and accelerate building electrification in Los Altos through policy, incentives, community engagement, and the Los Altos the Climate Action and Adaptation Plan (CAAP).*

- **Policy** – Research and propose electrification ordinances and guidelines for new construction and major remodels, evaluating options such as REACH Codes, NOx ordinances and building incentives.
- **Incentives** – Identify and recommend city-sponsored and third-party incentives that encourage the electrification of new and existing homes (monetary and non-monetary).
- **Community Engagement** – Expand education on electrification benefits and available incentives through public engagement, workshops, and collaboration with local organizations.
- **Climate Action and Adaptation Plan** – Work with city staff and sustainability partners to ensure effective notification and execution of electrification initiatives, aligning with evolving state, county, SVCE, BAAQMD programs and efforts.
