Title of Art Piece Vortex

Brief Description

Vortex is my homage to one of my favorite shapes in nature, the spiral. Although I use spirals in lots of my sculptures, this one is probably my purest version. I wanted it to look very plant like, as if it were growing out of the ground. My goal is to fool the viewer into thinking that they are looking at some strange plant or animal and not at a steel sculpture, at least for a moment. I like to use corten steel because the patina seems almost like an organic material.

Sorry but I didn't have a better shot of the right side. Also the photo from the back is from when I first installed it at it's current location and the patina hadn't formed yet. You can't really see the base of the sculpture all the way either but if you need me to I can send you some shots from when I was building it. Thank you.

Art Piece Value \$10,000

Medium (including finishes) Corten Steel with mild steel structure underneath.

Artwork Measurements (Height) 8.4

Artwork Measurements (Width) 5.6

Artwork Measurements (Depth) 3.2

Artwork Total Weight 300

How did you hear about "Art Without Walls"

I think that I was just scouting around online looking for public art projects. I may have seen it on cafe listings but I forget.

Title of Art Piece Pegasus

Brief Description

This is a sculpture of Pegasus, with LED lights that shine through the transparent "wings" (Wings are transparent plexiglass, painted with a wing pattern) The LED lights are addressable, but can also be outfitted with a timer (to go on after dark.) These LED lights need an outlet. The Pegasus is made of clay and acrylic, and coated with a clear coat. The surface of the Pegasus had faux marble patterns. The sculpture is basically weather resistant and tamper resistant.

Art Piece Value \$5,000.00

Medium (including finishes) Clay, Acrylic Paint, Epoxy, Resin, LED lights (addressable)

Artwork Measurements (Height) 2

Artwork Measurements (Width) 1

Artwork Measurements (Depth) 10

Artwork Total Weight 20

Mary Angers

Custom Answers

Please provide a brief biography.

Mary C. Angers, multidisciplinary artist, was born in Manhattan on July 22, 1958. She has resided in Long Branch New Jersey for the past 20 years, working in two and three-dimensional media as well as video, television, light and computer generated work. She has shown extensively in Manhattan, New Jersey, France, California, Florida and other states around the United States, as well as doing public artwork around the United States, Canada, and abroad.

Working in a variety of media and themes she has created public artwork in laminated glass, metalworking, aluminum and metal and iron sculpture, paintings, animated and computer generated video and film work and also projections and light work. She has also created work in etched granite, aluminum as well as laser cut metalworks.

Her themes are self-created, but also inherent to the sites she works on. The themes include historical timescapes, biological, natural, cellular and otherwise scientific and Earth and body related. Her work is ecologically related to the rhythms and cycles of life and experimenting with coordinate and orthogonal space, and always related to a highly contemporary and technological view of all of the aforementioned.

In the end she tries to focus on an energy and in inceptional moments with an eye towards beauty sometimes gone unnoticed in her areas of interest.

Please provide installation guidelines for your artwork, if any.

Its just a simple hammer head drill thru the holes in base of the piece.

Please provide a brief biography.

I build metal sculptures that capture forms, gestures, and emotions in concise aerial calligraphy.

I focus on public art as a way of fostering connections between individuals and also between people and something larger than themselves. In my work, "something larger" often includes the natural world. I've been specializing in public art since 2008. Before that I was an architect. Skills I developed as an architect -- communication, collaboration, project management -- are invaluable in my public art practice.

I'm interested in the ways things are made and value craftsmanship highly. My metal fabrication background underlies all aspects of my work. My sculptures reward inspection and repeat viewings because of clever construction and attention to detail. I fabricate my own sculptures and am always learning about tools and materials to expand my skill set. I apply my experience to create durable, elegant artworks for demanding environments. The little boy in me is still fascinated with noisy machines that give off sparks.

Please provide installation guidelines for your artwork, if any.

Cerberus has a 12" x 24" base with 6 holes for anchoring it to a concrete slab or other level surface. The piece weighs less than 100 lbs and can be handled and installed without special equipment.

Art Detail

Category

Statement

Cerberus portrays the 3-headed dog from Greek mythology. I gave him a casual, nonchalant pose so that his devious, snaky nature (captured in twisting pipes) isn't the first thing you perceive. Can you tell that I like dogs?

Like many of my pieces, Cerberus captures gesture, form, and emotion with concise aerial calligraphy. Simple shapes convey a complex character that resolves as viewers move past and see the piece from different perspectives, creating 'aha' moments of discovery.

Cerberus is a pipefitting tour-de-force that rewards a second look because of clever construction and technical mastery. I like to leave welds exposed rather than grinding them off smooth so the viewer's experience includes figuring out how the piece was put together. The powder-coat finish is tough enough to withstand touching and interaction with curious viewers.

Cerberus casts fascinating shadows like heiroglyphs that change as the sun crosses the sky.

My first landmark monumental sculpture was completed in 1975 I now have a total of 37monumental sculptures and public artworks in 7 states: California, Nevada, Colorado, Texas, Montana, Missouri and Wyoming. The budget for these projects ranged from \$6,000 to \$270,000. All my public art projects have been under budget, on schedule and meet insurance requirements.

Please provide installation guidelines for your artwork, if any.

A small crane will be needed to set the sculpture on a 6' x 6' concrete pad. Artist will provide approved concrete anchors, drilling tools and power if necessary for installation.

Art Detail

Category

Statement

My style of sculpture is based upon using focal points. These designs give the impression of abstract compositions until they are viewed from one specific location called the focal point. Then an illusion of any image can be produced of a word, symbol or an illustration. These sculpture compositions vary from simple designs to complex configurations with multiple focal point images. The image complexity controls the basic structure of form and inspires the variety of abstraction.

This sculpture is titled "Dancing Lone Star" which forms into the image of a five-point star from one direction called a "focal point". From other directions the geometric planes appear to float on a curved armature resulting in a dance movement frozen in time.

It is 11 feet 8 inches high by 4 foot 4 inches wide by 7 foot 3 inches deep. The star shapes are fabricated with $\frac{1}{2}$ inch aluminum plate. The column is aluminum rolled 5" pipe (schedule = 80 $\frac{1}{2}$ " thick) welded on a one-inchthick aluminum base plate. The weight is just less than 300 pounds.

The image complexity controls the basic structure of form but it also inspires the variety of abstraction.

As viewers travel around this sculpture they see one single flowing abstract line that portrays turbulent clouds forming into the shape of a cyclone. When viewed from one direction, called the "focal point", the shapes flow into the Japanese character "Amanohara" which translates into English as "The Sky".

Japanese character writings are a beautiful art form and have inspired many designs in my style of sculpture. The simplicity of the character amanohara was easy to manipulate into the visual illustration of the meaning of the word.

The dimensions are 101 inches high by 25 inches wide by 35 inches deep. Its weight is approximately 180 pounds.

Statement

My main style of sculpture is based upon using focal points as my previous 3 entries displayed. My secondary style of sculpture is a tribute to my career as a firefighter and honors this service with memorial designs. "Tolling of the Bell" is one of these memorial designs.

Long before the Internet was invented, or telephones and radios were used across our great nation, fire departments used the telegraph to communicate. They used special codes to receive fire alarms from those once familiar red fire alarm boxes which stood on practically every street corner of America. The resonating echo sounded the locations of thousands of emergencies throughout the history of our growing country. It was heard by all station houses in the vicinity and outside on the streets.

When a firefighter was killed, or in the language of the military and public safety: "fell", in the line of duty, the fire alarm office would tap out a special signal. This came to be called the "Tolling of the Bell" and was broadcast over the telegraph fire alarm circuits.

This was done for the purpose of notification, and as a sign of honor and respect for all firefighters who had made the ultimate sacrifice in service to their communities. Such symbolism is a time-honored fire service tradition and is repeated at each service of a fallen firefighter by The Honor Guard. This sculpture honors my history as a firefighter and is available in bronze or aluminum.

Please provide a brief biography.

Faducci was developed in 2002 by the combined exploration of artists Solomon Bassoff and Domenica Mottarella. Their whimsical emotive sculptures have received enthusiastic acclaim and have been acquired for both public art installations and private collections. Their creative interests are sparked by nature and constantly influenced by the wildlife that surrounds their home in the Sierra foothills. They are experienced at creating artwork that celebrates the natural environment, while delighting and inspiring the viewer. They have accomplished this goal with public art installations at the Woodland Park Zoo in Seattle, WA; Redding, CA; Natomas, CA; the Northwest Library in Oklahoma City; and again and most recently in Sunnyvale, California. The work illustrates their diversity of theme and skill in creating large public sculptures. In addition to large public art projects Faducci sculptures are held in high esteem in private collections across the country.

Please provide installation guidelines for your artwork, if any.

The sculpture has steel tabs that allow it to be bolted to a concrete pad.

Statement

We have created sculpture for zoos, parks, schools, hospitals and communities throughout United States. Our sculpture with its whimsical nature is particularly endearing to the young and young at heart. Our sculptures are uniquely designed with the highest quality materials; primarily hand sculpted cement and applied Italian glass mosaic. We use additional additives in the cement that protect against weather, and in the event of graffiti, assist in its removal. All sculptures are designed for simple maintenance, public safety, longevity and enjoyment. Our submission is of a giant sea turtle sculpted with a steel armature, hand sculpted and pigmented concrete and iridescent glass mosaic. It is designed to be outdoors and can be climbed on and touched with abandonment. Dimensions:14" x 48" x 48".

We would appreciate the opportunity to touch the hearts of all who will visit or live in your community by exhibiting sculpture that will delight the imagination, enliven the heart and evoke the spirit of your community.

Statement Joseph Castle statement

Intimate Stranger embodies the tension of opposites. This series is a progression of sculptures that examined my private world and initiated A visit to Walter Reed Hospital. There I saw our veterans task themselves as they came to terms with their disabilities.

The result was to look inward and reflect on my fear of being intimate with myself. Unpleasant and unfamiliar with this world, I pursued it with reluctance. I found an unplanned admission to the emotions I anxiously repressed in these waters. The work provided me with an inner sanctuary.

I created a space that provides a refuge for the sensitivity of the soul. Here, what is personal becomes universal, and the viewer is moved past language to participate indirectly and emotionally. The viewers' role is to interpret and finish the work for themselves.

Please provide a brief biography.

I'm a sculptor, painter, and printmaker currently based in Portland, Oregon. My work is reflective of my interest in finding a compelling interaction between shapes and colors by taking them out of their normal context and creating new compositions that strike a balance between differing components. It is my intention that the finished work conveys how individual elements can both fit together and exist as separate units.

In addition to being shown in both solo and group exhibitions throughout the United States, my work may be found in many corporate, public, and private collections. Among the public collections are international hotels including the Grand Hyatt in Tokyo, Japan and the Amber Bay Resort in Dalian, China.

I'm also the recipient of a Pollock-Krasner Grant in 2010 and a United States Artists Grant in 2011.

Please provide installation guidelines for your artwork, if any.

BUBBLES is built with 4 tabs on the inside of the base, one on each of the bottom four planes (set at 90 degree angles from each other). A stainless steel all-thread is screwed into and extends into the concrete pad. Using a template, I drill holes into the concrete pad to accept the all-thread. I place the sculpture by positioning it above the pad, then lower it onto the pad to ensure the all-thread aligns with the holes in the concrete. At this point the sculpture is raised up high enough to allow the holes to be filled with quick setting epoxy. The sculpture is then lowered to the pad with the all-thread going into the epoxy filled holes.

Statement

My work uses both organic and manufactured materials such as wood, clay, metal and plastic. While I employ a variety of materials and processes in each project, my methodology is consistent. There may not always be material similarities between the different projects, but they are linked by recurring formal concerns. I am primarily interested in taking familiar geometric shapes out of their normal context and creating new forms that employ a balance between natural and urban elements. I will construct and deconstruct as many times as necessary to find the composition that I believe best conveys how individual components can both fit together and exist as separate forms simultaneously.

Statement

I choose materials that best communicate a concept or an experience that is personal to me. When working in clay, I use hand building as well as wheel throwing techniques. I might choose the seductive plasticity of porcelain with its vitreous translucency or the earthy grounded weight of a grogged stoneware. The materials take form in a visual language and become multiples in installations, or pieces in a series based on a concept.

Statement

I have been working with recycled plastic as a material for art making. I am interested in the past and future lives of this material, and creating designs, which are aware of the full lifecycle of plastics. My project: Shanty Brick, is a set of modular building blocks, which are cast from post-consumer plastic. I am using these blocks to build geometric forms. I want to inspire people to think about problems like waste, with fun solution-based mindsets. Shanty Brick aims to replace the mentality of planned obsolescence with a more considered worldview, which includes the lifespan of material beyond the object. I hope to inspire design that is focused on versatile, functional, and reconstructable forms with a considered afterlife for the utilized materials.

Statement

In any space or on any canvas, I try to represent the people, things, and places around me in a colorful, bright, and vibrant way. I would classify my work as contemporary, as I am heavily influenced by the 20th and 21st century contemporary art greats including, KAWS, Takashi Murakami, Jean-Michel Basquiat, to name a few. The use of color in ways some may shy away from draws me in. I have a background in traditional canvas portraits, as well as graphic design, and animation. In the last 2 years, I've been fortunate enough to be able to create large scale pieces for public schools, and government buildings. My main goal is to not only beautify, but also to unify and connect people to the spaces I'm working in. Creating spaces where anyone whether they are native to the location or not, will feel welcomed, included, and seen. If chosen, I will make sure that the art will engage the community in the best way while also creating a space that people from other communities will WANT to be a part of. My approach to the design will be abstract including bright colors and loose movement throughout the piece. I will work to create something that is inviting and exciting. The work will not only add on to the vibrance of the space today but will have the same effect over time.

Please provide a brief biography.

I have been sculpting for over 32 plus yrs.professionally creating public art & sculptures in 3 continents and & several countries like the United States, China, Thailand & India to name a few. I create in 3-D & believe in bringing Art outside the white walls, into public spaces creating a sense of community pride. My sculptures can be best described as Figurative, stylistic representation of moments in life, a zeitgeist of my surroundings. I like sculpting groups of people and create interesting compositions, groups of clowns, women or children, I am looking for the right posture, the natural stance, the proper spacing the perfect tension, the right balance of design & chemistry,to make the work visually compelling. Art brings beauty into our world. Art allows us to appreciate different periods in history and their impact and significance in our world. Public art makes communities more beautiful & serene places of healing. It brings a unique value & character to our surroundings. It is the result of the community's desires and goals of Immortalizing places, time and events for the people.

'Chat' a bronze sculpture of a group of 3 women recline at ease in dresses of blue, green and pale burgundy. They are of an indeterminate age but clearly enjoying their time together. It is a piece full of joy, amply portraying the pleasure of shared companionship and conversation. The inspiration comes from the therapeutic bonding felt by women when they get together to talk about life. It was something I grew up with, an ingrained part of any culture. I love creating in 3-Dimension and believe in bringing Art outside the white walls and into public spaces creating a sense of community pride. Just like a house is transformed into a home with art, a Space is transformed into a Place with a place-maker sculpture. Public art placemaking is the art of creating memorable experiences that are potentially transformative. My sculptures can be best described as figurative; stylistic representation of moments in life, a zeitgeist of my surroundings. My emphasis is on composition, Art is a transformative journey that engages the viewer and the creator.

Homage is a figurative concept in which the body is made up of recognizable elements of the California landscape. It has been often observed that the velvet California hills resemble bodies - long curving legs, hips and shoulders - and I have enlarged upon that shared perception, creating works depicting the complete figure. The two small houses give Homage its sense of scale. My figurescape series began with a 2012 artist residency in San Jose, inspired by my daily drive to the studio. It has remained an ongoing theme.

Statement

As a Pacific Northwest artist, I love the deep connection to nature that lives in the heart of west coast culture. My sculptures and paintings celebrate this connection.

My work is light-filled and radiant. Inspired by color, I saturate the field with many layers of acrylic paint. I use a visual language that is inherently inclusive, as the experience of nature crosses cultural, economic and social divisions.

Made from wood, my pieces are always constructed and finished to be enduring. I build my work to be durable, points of connection are engineered to disappear. I focus on a clean simplicity with sharpened intention and a demand for balance. Material choices, composition and color are given equal weight. My work is appropriate for all ages.

I am submitting images of Seasonal Rotation on display in Palm Desert, CA. This piece is constructed from 2 sheets of 5ft x 2.5, 1.5 inch thick interlocking plywood. All pieces are painted in their entirety with outdoor grade acrylic primer, acrylic paint and finished with TSW anti-graffiti outdoor grade sealer. The piece has more than 7 layers of finish to protect it from weather. The interlocking plywood pieces create four corners which each contain a three dimensional, quartered tree trunk. The trunk is bolted and plugged and securely locked in the wood X shape. The trunk is painted seamlessly transitions slightly below the base of the X to create a single outstretched tree simultaneously displaying characteristics of all of the 4 seasons accompanied by 4 phases of the moon. Installation is straightforward, with 4 bolts that secure a steel plate, to the provided sculpture base.

The viewer is able stand in place and rotate through the seasons. This piece is a color-rich, interactive discovery that is at once be both unique and familiar.

Kaleema Lewis

Custom Answers

Please provide a brief biography.

Kaleema Lewis is a self-taught visual artist from Jersey City, New Jersey who has been drawing and sketching since about 8 years of age. However, her painting journey started in 2015 when someone purchased a painting she randomly posted on social media. Since then, she has been inspired to create and sell new art pieces at popup shop in Newark, where she managed to raise enough money to pay for half of her tuition for medical school. She currently holds an undergraduate degree in Biology and a Master degree in Public Health. Creating art has been internally driven as she has never received any formal training in drawing/painting. She considers her ability to create art as a purposeful gift that has been given to her by God.

Anthony Heinz May

Custom Answers

Please provide a brief biography.

My installations of sculpture are on exhibition in various urban, rural and natural environments across North America. For over the past decade I have traveled across the country creating public sculptures of art that can be seen in various states of decay and degradation. I recently relocated back to the west coast of my native state Oregon to pursue a stronger foothold in my artistic investigations. Having developed myself as an emergent NYC artist, I still spend part of my time in the city and part in travel for my art. Much to my delight, the studio I work out of is wherever my work leads me to be.

Please provide installation guidelines for your artwork, if any.

As shown in attached example "Ashen", part of the tree trunk is buried underground to appear as if growing onsite naturally. When my sculptures are installed in ground, I bury ~3ft of the tree material by digging a hole and tamping earth around it, leaving ~5ft above ground, and then reconstructing the sculpture on site. The installation takes one day to complete. My public sculpture has been installed to appear as if naturally growing in grassy areas, rock courtyards (as seen in example), and/or in some occasions atop concrete pavers and steel plates as necessary. Whenever possible, I encourage the work to be buried in an underground fashion, so that the sculpture appears to have originally grown there, extending concepts and ideas inherent in my creations.

Reconstruction of the sculpture uses rebar embedded in tree trunk with each cube of material carefully ordered in its original growth, slid onto the rebar through a hole that is bored out of its center. My tested true methodology has allowed my work to be exhibited in numerous sites across North America and in extremely harsh environments. The work is allowed to naturally patina over time and is not sealed so as to emphasize the natural cycles and processes governing all life on Earth. There is little to no upkeep of the work (aside from acts of vandalism that affect all public art) and my sculptures are reclaimed by nature to once again become a place for insects, birds and other small animals.

Art Detail

Category

Statement

The creations of art I develop highlight relationships between nature, humans and technology. Each work uses dead/dying tree waste located within communities of where they are installed in. The public artwork is an offset of natural and human-built surroundings where they are exhibited. Every sculpture is different and unique however follows a specific tested-true methodology in construction. The example submitted here to "Art Without Walls" is what I propose recreating specifically for the location and site of exhibit.

My work overlaps the artificial and the real much like technology does in its re-creation of physical/tangible objects, through pixels of light and information as seen on screens. In the physical gridding of locally found natural material the tree waste is turned into a sculpture that appears as if dissolving from its natural base in pixelated, digital drifting. Upon acceptance in various open calls such as the Art Without Walls in Los Altos, I travel to the city/region and locate dead/dying tree material through parks services or other community entities, wherein I take the material and prepare my sculpture for exhibit offsite.

I am a traveling artist using found natural material in local ecosystems to facilitate dialogue about how trees in communities are threatened by changing environmental conditions including invasive insects, tree disease, increasing harsh weather patterns and other issues. I encourage local/communal/regional eco-pedagogy through art and aim to inform my audience of how nature and trees are a reflection of the collective human dilemma; where the artificial has become more important than the natural and real.

Please provide a brief biography.

I am currently the only sculptor to have studied under the Queens sculptor Alexander Stoddart and thus my working standards are at the highest level. Under his direction I have worked on multiple Million dollar plus projects being involved at all stages of the project. My own work has started to reach and even surpassed the same point in terms of scale and budget. I have also been expanding my reach abroad doing both private and public commissions in the United States and more broadly across europe. MY most recent large scale project was a private fountain for a residence in Ukraine worth £2.2m . I have studied sculpture in Scotland and toured Europe studying all the best works from the continent. I have also worked with some of the top architects and galleries from all around the world but prefer large scale civic work.

Prayer Booth Installation

150 lbs 110"x21"x36" Aluminum, Plexiglass, Foam Insurance Value: \$7,000 Price: \$7,000

Installation: Four bolts into concrete.

Art Detail

Category

Statement

This piece plays on the format of the traditional public phone booth, but adds a spiritual element. It functions as a normal booth with a private enclosure, but adds a flip down kneeler for prayer. Inside the enclosure is an instruction manual simply guiding the viewer to use the piece to pray if they so desire.

There is no literal affiliation with any particular faith per se, rather the piece aims to question the idea of prayer in the public itself. The piece fuses humor, sarcasm, and sincerity, and has produced a myriad of reactions from sincere use, humorous use, offense, praise, etc. It aims to highlight and spark further debate about the contemporary difficulty of religion within the public community.

Much of my work explores how private faith functions in the public sphere. It investigates the role of private faith outside of the self. I aim to explore the boundaries of faith by blurring the lines where public expression is permitted and prohibited. My challenges lie in what it means to carry an individual belief into a world where everyone believes different things.

Statement

I am a 22-year-old free-lance artist with a studio arts degree from Santa Clara University, with emphasis in sculpture and painting. My aesthetic works within the style of a retro-maximalism in the subculture of surrealism. In painting, I often utilize bright contrasting colors and backgrounds, with overarching images or focuses that imply a certain level of dissonance. My sculptures have mostly been welded and sewn displays of enlarged inanimate objects that are representative of social injustices and inequalities. Metalwork, in this sense, is resonant line work - this is met with a nearly incongruous use of sewn fabric, to create different planes and to evoke a sense of multi-dimensionality. The difference in these mediums serve a level of juxtaposition that is also translatable to the innocence of the inanimate objects, and the misdeeds that are symbolized by them.

Jen Pleasants

Custom Answers

Please provide a brief biography.

Jen Pleasants is a California based sculptor and designer. Founder of showtheLOVE inspirational jewelry, she sculpts everything from tiny pieces to larger than life creations. Her work is focused on social justice and environmental causes. She hopes her pieces reflect the beauty of humanity back to itself and in turn raise the planet's vibration. Some of her work is currently on display in a public space in Atherton, CA.

Please provide installation guidelines for your artwork, if any.

THE ACTIVIST can either be mounted with our without concern for the elements. If you choose to insert the flat screen TV that goes with it, you can slide it in the frame an add any content one wishes to the screen (or the artist is happy to provide content). The electric cord slides flawlessly through the hand through the body and out the base. This option is meant for a covered or indoor area that is more or less secure from vandals. The other option is to not insert the screen and then she can go anywhere that has a flat base. Ideally a concrete/asphalt service. I can have a forklift delivered and install her.

Art Detail

Category

Statement

THE ACTIVIST is an 11 foot bronze sculpture of a teenage protestor, holding an interactive protest sign. Inspired by the passion of student protestors like the Parkland Victims', Emma Gonzales, the Climate Movements', Greta Thunberg, and the artist's own teenage daughter, Josie Pleasants and her involvement in Women Rights and Black Lives Matter protests, THE ACTIVIST reflects our youths' longing for justice. The beauty of young people is that they truly believe they can change the world. THE ACTIVIST is a reminder of our own power whether we are young or old, to create change as Margaret Mead said, "Never doubt that a small group of thoughtful, committed, organized citizens can change the world; indeed, it's the only thing that ever has." THE ACTIVIST communicates the power of the protest. The power of standing up and using your voice to bring about change. She inspires people to speak up for what they believe in and to work to facilitate justice.

THE ACTIVIST is dressed in a modern hoodie printed with I AM THAT GIRL, an organization started by Alexis Jones, to encourage girls to speak their truth!

(https://www.today.com/style/i-am-girl-organization-empowers-girls-young-women-t23671 https://www.alexisjones.com/the-book

https://logpledge.org/i-am-that-girl/)

In the pocket of the hoodie is a mobile phone with a case that reads TREAT PEOPLE WITH KINDNESS a nod to pop icon Harry Styles https://www.cnn.com/2021/01/02/entertainment/harry-styles-treat-people-with-kindness-trnd/index.html and to the one of Pleasants' favorite quotes "The three most important things in life are 1. Kindness, 2. Kindness 3. Kindness."

On THE ACTIVIST'S finger is a ring that says SHE BELIEVED SHE COULD SO SHE DID. Similar rings made by the artist can be purchased here https://showthelove.com/.

She wears NIKE Air Force One's on her feet. A trendy shoe by activist brand Nike that recently has been actively standing up for social justice.

THE ACTIVIST is unique as she is one of a relatively few number of women sculptures and even fewer bronzes depicting our current times.

https://www.nationalgeographic.com/history/article/who-do-american-monuments-honor-the-most-a-landmark-study-finally-has-answers

In New York's Central Park there are dozens of statues of men and there were only three sculptures of women (and they are of fictional characters!)-that is until the latest suffragist bronze was installed this past year. https://www.nytimes.com/2020/08/06/arts/design/suffragist-19th-amendment-central-park.html. Bronzes of women are

For all these reasons and many more, I will adore you for the rest of my life!

Hopelessly smitten, Kirk

The Feather is my debut sculpture design, after spending four years designing themed climbing walls in the active family entertainment industry for a company called ClimbZone, and almost twenty years painting public and private murals for my own business, BB Murals.

It is a direct response to the years of representational work I've been doing. I wanted to create something that was not based in reality, had no reference point and seemed to come from a different planet. Something unique. Something that came from inside. Art for art sake.

The Feather, as I've been calling it for short, is wildly popular and consequently has been selected for temporary and permanent exhibits in 31 states since it's debut in early 2019.

Magnify:

This interactive, kinetic sculpture acts as a giant magnifying glass, except sunbeams pour through the colored lens as the viewer swivels the rings into position to catch the light, casting a stained glass reflection on the ground, or anything else it hits.

Made from Plasma cut 1/4" steel plate and a 1/2" thick piece of circular, clear acrylic with designs directly printed on using a large format flatbed printer, this piece is sturdy and meant to be enjoyed outdoors by the general public.

The entire sculpture can be secured to a concrete pad using a welded base plate, or embedded in the ground using as concrete footer.

Magnify instantly becomes an education tool as it demonstrates the concepts of transparency, light reflection and refraction, even the physics of mobility with it's rotating top.

It immediately draws the viewers attention begging to be touched and handled. A strong addition to any temporary or permanent sculpture collection!

Wings:

This kinetic sculpture is reminiscent of plane or falcon wings, symbolizing upward momentum as they point to the sky.

A plea for growth, freedom, evolution, and a chance to travel beyond the terrestrial into the unkown.

As the wind hits these almost 4 foot wide panels, they move and rotate with it, not against it, thus assuring their stability. This action is achieved by a hidden set of pin thrust bearings inside the round post which the wings sit upon.

Due to it's 12 foot stature, Wings can be seen from afar and makes a bold impression up close as well.

Choose from a variety of styles and design when selecting your own Wings sculpture. A fine and unique addition to any sculpture exhibition!

Tree Branches is another adaptation of the Feather design, although more complex as I stray from the singular post and add "branches" sprouting from a main "trunk".

In keeping with the Feather panel style, I use geometric shapes lined in black, with fields of swirling and fading colors inside. These colors repeat themselves in a kaleidoscope fashion, emanating from the center of each panel, and are symmetrical. They have a strong tie-dye or wax batik look. A very organic and psychedelic feel, warm and inviting.

Similar to the Feather, the Tree Branches sculpture can either be anchor bolted to a concrete pad by it's base plate, or can stand enbedded in the ground using a concrete footer. Whichever method we choose, it is bound to be a source of interest and curiosity!

So far, there are several versions of Tree Branches "out in the wild", in Alamosa, CO, Georgetown, TX, St. Charles, IL, St Joseph, MO and Dexter, MI.

Rachel Slick

Custom Answers

Please provide a brief biography.

Born and raised in San Diego CA, Rachel Slick's formative years were surrounded by artists, musicians, archangels and abuelitas, who all inspired her to follow the creative's path.

She studied art at City College in San Diego CA, at Santa Cruz University, and Gerrit Rietveld Art Academie in Amsterdam. Rachel has worked in the field of public art for over 22 years, and has permanent installations in California, Utah, Colorado, New Mexico, Arizona, Ohio, Pennsylvania, and New York.

A true child of the melting pot, Rachel's ancestors and art influences can be traced to both the old and new worlds. Her art is inspired by mythic events of childhood, Archetypes, and the creation of Story. She explores how archetypes can remain timeless but be reborn to relate to a modern world.

Disabled since 1982, Rachel experiences near constant pain and migraines.

The challenges of building a career as an artist and of parenting while disabled is an element she explores in the theme of her work. Making physical art is an attempt to ground her spirit in a dysfunctional body.

Rachel currently lives and works in a 90 year old adobe casita in Tucson AZ with her family.

Please provide installation guidelines for your artwork, if any.

Each of sculpture's 4 feet are equipped with heavy duty steel bolting equipment. These can be secured to a concrete pad

Inspired by the migration of Butterflies across Western States, this contemporary sculpture made with ultra tough powdercoated metal anodized and stainless steel is reminiscent of the power transformers that march across the open prairies. The sculpture is both an homage to the wild butterflies of the West, and a call to action to protect the declining population of pollinators in the US.

Rachel Slick

Custom Answers

Please provide a brief biography.

Born in Ocean Beach CA in the early 70's, a childhood of artists, archangels, musicians and abuelitas offered Rachel a clear path of lifelong creativity.

An artist living with neurological disability since childhood, Rachel's life has been one of challenges. The work she has accomplished demonstrates that a life with limitations is both possible and beautiful.

As a person with heritage from both the Old World and the New, Rachel's artwork reflects many aspects of her blended cultural experience. Much of her sculptural forms are an exploration of ancient culture and story, brought into the modern age with strong form and vivid color.

A multimedia artist, her work ranges from studio paintings and ceramics to outdoor metal sculptures to large scale public art.

Please provide installation guidelines for your artwork, if any.

Installation is quite simple, the base of the sculpture has a welded steel plate that provides connection points for steel bolts. I will coordinate with the installation team with further details should the work be selected.

Statement

Being born and raised in San Diego California native I feel a closeness to the fragile flora and fauna that is so very loved in California it has almost been loved to death. I welcome an opportunity to develop works of art that reflect cherishing area wildlife and resources, as well as welcoming visitors and locals who wish to do the same. "Compass Turtle; The Five Directions" explores the role of ancient archetypes and ideas to provide modern people of all backgrounds with direction. The important message is that there are not, as most people believe, four directions. There are 5, the 5th being Center. And each individual is at all times in the center of their world. How does this affect what direction we choose to go, or how we place ourselves in both the physical and spiritual world?

Inspired by Mythic stories of childhood, Archetypes, and the creation of Story, Compass Turtle explores how archetypes can remain timeless but relate to a modern world.

Please provide a brief biography.

ADRIAN LITMAN Art & Design 4284 Deer Trail rd. Santa Rosa, CA 95404 510.386.7859 adrian.artistic@gmail.com www.adrian-susnea-litman.com

I started to learn about art at a very early age, playing with colors and art materials in my father's Art Design and Restoration studio.

In 1964, I was accepted into the Fine Arts High School N. Tonitza in Bucharest, Romania where I studied art techniques

including drawing, painting, graphics, engraving, sculpture, fresco, mosaic and ceramics.

After finishing the Fine Art High School, I attended the University of Bucharest Art Institute, graduating in 1974 with a

Master's degree in Graphic Arts Design.

Since 1980 when I relocated to California, I worked as a Graphic Designer and Art Director in the San Francisco Bay Area until 2002 when I retired from the corporate world and started Adrian Litman Art & Design Studio. I create an eclectic body of commissioned art pieces for Civic Public Art, Corporate and private clients, including custom paintings, murals, frescoes, mosaics, sculptures, stained glass panels, fountains and wall treatments, all of which facilitate the harmonious integration of art with architecture.

Education 1964 - 1968 - Fine Arts High school "N. Tonitza" - Bucharest, Romania.

1968 - 1974 - University of Bucharest Art Institute "N. Grigorescu",

Bucharest, Romania.

Master in Graphic Arts Design.

Civic and Commercial completed art projects:

*City of Santa Rosa, CA

"Tame the Fire" - Stainless steel sculpture - 14'H x 3'W x 2'D. Installed in July 2022.

* City of Los Altos, CA

"Cośmic Bliss" - Śtainless steel kinetic sculpture. 14"H x 7'W x 7'D. Installed in N. El Monte Park. April 2022.

* City of Mountain View, CA

- "Magic Birds" Stainless steel kinetic sculpture. 15"H x 12'W x 12'D.
- "Shoreline Wonders" Corten and copper sculpture. 15'H x 7'W x 3'D

Both sculptures installed in March 2022 at Pyramid Park in Mountain View, CA.

City of Newport Beach, CA

"Celestial Carousel" - stainless steel kinetic sculpture - 15'H x 12'W x 12'D. Installed in June 2021. * City of Palm Desert, CA

JOYFUL RHYTHMS

The call for the Art Without Walls program in Los Altos, falls in line with my current artistic interests in creating large sculptures using various durable materials for outdoors installation.

The "Joyful Rhythms" sculpture is a painted wood blocks design that creates a whimsical joyful visual, adding a touch of color to a selected installation

The sculpture is about 6 feet high, six feet wide and three feet deep. It can be installed on a concrete or asphalt surface or in a landscape area affixed to the ground with metal stakes.

The surface of the sculpture is smooth to the touch and presents no harm for the public.

ADRIAN LITMAN Art & Design 4284 Deer Trail rd. Santa Rosa, CA 95404 510.386.7859 adrian.artistic@gmail.com www.adrian-susnea-litman.com

I started to learn about art at a very early age, playing with colors and art materials in my father's Art Design and Restoration studio.

In 1964, I was accepted into the Fine Arts High School N. Tonitza in Bucharest, Romania where I studied art techniques including drawing, painting, graphics, engraving, sculpture, fresco, mosaic and ceramics.

After finishing the Fine Art High School, I attended the University of Bucharest Art Institute, graduating in 1974 with a

Master's degree in Graphic Arts Design.

Since 1980 when I relocated to California, I worked as a Graphic Designer and Art Director in the San Francisco Bay Area until 2002 when I retired from the corporate world and started Adrian Litman Art & Design Studio. I create an eclectic body of commissioned art pieces for Civic Public Art, Corporate and private clients, including custom paintings, murals, frescoes, mosaics, sculptures, stained glass panels, fountains and wall treatments, all of which facilitate the harmonious integration of art with architecture.

Education 1964 - 1968 - Fine Arts High school "N. Tonitza" - Bucharest, Romania.

1968 - 1974 - University of Bucharest Art Institute "N. Grigorescu",

Bucharest, Romania.

Master in Graphic Arts Design.

Civic and Commercial completed art projects:

*City of Santa Rosa, CA

"Tame the Fire" - Stainless steel sculpture - 14'H x 3'W x 2'D. Installed in July 2022.

* City of Los Altos, CA

"Cośmic Bliss" - Śtainless steel kinetic sculpture. 14"H x 7'W x 7'D. Installed in N. El Monte Park. April 2022.

* City of Mountain View, CA

- "Magic Birds" Stainless steel kinetic sculpture. 15"H x 12'W x 12'D.
- "Shoreline Wonders" Corten and copper sculpture. 15'H x 7'W x 3'D

Both sculptures installed in March 2022 at Pyramid Park in Mountain View, CA.

City of Newport Beach, CA

"Celestial Carousel" - stainless steel kinetic sculpture - 15'H x 12'W x 12'D. Installed in June 2021. * City of Palm Desert, CA

Adrian Susnea Litman (Continued)

As an artist, I find inspiration and fuel for creative expression by contemplating the world around me. My inspiration is enhanced by concepts introduced by contemporary science, social issues, politics and cultural diversities.

I use abstract and figurative interpretations to convey messages and emotions with sensibility, combining control and passion. Depending on the scope of design, volumes, shapes and vibrant luminous colors are crafted to converge in an elegant harmony, stimulating the mind and emotions of the viewer.

Having an eclectic approach to design, I feel comfortable flowing from dramatic subjects to whimsical and humorous themes.

I have a broad range of diverse artistic skills and experience of working with a variety of durable materials like stainless steel, copper, brass, bronze, porcelain and glass as appropriate for harmonious integration with the site's architectural style and environment.

The call for the Art Without Walls program in Los Altos, falls in line with my current artistic interests in creating large sculptures using various durable materials for outdoors installation.

The "Dancing Birds" is 6 feet high, six feet wide and three feet deep nature inspired functional sculpture depicting birds in a dancing motion above a double seating bench.

It is made of stainless steel and CorTen, materials that are very durable outdoors and require no or minimum maintenance.

It can be installed on a concrete or asphalt surface or in a landscape area affixed to the ground with metal stakes.
The surface of the sculpture is smooth to the touch and presents

no harm for the public.

Dancing Birds Stainless steel and CorTen 6' x 4' x 3' Artwork for Sale: Yes Price/Value: \$5000.00 2022

Adrian Susnea Litman (Continued)

As an artist, I find inspiration and fuel for creative expression by contemplating the world around me. My inspiration is enhanced by concepts introduced by contemporary science, social issues, politics and cultural diversities.

I use abstract and figurative interpretations to convey messages and emotions with sensibility, combining control and passion. Depending on the scope of design, volumes, shapes and vibrant luminous colors are crafted to converge in an elegant harmony, stimulating the mind and emotions of the viewer.

Having an eclectic approach to design, I feel comfortable flowing from dramatic subjects to whimsical and humorous themes.

I have a broad range of diverse artistic skills and experience of working with a variety of durable materials like stainless steel, copper, brass, bronze, porcelain and glass as appropriate for harmonious integration with the site's architectural style and environment. The call for the Art Without Walls program in Los Altos, falls in line with my current artistic interests in creating large sculptures using various durable materials for outdoors installation.

The "Horoscope" is a stainless steel and CorTen whimsical design kinetic sculpture with Horoscope symbols as an entertaining visual that is part of our popular culture. Many people read the daily Horoscope in the paper or online, for fun. Twelve feet high, seven feet wide and seven feet deep. It can be installed on a concrete or asphalt surface or in a landscape area affixed to the ground with metal stakes.

The surface of the sculpture is smooth to the touch and presents no harm for the public.

Statement

The driving force behind my work is to unearth and understand the various factors of my past that have caused psychological trauma in order to fully process and transcend them. Although widespread and commonplace, witnessing domestic violence, emotional disturbance, and substance abuse from a young age can define and confine one's life. In the United States, 34.8 million children ages 0-17, nearly half of American children, are exposed to childhood experiences that can severely harm their future health and well-being, oftentimes resulting in mental health issues that carry over into adulthood, such as anxiety, depression, and insecurity. Feelings of hopelessness, fear, anger, sadness, or overwhelming stress have led approximately 65 million Americans, nearly 1 in 5 people, to self-medicate, which is a leading cause of addiction.

I work in sculpture, installation, and performance to better understand how the body is impacted and affected by outside conditions, both in terms of interpersonal family dynamics and larger social structures such as gender and class. Embracing tension as an aesthetic strategy to create a sense of restricted movement on the verge of rupture, I employ a vibrant color palette and work in multiples in order to explore a range of emotions, from pleasure to pain.

By exposing my own psychological traumas and foregrounding feelings of disturbance, I challenge predetermined notions of beauty as a means to carve out new territories for artistic expression. Although the act of revealing these past experiences and memories leaves me feeling unshielded and vulnerable, I embrace this fear as a means to instigate self-discovery.

The purpose of my work is to reclaim my roots and move forward from past experiences. Previous memories are inevitable and creating those connections can disclose who we are as individuals. Through constructing and reconfiguring past experience across material and media, my work serves to generate strength through the act of remembering and the embrace of inconsistency.

I am a remnant of the Nahuatlacah oral tradition a tonalpouhque mexica, a commoner from the lowlands (i.e. Mexico) from a time and place that no longer exists. At present my poetry has been reified as it has been published in the UK, US, India, Spain, Australia, Argentina, Germany and Venezuela. I have been exhibited in different venues with a work that's titled: Transparencies in Time: Cuahpohualli embedded in ethnopoetic language poetry:. I seek to expand on this work into a comprehensive exhibit in a gallery in 3D (i.e. three simultaneous exhibitions that expand into multiple levels of perception and/or dimensions).

I was born in Celaya, Guanajuato, Mexico, where I spent my childhood in the small neighboring rural pueblo of Tarimoró and wherefrom my family immigrated in 1988. My inspiration(s) include Netzahualcoyotl, Humberto Ak'abal, Ray A. Young Bear, and James Welch.

Please provide a brief biography.

I have been a professional artist for 35 years. I was awarded "BEST ARTIST" 2022 in L.A. by BOLAA (Best of Los Angeles) https://kattworks2000.wixsite.com/mysite-1

My first public art was for L.A.'s infamous Mural Row where I added my artistic styles on the 101. Since I have been painting and exhibiting from London to Laguna with great sucess. I have delved in many mediums and strive to create with new materials and styles. I love bringing Art in the public eye where everyone can enjoy and be inspired where ART connects us ALL.

The walker must be in front of the snail as if it was using it.

Art Detail

Category

Statement

I have created this art piece, titled The Walking Snail, because of its significance to me. The snail represents me as a person, and the walker represents my mother. I have always been mentally ill and disabled, and despite this, my mother has always been there for me, and has always supported me. The walker, although ironic because snails do not walk, supports the snail through its life. I expect that the audience will react to the art piece with an understanding of the support the snail has. In this artwork, I am trying to tell the audience that even snails need support whether it be literal or metaphorical. I believe that my love for snails and the importance of my mother influences my art strongly.

This current work relates to my previous works because I tend to make my art in relation to my family and their significance to me. My art fits in with the current contemporary art because of its message of family and support. My main source and inspiration is my love for snails and family. The inspiration behind the style of the art as it is more cartoon-like than realistic, is my tattoo. The artist that has influenced me the most is Chloe Foose, my friend who tattooed the snail on my arm. The certain technique used that I find to be important to the work is primarily the stippling.

Statement

Truth, Justice and the American Way. That was what Superman used to say, and it seemed like a plan. A way to live. Everyone had a chance, and the rules applied to everyone across the board. Truth is the contract that allows it all to work. Truth is the given that lets us believe the equation. Truth is the basis of civilization. When truth is evident, we trust the message. When truth is apparent, we can each go about our lives with confidence. Truth is a fragile trust.

Once that trust is broken, it is very hard to regain. When that trust is broken, any statement is received with skepticism. If you cry wolf too many times, no one will listen, even when the threat is real.

Truth the sculpture is a monument to the concept. It is a reminder that truth is an ideal we should aspire to promote. It is a concept that applies across all boundaries. It cares not where you come from or who your parents were, it does not care what party you belong to or what group you are part of. The sculpture is a reminder of the importance of Truth.

The sculpture Truth was built by hand. I drew it with a marker and a straight edge. I cut the piece by hand with a torch. I welded and ground the piece. I etched the metal by hand to create the color and texture and clear-coated the piece. The piece is not perfect-there is evidence of my hand and of the labor that went into it. The surface from a distance looks uniform, but as you get closer you can see the texture and color in the steel. Like the concept, Truth the sculpture will last for ever, yet with neglect it will start to rust.
