During construction, we would like to make sure that the general contractor and other workers make an effort to keep the cut-through/alleyway that runs between 707 Benvenue and 471 South Clark open and accessible as much as possible during work hours, and at all times outside of work hours. Our family uses this cut-through multiple times a day, as do many of our other neighbors on Benvenue and San Luis. It's also another emergency exit if for some reason we can't drive our cars out the other direction on Benvenue, and it's the only place that fire trucks and other large vehicles can safely turn around on Benvenue.

We are happy to welcome our new neighbors to Benvenue!
