

ACTION ITEM REPORT

Item Title: Consideration and ACTION to authorize Hanson Professional Services to provide plans, bidding and construction oversight to upgrade the roadside ditches along Henderson Road with the new 80 feet right of way from the Railroad to the east Resaca crossing.

Recommendation:

With the development of 2 subdivisions in this area, it is important to have the roadside ditch in the proper place when the 4 entrances to the subdivisions are done so we do not have to redo them when the road is upgraded. Regardless of what is done to the road, the roadside ditch will be as close to the property lines as possible. This will require us moving the current drain pipes at each home that is currently there and redoing their driveway. It would require power poles to be moved as well. Unfortunately, there are many since both AEP and Magic Valley serve this area. The good part is that the south side currently does not have any official entrances or driveways. This will allow the developer to take care of the roadside ditch on the south side saving the City money. Doing this now will save a lot of money in the future.

I recommend approval.
