

ACTION ITEM REPORT

Item Title:

Presentation recognizing the partnership between the City of Los Fresnos and Los Fresnos Consolidated Independent School District in support of the Career and Technical Education Program. The partnership provides local students with valuable work-based learning, mentorship, career exploration, and real-world experience in public service through internship and training opportunities.

Recommendation:

Mayor and Council Members,

Today, we are presenting an agreement with our School District that will create valuable opportunities for both our students and the City. Through this partnership, the District will assign two interns to work closely with the City Manager's Office and the EDC. In addition, students from the Criminal Justice program will have opportunities to work with our Police Department.

We are also pleased to have the students and their CTE professors here with us today. We appreciate the School District's partnership and look forward to giving these students real-world experience while developing the next generation of talent in our community.
