

## ACTION ITEM REPORT

**Item Title:** Consideration and ACTION to approve funding for a new fence along the west side of Community Park

**Recommendation:**

Through the years, this fence along the east side of Community Park has taken a toll. Currently there are gates in the front near Highway 100 and towards the beginning of the fields. This was assumed to be sufficient. However, people regularly jump over in the middle instead of going to each end, causing problems with the fence. The contractor took down part of the fence for access during construction. Going forward, we feel a large gate is needed to deliver supplies to the concession stand. Additionally, we will put a small walk through gate in the middle so folks will utilize the gate instead of jumping over the fence. The cost is \$8,000.

I recommend approval.
