[EXTERNAL SENDER]

Dear Ryan,

While we are not able to review the application in person, we recall that the original arborist report recommended the preservation of far more trees than were actually saved. We are concerned that the considerable alteration of this property will change the light/shadowing of adjacent properties. Also, we have a real concern that the topography of the land will vastly affect the drainage.

Given that our property is directly adjacent and downhill from 16401 Kennedy Road, we ask that you deny the permit.

Regards,

Gayle and Steve Haslett

[EXTERNAL SENDER]

Dear Mr Safty-
I strongly disapprove of the issuance of the large protected tree removal permit for 16401 Kennedy Road (T25-148). The issuance of this permit would unnecessarily remove a large protected Oak specimen on a hillside ecology that has already been negatively impacted by the clearing and building of the new home associated with the parcel. This tree is a healthy, beautiful specimen that should not be removed as it adds to the aesthetic and ecology of the hillside neighborhood.
I strongly oppose this permit.
Thank you,
Michael Paige
