

TOWN OF LOS GATOS
COMPLETE STREETS AND
TRANSPORTATION COMMISSION

MEETING DATE: 02/12/2026

ITEM NO: 3.

DATE: February 12, 2026
TO: Complete Streets and Transportation Commission
FROM: Gary Heap, Town Engineer
SUBJECT: Annual Street Improvement Project Update

RECOMMENDATION

Receive an update on the status of the 2026 Street Repair and Resurfacing Project (CIP No. 25-811-9901)

BACKGROUND

The adopted Fiscal Year (FY) 2025/26-2029/30 Capital Improvement Program (CIP) Budget designates funding for the 2026 Street Repair and Resurfacing Project (CIP No. 25-811-9901).

The goal of this annually funded project is to enhance safety for all travel modes and maintain the roadway infrastructure. The Town of Los Gatos has 112 centerline miles of streets and it is important for the Town to perform annual street maintenance projects to improve the Town's roadways and prevent street pavement from deteriorating to more extensive and costly repairs. For the 2026 Street Repair and Resurfacing Project, the focus is on pavement repairs and rehabilitation using micro-surfacing, rubber cape seal, base repair, milling, hot mix asphalt overlay and roadway reconstruction. The 2026 Annual Curb, Gutter and Sidewalk also known as the annual concrete repair project is coordinated with the paving street list.

DISCUSSION

In November 2025, staff developed a preliminary street list using the Town's pavement management program StreetSaver. StreetSaver uses predictive modeling to identify cost effective candidate streets and recommended treatment. Staff then field verified the StreetSaver results by driving and walking the proposed segments to confirm pavement distresses and localized failures, and the appropriate treatment. Staff further refines the list by incorporating safety needs, neighborhood grouping, active transportation consideration for pedestrians and cyclists, coordination with planned utility or capital work, and other constraints.

The 2026 Street Resurfacing Project is scoped to repair 27 street segments, totaling 3.8 Centerline Miles of pavement. Proposed treatments include Micro-surfacing, rubber cape seal, base repairs, milling, overlays and roadway reconstruction. Plans, specifications and estimates

are currently in design phase. Project is anticipated to advertise March 2026, with construction anticipated to begin June 2026.

A key improvement included in the 2026 program is the reconstruction of Brooklyn Avenue adjacent to Los Gatos High School. This roadway is currently in "Very Poor" condition, requiring more extensive repairs to restore acceptable roadway condition. The program also includes improvements on Roberts Road, Fisher Avenue and Nino Avenue, adjacent to Fisher middle school and Van Meter Elementary School.

This year's project includes installing high visibility crosswalks at sixteen intersections identified in the Bicycle and Pedestrian Master Plan, and three intersections recommended by the Town Traffic Engineer for additional pedestrian safety. Staff is also evaluating the feasibility of a curb extension at the intersection of Fisher Avenue and Nino Avenue to improve student crossing safety in front of Van Meter Elementary School. Project locations and final scope may change based on coordination requirements and field conditions.
