Capital Improvement Program

Project Status Update

The attached table provides a high-level overview of the status of the Town's Capital Improvement Program (CIP). The intent of the document is to demonstrate the breadth of projects and where work has begun. Because this is a high-level overview, this document is not intended as an in-depth budget review for each project.

The table is separated into two sections — one-time projects in the upper portion and ongoing projects in the lower portion. One-time projects are non-repetitive in their nature and once complete, are removed from the CIP with any remaining funds returned to the GFAR for reallocation by the Council in future years.

Ongoing projects receive consistent funding over time and any fund balance is carried in the project for the next fiscal year. An example is street maintenance where the need is consistent and ongoing.

The table columns are explained as follows:

Column 1: A large number of the projects are in progress and this is noted by the blue shading of the project title. Progress is defined as the Town having made a significant financial commitment to the project in relation to the budget for that project.

Column 2: The CIP Page No. in this column is a cross reference to the Town's CIP Budget document to allow for ease of finding additional detail.

Column 3: This shows the budget allocated to the project in the <u>current fiscal year only</u>. Note that many of the projects had expenditures in prior years as projects often span multiple years.

Column 4 – This column identifies projects that have Town General Fund commitments through the GFAR. GFAR dollars are the most flexible in terms of use.

Column 5 – This column identifies projects that have grant funds commitments.

Column 6 – This column identifies projects that utilize other funding such as gas tax, traffic impact fees, information technology replacement funds, etc.

Column 7 – This column identifies projects that have matching fund requirements. These are typically grant funded projects.

Column 8 – This column demonstrates the current encumbrances and expenditures on the project as a means of demonstrating progress on the project. Note that some amounts in this column will exceed the current year's budget due to encumbrances that occurred in previous fiscal years that have not yet been paid.
