Subject: 145 Wood Road - new build

Hello Mr Mullin,

I live at 135 Wood Road and received the green notice about site application s-21-003. I met with the new neighbors several months ago when the story poles went up. I have no specific issues with their plan, just the usual: increased noise and road traffic from the build, keeping their build traffic from using my driveway to park or turn around, will it be restricted to 8-5pm, M-F like it was when I built 135 Wood?

In fear of sounding like a broken record, the concern of more traffic on Wood road is that the Meadows is proposing to close one alternative access point - the only access point, except from Wood Road. I lived thru the 1997 fire and access was KEY. Again, this is a general comment to anything going on at Wood Road.

And lastly, it would be nice if the town would repair the town retaining wall adjacent to my driveway - do let me know if I should submit this to someone else! See picture below. It will only get worse with the traffic on Wood.

Thank you
Julie Southern
