- C. CONSULTANT also agrees by signing this document that he or she shall require that the language of this certification be included in all lower-tier subcontracts, which exceed one hundred thousand dollars (\$100,000) and that all such sub recipients shall certify and disclose accordingly.

# ARTICLE XVI NON-DISCRIMINATION CLAUSE AND STATEMENT OF COMPLIANCE

A. CONSULTANT's signature affixed herein, and dated, shall constitute a certification under penalty of perjury under the laws of the State of California

Disclosures must indicate to whom exceptions apply, initiating agency, and dates of agency action.
- c. Exceptions to the Federal Government Excluded Parties List System maintained by the General Services Administration are to be determined by the FHWA.

# ARTICLE XVIII DISADVANTAGED BUSINESS ENTERPRISES (DBE) PARTICIPATION

- A. This AGREEMENT is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who enter into a federally-funded agreement will assist the LOCAL AGENCY in a good faith effort to achieve California's statewide overall DBE goal.
- B. The goal for DBE participation for this AGREEMENT is 15%. Participation by DBE Consultant or Subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-01), or in the Consultant Contract DBE Information (Exhibit 10-02) attached hereto and incorporated as part of the AGREEMENT. If a DBE Subconsultant is unable to perform, CONSULTANT must make a good faith effort to replace him/her with another DBE Subconsultant, if the goal is not otherwise met.
- C. CONSULTANT can meet the DBE participation goal by either documenting commitments to DBEs to meet the AGREEMENT goal, or by documenting adequate good faith efforts to meet the AGREEMENT goal. An adequate good faith effort means that the CONSULTANT must show that it took all necessary and reasonable steps to achieve a DBE goal that, by their scope, intensity, and appropriateness to the objective, could reasonably be expected to meet the DBE goal. If CONSULTANT has not met the DBE goal,

complete and submit Exhibit 15-H: DBE Information - Good Faith Efforts to document efforts to meet the goal. Refer to 49 CFR Part 26 for guidance regarding evaluation of good faith efforts to meet the DBE goal.

- D. DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. The LOCAL AGENCY, CONSULTANT or Subconsultants shall not discriminate on the basis of race, color, national origin, or sex in the performance of this AGREEMENT. CONSULTANT shall carry out applicable requirements of 49 CFR, Part 26 in the award and administration of US DOTassisted contracts. Failure by CONSULTANT to carry out these requirements is a material breach of this AGREEMENT, which may result in the termination of this AGREEMENT or such other remedy as LOCAL AGENCY deems appropriate which may include:
  - 1) Withholding monthly progress payments;
  - 2) Disqualifying the CONSULTANT from future bidding as non-responsive.
- E. A DBE firm may be terminated only with prior written approval from LOCAL AGENCY and only for the reasons specified in 49 CFR 26.53(f). Prior to requesting LOCAL AGENCY consent for the termination, CONSULTANT must meet the procedural requirements specified in 49 CFR 26.53(f). If a DBE Subconsultant is unable to perform, CONSULTANT must make a good faith effort to replace him/her with another DBE Subconsultant, if the goal is not otherwise met.
- F. Consultant shall not be entitled to any payment for such work or material unless it is performed or supplied by the listed DBE or by other forces (including those of Consultant) pursuant to prior written authorization of the LOCAL AGENCY's ContractAdministrator.
- G. A DBE is only eligible to be counted toward the AGREEMENT goal if it performs a commercially useful function (CUF) on the AGREEMENT. A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the AGREEMENT and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the AGREEMENT, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under the AGREEMENT is commensurate with the work it is actually performing, and other relevant factors.
- H. A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar

transactions, particularly those in which DBEs do not participate.

- If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- J. CONSULTANT shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- K. Upon completion of the AGREEMENT; a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by CONSULTANT or CONSULTANT's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to CONSULTANT when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- L. If a DBE Subconsultant is decertified during the life of the AGREEMENT, the decertified Subconsultant shall notify CONSULTANT in writing with the date of decertification. If a Subconsultant becomes a certified DBE during the life of the AGREEMENT, the Subconsultant shall notify CONSULTANT in writing with the date of certification. Any changes should be reported to LOCAL AGENCY's Contract Administrator within 30 days.
- M. Any subcontract entered into as a result of this AGREEMENT shall contain all of the provisions of this section.

Although the team has already visited the project site multiple times and is very familiar with the project area, we will conduct a field review with the Project Manager and key project staff, to envision the project issues, identify and document concerns, and photograph key aspects that will affect the overall project development effort. The team will produce field notes, photos, and field measurements for use in the project development.

#### **Deliverables:**

- Field notes
- Photos
- Video of existing site conditions
- Location of utilities within project area
- Summary or diagram of existing conditions highlighting any special/potential conditions that may affect the final design
- Summary of ADA standards and trail guidelines applicable to the project

#### Task A.3 Surveys and Mapping

The Mott MacDonald Team, with R.E.Y Engineers leading the surveying effort, will perform design topographic surveys and right-of-way mapping for the project. The topographic information will be compiled to create an existing conditions base map in AutoCAD.

#### **Right-of-way Mapping**

R.E.Y. will provide record right-of-way mapping of the project area. Right of way will be based upon preliminary title reports, record maps, deeds, Caltrans right-of-way maps, SCVWD right-of-way maps, and assessor maps. The Town will provide preliminary title reports, if required.

#### **Topographic Mapping**

R.E.Y. will perform a topographic survey for design purposes of the project site. R.E.Y. will conduct a detailed field survey to review and record existing conditions in the project area to identify any unusual or special conditions that may affect the design or construction of the project. The field survey for the project area shall include at a minimum, the location of existing facilities, including but not limited to:

- Los Gatos Creek
- The Los Gatos Creek Trail and adjacent land area
- Roadways
- Sidewalks
- Curbs
- Gutters
- Ramps
- Highway 9 overcrossing including the embankments and structural components
- Utilities (above, below, and attached to bridge structure if any).
- Flood control facilities
- Waterways
- Outfalls
- Trees greater than 6" DBH with tree species identified
- Any existing irrigation facilities
- Fences and Gates

Survey shall extend sufficiently beyond the project area to demonstrate proper post project drainage. R.E.Y. will prepare topographic and aerial mapping at a scale of 1"=20' for use in the project design.

#### **Deliverables:**

- Base map(s) in AutoCAD format and survey data sheets
- Right of Way Mapping

# **Task A.4 Utility Coordination**

The complete effort related to utilities for this project includes accurately identifying and mapping existing utilities, identifying and defining any relocations or modifications required by the project, and documenting utilities (those affected and those not affected) in accordance with Caltrans policies.

Mott MacDonald will coordinate early with utility companies to confirm any potential conflicts with existing overhead and underground utilities within the project area. This effort will include the following tasks:

- Develop utility contacts lists and relocation tracking database
- Prepare Utility "A" letters for the Town's signature requesting existing utility information from utility owners within the project vicinity during the preliminary design phase
- Schedule and conduct utility coordination meetings with utility owners. Prepare/distribute meetings
  agendas in advance of each meeting and prepare/distribute meeting minutes within three working days
- Prepare Utility "B" letters (Notice to Utility Owners of Conflict) for the Town's Signature at the 65% submittal milestone
- Prepare Utility Conflict Maps clearly delineating existing and proposed utilities in current and final locations. Location of proposed utilities in final locations will be based upon design information provided by the affected utility companies

- Prepare Utility "C" letters (Notice to Utility Owners to Relocate Conflicting Facilities) for the Town Signature at the 95% submittal milestone
- Provide support to the Town to determine liability for utility relocation costs and certify that all utility conflicts are addressed so that Utility Certification (part of ROW Certification) is obtained
- Prepare Utility Agreements to be executed with affected utility companies

## **Deliverables:**

- 'A'+'B'+'C' Letters for Town signature requesting utility information
- AutoCAD basemap of existing utilities
- Encroachment Permit Applications for site access

# **Task A.5 Preliminary Engineering**

Upon completion of the above and preparation of the base map, Mott MacDonald will develop a preliminary design for up to three alternatives of the project consistent with the project's goals and budget. The preliminary plans will be to roughly a 15% design level and will include plan and profile exhibits over the project base mapping and aerials. The exhibits will allow the Town, stakeholders, and permitting agencies to understand the relative spatial impacts and design elements of the layout. We anticipate up to two (2) iterations of the preliminary design addressing the Town staff comments. The preliminary geometry will be developed considering cost, accessibility and connectivity, safety, design exceptions, environmental impacts, required permits, grading/drainage, right of way, utility relocation, geotechnical/retaining wall, ADA, extent of required demolition activities, construction phasing/staging, and future maintenance considerations.

The Mott MacDonald team will present final preliminary design at two (2) public meetings.

#### **Deliverables:**

- Preferred preliminary design and order of magnitude cost estimate for review with Town staff
- Up to three preliminary design alternatives developed to approximately 15% complete
- Presentation of preliminary design at two public meetings Town to arrange meetings (assume three hours each)

# Task A.6 Environmental Studies and Documentation

The Mott MacDonald Team expects that the suitable environmental clearance documents will be a NEPA Categorical Exclusion (CE) and a CEQA Categorical Exemption (CE). It is assumed that Caltrans will serve as the NEPA lead agency and approve the NEPA CE and that the Town will serve as the CEQA lead agency and adopt the CE.

#### **NEPA Environmental Technical Memos and Studies**

To support the environmental analysis of the project, the Mott MacDonald team, led by David J. Powers & Associates (DJP&A), will prepare the following technical memos:

- Traffic Technical Memo
- Air Quality (MTC PM2.5 exemption email)
- Water Quality Technical Memo (BMPs during construction)
- Biological Technical Memo:
  - Natural Environmental Study (Minimal Impacts)

- Section 4(f) Enhancement Concurrence Letter
- Cultural Resources Technical Memo
  - Archaeological/Historical Consultants (subconsultant):
    - Area of Potential Effects (APE) Map
    - Historic Property Survey Report (HPSR)
    - Archaeological Survey Report (ASR)
    - Equipment Staging Technical Memo

DJP&A will prepare the traffic, equipment staging, and water quality memo based on information provided by the Project Team. The memos will be prepared based on Caltrans' Standard Environmental Reference (SER) and submitted to the Town for review. DJP&A will revise the memos once and submit them back to the Town for submittal to Caltrans.

Based on review comments by Caltrans, DJP&A, with concurrence from the Town, will revise the memos once for resubmittal to Caltrans. Once the memos are deemed complete by Caltrans, they will issue the NEPA Categorical Exclusion (CE) for use by the City in obtaining federal funding. We believe that the project will qualify as a Categorical Exclusion under NEPA (23 CFR 771.117; (c) (3): Construction of bicycle and pedestrian lanes, paths, and facilities).

#### **CEQA Environmental Clearance**

Given the nature of the improvements proposed, we believe the project falls under a Class I Categorical Exemption under CEQA. The Class I exemption as identified in CEQA Section 15301, Existing Facilities (c), "Existing highways and streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities (this includes road grading for the purpose of public safety), and other alterations such as the addition of bicycle facilities, including but not limited to bicycle parking, bicycle-share facilities and bicycle lanes, transit improvements such as bus lanes, pedestrian crossings, street trees, and other similar alterations that do not create additional automobile lanes)." DJP&A will prepare a Categorical Exemption (CE) for the project and submit to Town staff for one round of review. Once approved, DJP&A will file the CE at the Santa Clara County Clerk's office and pay the \$50 filing fee on behalf of the Town.

#### **Deliverables:**

- Environmental studies and reports for Categorical Exclusion under NEPA
- Environmental studies and reports for Categorical Exemption under CEQA
- Documentation of activities required by the State Water Resources Control Board
- Incorporation of mitigation measures, if any, into final contract documents
- Location Hydraulic Study Form
- Summary Floodplain Encroachment Report Form

# **Task A.7 Geotechnical Investigations Reports**

Mott MacDonald includes in this scope of services a geotechnical investigation and analysis, geotechnical analyses and preparation of Structures Preliminary Geotechnical Report (SPGR), Preliminary Foundation Report (PFR), and Foundation Report (FR) to support the preparation of the design and construction documents. The scope of geotechnical work includes coordination of an on-site geotechnical investigation, laboratory testing of retrieved soil samples, analysis and reporting of geologic and geotechnical conditions, and providing preliminary and final foundation and construction recommendations. The SPGR will be completed to support Caltrans type selection process, prior to completion of the geotechnical investigation. The results of the geotechnical investigation will be incorporated in the PFR and FR documents as appropriate for Caltrans procedures.

The geotechnical investigation aims to collect data and soil samples enabling development of geotechnical design parameters for the proposed bridge and retaining wall structures. Mott MacDonald has reviewed previous geotechnical information available for the site by others. Those studies indicate that the subsurface soil comprises dense to very dense silty sand mixed with gravel. The existing highway bridge is founded on shallow spread footings near the creek and the abutments are supported on driven H-pile foundations approximately 40 feet deep. The geotechnical field investigation will comprise a program of near-surface utility clearance activity and drilling of two geotechnical boreholes shown at the proposed locations in Figure 16.

Mott MacDonald will coordinate and provide subcontractors to complete the following services:

- Utility Clearance: In compliance with California law, Mott MacDonald will file a utility clearance ticket with Underground Service Alert (USA). This will require a site visit to identify proposed excavation and drilling locations. A utility locating subcontractor will complete utility clearance activities (electromagnetic detection) at the proposed locations for geotechnical investigation.
- Geotechnical Drilling: Mott MacDonald will procure the services of Pitcher Drilling, a union drilling contractor. Pitcher Drilling will complete one borehole to a maximum depth of 75 feet below site grades at the southerly abutment location of the proposed bridge. The intent of this borehole is to confirm that conditions are similar to those encountered and described in the contract documents for the construction of the adjacent Highway 9 bridge. Because of poor access, a similar borehole will not be completed at the northerly abutment. A second borehole will be completed on the shoulder of southbound Highway 9 at the location of the start of the existing wooded trail. This borehole will extend to a maximum depth of 50 feet (likely shallower) to characterize the subsurface stratigraphy for support of retaining structures and earthwork fills for construction of the proposed bicycle trail. Soil samples will be retrieved from the boreholes, visually characterized and logged in the field, and stored for transportation to a geotechnical laboratory. The soil boring data collected are used to identify stratigraphic details, soil strength parameters, and soil behavior. Mott MacDonald will obtain drilling permits as required by Santa Clara Valley Water District (SCVWD) and Caltrans requirements, and the explorations will be backfilled with neat cement grout in accordance with SCVWD requirements. To complete the geotechnical investigation, Mott MacDonald will rely on the Town to provide and coordinate access to the existing bicycle trail; Mott MacDonald will provide traffic control and safe working areas to minimize impacts to bicycle traffic.

- Laboratory Testing: Mott MacDonald will transport the soil samples obtained to the facility of Inspection Services, Incorporated (ISI), our geotechnical laboratory subcontractor. The soil samples will be tested for corrosivity (using a secondary corrosion specialist laboratory consultant), strength, and physical classification.
- Analysis and Reporting: Mott MacDonald will complete geotechnical analyses to develop design
  parameters and recommendations for deep foundations supporting the proposed bridge and retaining
  wall structures. The results of the geotechnical investigation, analysis, and recommendations will be
  documented within PFR, and FR in accordance with Caltrans geotechnical report guidance. An additional
  Geotechnical Design Report will be prepared in the form of a design memorandum documenting the
  analyses completed to prepare the PFR and FR. The recommendations in these reports will be directed to
  the design team for their preparation of plans and specifications for the project and include
  recommendations for foundation types, seismic information, and construction considerations. It will also
  include preliminary scour and corrosion evaluations, lateral earth pressure parameters, and seismic
  design parameters developed from simplified code procedures in AASHTO 2014 with Caltrans
  Amendments. No site-specific seismic hazard, site response analyses, or numerical pile-soil interaction
  analyses are anticipated as part of this work.

The preparation of this scope of services above relies on several assumptions documented below. Should the conditions encountered or project requirements vary from our assumptions, we would not embark on additional services without written authorization of the Town.

### **Deliverables:**

- Geotechnical site investigation comprising two boreholes
- Structure Preliminary Geotechnical Report (for structural type selection)
- Preliminary Foundation Report
- Foundation Report
- Geotechnical Design Report (in technical memorandum format)

### Task A.8 Right of Way Certification

We do not anticipate that right of way will be required for the project. Mott MacDonald will verify and prepare the appropriate right-of-way certification documents, in accordance with forms and guidelines in Chapter 14 of Caltrans Right of Way Manual. We will evaluate the right of way requirements for the Project. All project improvements including those necessary to accommodate stage construction and temporary access will be included in the evaluation. We will identify staging areas and temporary construction easements for use by the general contractor during construction.

### **Deliverables:**

Right-of-Way Certification, Utility Certification

### **Task A.9 Final Design**

The Mott MacDonald team will develop and prepare the final design of the project improvements that include but are not limited to trail alignment and profiles, pre-fabricated pedestrian bridge, retaining wall, ramp structure, signing and striping, drainage improvements and stormwater treatment.

Improvements will be designed in accordance with the latest editions of the following Town of Los Gatos, Caltrans, and federal policies, procedures, practices, regulations, manuals and standards:

- Town of Los Gatos Standard Specifications and Details
- Caltrans Highway Design Manual
- Caltrans Standard Plans and Specifications (2018)
- California Manual of Uniform Traffic Control Devices (MUTCD)
- AASHTO "Green Book" A Policy on Geometric Design of Highways and Street
- AASHTO Roadside Design Guide
- Accessibility Guidelines for Outdoor Recreation and Trails
- Americans with Disabilities Act Accessibility Guidelines
- California Access Compliance Reference Manual
- Santa Clara Valley Urban Runoff Pollution Prevention Program

Mott MacDonald will prepare Plans, Specifications, and Estimates for final design of the preferred alternative at 35%, 65%, 95% and bid set milestone submittals. Comments received at each submittal will be incorporated into subsequent submittals. At each milestone level, we will monitor the cost estimate to ensure the project stays within the design completion budget and schedules. The following tasks will be performed.

- 35% Submittal: Mott MacDonald will prepare 20-scale preliminary plans intended to allow the Town to review and comment upon the basic design concepts early in the process. At a minimum, plans include the Town's Standard Cover Sheet and Title Sheet and all plan sheets that will be included in the final plan set at a 35% completion stage. A listing of all required details will also be provided. Existing conditions and base maps will be developed fully at this stage. The Standard Specifications and Special Provisions will be prepared at a 35% completion level, and the construction cost estimate will include all anticipated cost items with a 20% estimating contingency.
- Biggs Cardosa will prepare Structure Type Selection documents for the proposed bridge including a brief description of key design issues. Bridge General Plan, and Engineer's Estimate of Probable Construction Costs.
- 65% submittal: The Mott MacDonald Team will incorporate comments received from the preliminary plan review and prepare 65% PS&E which include all plan sheets developed to a 65% completion stage. It is anticipated that the 65% plan set will include the following plans:
  - Title sheet
  - General Notes
  - Survey Control Data
  - Typical Sections
  - Demolition Plan
  - Layout and Profile
  - Construction Details
  - Structures Plan
  - Structures Details
  - Retaining Walls
  - Drainage & Utility
  - Signing and Pavement Delineation
  - Water Pollution Control Plan

- Construction Staging and Traffic Handling Plan
- Log of Test Borings
- Specifications and Special Provisions at the 65% level will include a complete table of contents with all special provisions necessary for the construction of the project identified. The construction cost estimate will be prepared and will include a 15% estimating contingency.
- 95% submittal: The Mott MacDonald team will incorporate comments received from the 65% submittal. The 95% PS&E will be the fully developed set of contract documents including all plans sheets, Specifications and Special Provisions, details, and other contract documents necessary for the construction of the project. The construction cost estimate will be finalized and will include a 10% estimating contingency. Mott MacDonald will conduct an internal quality control review of the plans, Specifications, Special Provisions, and construction cost estimate prior to submitting the 95% complete set to coordinate contract documents and make information consistent between all documents.
- Following submission and review of the 95% submittal, Mott MacDonald will prepare and provide the Town with the final contract documents for use in the construction bid process. All contract documents (plans, Specifications, Special Provisions, and estimates) will be signed by the licensed professional engineer in charge of the design.

### **Deliverables:**

- Five hard copy sets of D-size (24"x36") plans and three hard copy sets of B-size (11"x17") Plans
- Five hard copies of the Specifications, Special Provisions
- Five hard copies of Cost Estimates

### **Task A.10 Coordination with Stakeholder Agencies**

Mott MacDonald will coordinate with Caltrans and Santa Clara Valley Water District to determine the need for and obtain the necessary permits to allow for the construction of the project, including access and staging areas for the anticipated construction stages.

Mott MacDonald will prepare a Standard Encroachment Permit Application form TR-0100 and a Permit Engineering Evaluation Report form TR-0112. The Town will be responsible for Caltrans fees. This task includes budget for two rounds of revisions (Town and Caltrans comments) between application submittal and encroachment permit issuance. Note that supplemental forms and reports that will be submitted with the encroachment permit may change as a result of meetings with Caltrans staff throughout the permit approval process.

### **Utility and ADA Certification**

Caltrans is likely to require several forms, signed by an agent of the Town, to show the project doesn't require major utility relocations, and meets the current ADA design standards. These forms would be prepared by and signed by the Town. However, Mott MacDonald would provide guidance and support in filling out these forms.

Lane Closure Report (LCR) – A LCR will be prepared to determine the duration of Highway 9 lane closures during construction of the Project. Lane closure calculations per Caltrans standard methodology will be performed and submitted to Caltrans for review and approval. This will also include Late Lane Closure Pickup calculations. It is assumed that 7 day 24 hour traffic counts will be provided, and no counts will be performed by the Mott MacDonald Team.

Deliverables:

- Standard Encroachment Permit Application Package and PEER
- ADA Certification
- Lane Closure Report
- Valley Water Encroachment Permit Application

### SUPPLEMENTAL REPORTS AND SERVICES - Task A.11

These services or subtasks listed may or may not be required by Caltrans during the design phase process. Should any of the following sub tasks be required, the Consultant will provide the required cost proposal for the work and upon agreement, the Town will provide a written authorization to proceed with the subtask, with deliverables and lump sum payment identified.

There is no guarantee, either expressed or implied, that the services and costs shown for Task A.11 will be authorized in full.

### A.11-1 Construction Phase Authorization

Mott MacDonald will support the Town in the preparation of the Request for Authorization to proceed (E-76) forms and exhibits for construction funding applications using procedures outlined in the Caltrans Local Assistance Procedures Manual. Forms include:

- Exhibit 3-D: Request for Authorization to Proceed with Construction
- Exhibit 3-E: Request for Authorization to Proceed Data Sheet
- Exhibit 3-O: Sample Federal-aid Project Finance Letter
- Exhibit 9-D: DBE Contract Goal Methodology
- Exhibit 12D: PS&E Checklist
- Exhibit 13A: Right of Way Certification for Local Assistance Project
- Exhibit 15A: Local Agency Construction Contract Administration Checklist
- Copy of FTIP/FSTIP Reference
- Completed Field Review Form 7B
- Approved NEPA document

### **Deliverables:**

Authorization from Caltrans to proceed with construction (E-76)

### A.11-2 Wetland Technical Assessment

**Field Surveys.** Impacts will occur to potentially regulated habitats on-site, thus H. T. Harvey & Associates will conduct the field work necessary to prepare a full report representing a delineation of Waters of the U.S./State on the site, which would serve as the Wetland Delineation/Wetland Technical Assessment for the NES. Data on the soils, vegetation, and hydrology within potential wetlands on the site are necessary in order to complete the assessment. H. T. Harvey & Associates propose to delineate the boundaries of Los Gatos Creek and the tributary that runs parallel and adjacent to the proposed trail ramp from eastbound Highway 9 according to methodologies outlined in the USACE Wetland Delineation Manual and other USACE guidance. To that end, a routine, on-site delineation of wetlands that occur in the project area will be conducted. In addition to wetlands, any other potentially jurisdictional features, including "other waters" of the U.S./State, will be delineated and described per USACE and RWQCB requirements. The extent and distribution of "riparian" habitats as defined by CDFW will also be mapped and described within the report and presented on accompanying figures.

Wetland Technical Assessment. H. T. Harvey & Associates will prepare a technical report summarizing the methods and results of the field survey of regulated habitats. This report will be prepared to report specifications developed by the Caltrans, USACE, RWQCB and CDFW and thus will be of sufficient detail for agency review and a jurisdictional determination (in the case of the USACE). It will include a brief description of existing conditions, description of field techniques employed in the delineation, wetland data sheets, and copies of aerial photographs and maps which show the extent of regulated habitats on the project site. This task includes time for HTH senior staff to attend a field site visit with the USACE to verify the delineation.

### A.11-3 Extended Phase I Archaeological Survey Report

XPI Fieldwork. Because the project area is sensitive for prehistoric archaeological sites, it is possible that Caltrans will require an Extended Phase I (XPI) Archaeological Survey Report for this project. XPI reports are used in situations where ordinary surface survey is insufficient to determine the presence or absence of cultural resources in a project area. An XPI proposal detailing the aims and methodology of the study is first prepared for Caltrans approval. After approval of the proposal, XPI fieldwork may begin. This proposal assumes that XPI fieldwork, if necessary, will be limited to hand excavation due to access constraints for heavy equipment in the project area. Hand excavation will include 50x50cm surface transect units and hand augering to identify the presence or absence of archaeological deposits. After completion of fieldwork, the XPI Report will be prepared and submitted to Caltrans PQS for review and approval.

**Extended Phase I Archaeological Survey Reports.** Draft and Final Extended Phase I Archaeological Survey Reports for submission by the City of Los Gatos to Caltrans will be prepared, following the guidelines in the Caltrans Standard Environmental Reference, Volume 2, Exhibit 5.2.

### **Deliverables:**

- Wetland Technical Assessment Report
- Extended Phase I Archaeological Survey Report

### A.11-4 Phase I ISA

PARIKH will prepare Phase I Initial Site Assessment study report for the proposed project. ASTM recommends a 1.0-mile radius for the data search. Environmental Data Research Inc. (EDR Inc.) report study will be ordered using an approximate center of the project. The ISA study will be prepared to identify potential hazardous waste sites and evaluate environmental factors that may have impacted the soil groundwater quality within the project limits. The study will include data collection and documents research including historical land use based on study of aerial

photographs and other relevant documents. No field exploration and/or testing are included in this phase of the work.

### **Deliverables:**

Phase I ISA Report

### A.11-5 Additional Studies, Reports, Activities

### **Design Exception Fact Sheets**

Caltrans may require supplemental reports to seek approval of improvements that don't meet all of Caltrans design requirements. These studies include:

- Fact Sheet Exception for Mandatory Design Standards Includes design standards that require Caltrans headquarters to approve
- Fact Sheet Exception for Advisory Design Standards These are standards that the local district (District 4) can approve

During the meeting with Caltrans, Mott MacDonald will discuss potential elements that will require design exceptions and prepare a design exception fact sheet if needed. Mott MacDonald will work with Caltrans to minimize the amount of additional work needed for these fact sheets.

### Storm Water Data Report (SWDR)

Caltrans may require a supplemental report to document the project's measures to mitigate the project's construction-related impacts to the regional water system. Depending on the project impact to Caltrans right of way, a SWDR Will be prepared if required by Caltrans.

### A.11-6 Additional Plan Reviews or Design Services

Additional budget request will be submitted in the instance that Caltrans or the Town provide more than one round of review comments to the different reports submitted for Caltrans review or request additional design services.

### **TASK B – Bid Support Services**

### **Task B.1 Bid Services**

Mott MacDonald will respond in writing to questions that arise during the bid phase and will prepare addendums, if necessary, which will be distributed by the Town of Los Gatos - Parks and Public Works Department. Each addendum will address cost implications to the project construction cost estimate. Mott MacDonald will prepare written responses to questions received and addenda in a format that can be easily posted to the Town's website. Following completion of bid stage, Mott MacDonald will incorporate any addenda into the final contract documents and will prepare the final "Conformed Contract Documents." Mott MacDonald will provide an electronic copy of the final Conformed Contract Documents, a signed and stamped mylar copy of the final conformed plans, and a hard copy of the final signed, approved, and stamped conformed Specifications, Special Provisions, and cost estimate. The electronic copy of the plans will be provided as both AutoCAD files and PDF files, and the electronic copy of the specifications and estimate will be provided in both Microsoft Word/Excel format and PDF format.

A separate Notice to Proceed shall be issued by the Town prior to any work proceeding on Task B. All work on Task B shall be completed based on the project bid and award schedule in effect at the time of the Notice to Proceed.

### **TASK C – Construction Support Services**

### **Task C.1 Construction Support Services**

Mott MacDonald will provide the following construction support services as requested:

- Review of submittals and shop drawings for compliance with Contract Documents
- Review and response to Requests for Information, Requests for Change Orders, Quotes from Contractor
- Review of Contract Change Orders
- Review and tracking of results from materials testing for conformation to Contract Documents
- Field review and geotechnical monitoring during bridge installation
- Structural review and field monitoring during bridge installation
- Prepare design modifications if necessary due to unforeseen conditions

A separate Notice to Proceed shall be issued by the Town prior to any work proceeding on Task C. All work on Task C shall be completed based on the project construction schedule in effect at the time of the Notice to Proceed.

### **General Assumptions**

- The Town will furnish any available documents, as-builts, electronic files or information that may be required to complete the design aspect of this scope, including survey monument data and preliminary title reports.
- Town to provide Town's standard CAD border drawing to use for the project.
- Inspection and construction management services are not included in the scope of services.
- Scope does not include right-of-way engineering and right-of-way acquisitions.
- Drilling spoils must be off-hauled but are assumed to be nonhazardous for the purposes of disposal.
- Scour analysis is not required for the bridge supports as the channel is concrete-lined.
- Access to the proposed sites (particularly the bicycle trail) can be provided by the Town between the hours of 7am and 7pm, Monday-Friday (see Figure 6 for proposed locations).
- No point of investigation has been included on the north side of Highway 9 and conditions will be
  extrapolated from those represented in historical documents for the construction of the highway bridge.
- The Mott MacDonald Team will consider a variety of superstructure types and shapes in the preliminary
  phase but for the final design, a standard type prefabricated truss is assumed. The Mott MacDonald Team
  assumes that the superstructure will be designed by the manufacturer and the Construction Documents
  will include a prefabricated bridge option.
- Mott MacDonald also assumes that Caltrans will accept a prefabricated bridge option in their ROW and will approve the use of a prefabricated steel pedestrian bridge option that will be designed by the manufacturer.
- Mott MacDonald will prepare the design and calculations for the supports of the bridge and the walls.
- The scope of work and fees include a retaining wall at two locations as well as slab on grade ramps.
- Independent check of structural plans will be a red, yellow, and green check of the construction documents and structural calculations that will be performed after the 65% PS&E submittal.

- PS&E Submittals will be provided at 35%, 65%, 95% and 100% completion levels. Agency reviews are limited to one round of comments consolidated to one set of redline plans, specifications and estimate redline comments per agency. Project Reports will be limited to one draft and one final version of each report. Additional PS&E submittal, agency reviews, and report submittals will be considered Extra Work unless submittals are deemed incomplete.
- Plans and specifications shall be prepared following standard Caltrans format as outlined in "Ready-to-List and Construction Contract Award Guide" published by Caltrans.
- The Consultant will prepare technical specifications (Caltrans Division 2 through 10) using the 2018 Caltrans Standard Special Provisions (SSPs). The 2018 Caltrans Standard Specifications and the 2018 Caltrans Standard Plans will be referenced in the design documents as applicable. The Town will provide all necessary boilerplate specifications.
- Construction Cost Estimates will be prepared based on readily available industry standards and past project experience. Construction Cost Estimates are the Consultant's estimate of the probable construction costs. Actual construction costs may vary based on varying industry trends and competitive Contractor bids and understanding of the project.
- Town reviews will be provided concurrently with other Agency reviews.
- The Construction Support Services scope of work and fee is assumed based on anticipated project development.
- In the event the project design changes and impacts jurisdictional or regulated habitats, a Wetland Technical Assessment (WTA) will be included as an optional task.
- In the event Caltrans requires an Extended Phase I (XPI) Archaeological Survey Report, this service will be included as an optional task. Note that if an XPI is needed, an additional 12-16 weeks would be added to the project schedule.
- Design scope and fee are based on an assumed maximum design duration of 18 months.

NOTES: E

This is not the only way to estimate salary increases. Other methods will be accepted if they clearly indicate the % increase, the # of years of the contract, and a breakdown of the labor to be performed each year. An estimation that is based on direct labor multiplied by salary increase % multiplied by the # of years is not acceptable. (i.e. \$250,000 x 2% x 5 yrs = \$25,000 is not an acceptable methodology) This assumes that one year will be worked at the rate on the cost proposal before salary increases are granted. Calculations for anticipated salary escalation must be provided.

### NOTES:

1. This is not the only way to estimate salary increases. Other methods will be accepted if they clearly indicate the % increase, the #of years of the contract, and a breakdown of the labor to be performed each year.

2. An estimation that is based on direct labor multiplied by salary increase % multiplied by the # of years is not acceptable.(i.e.  $$250,000 \times 2\% \times 5 \text{ yrs} = $25,000 \text{ is not an acceptable methodology}$ )

3. This assumes that one year will be worked at the rate on the cost proposal before salary increases are granted.

4. Calculations for anticipated salary escalation must be provided.
