Subject: parking permits for non-residents

Good evening - This sounds like you are trying to address a problem that does not exist - very much like the parklet / one-way trial. Parking is a problem for local business employees because they can't walk more than a block from the car to their job. You can help the problem by enforcing the hourly limits. That would help free up spaces for shoppers. Need some extra spaces? Sell permits for parking spaces at store, businesses and churches. Give them the money that is generated.
