## Summary and Assignment

I was asked to review the plans and the applicant's arborist report and provide findings and recommendations. I visited the site on December 12, 2024.

The arborist's report was provided by Kielty Arborist Services LLC dated June 28, 2024. The report contains some required information for the proposed project.

The site is comprised of an English walnut (*Juglans regia*) orchard. The report indicates two walnuts have a trunk diameter greater than eighteen inches along with one Large Protected coast live oak. The remaining trees are considered Exempt within the ordinance.

There is one discrepancy within the plans. Sheet C2.0 indicates the Large Protected coast live oak is to be retained. However the remaining plans and the arborist report (along with the expected impacts around the tree based on my review) indicate the tree is to be removed.

The only deficiency within the report and assessment is no "numbered metal tags" were placed on the trees for reference in the field. However, based on the nature of the proposed plans I am not recommending returning to the site to accomplish this task because it would be frivolous at this point considering all the trees are to be removed.

The report provides recommendations for replacement trees and the applicant should replace the trees according to the ordinance requirements as indicated in Sec. 29.10.0985. Determination and conditions of permit. Table 3-1.
