Attachments:	Resolution No. 1054 – Adopting the 2023 Engineering Design and Development Standards Project Manual	
Summary Statement:	<p>The Engineering Design and Development Standards Project Manual was originally adopted by City Council on April 5, 2004. Staff has gone to annually updating the standards and the last update was effective on January 1, 2022. These standards are required for City to comply with the state Growth Management Act. They include street, water, sewer, and storm drainage standards to be used for all new and replacement construction within the City.</p> <p>In response to changes in technology and feedback from customers, additions, deletions and/or clarifications have been incorporated into the 2023 Project Manual. The manual also addresses access issues, permitting processes and procedures, and includes various forms necessary in the development process. Staff presents Resolution No. 1054 which lists all of the revisions for Council review.</p> <p>The Public Works Committee reviewed the proposed changes made by staff at their October 5, 2022, meeting and recommended that they be forwarded to City Council for consideration.</p>	
Recommended Action:	That City Council approve and authorize the Mayor's signature on Resolution No. 1054 adopting the 2023 Engineering Design and Development Standards Project Manual.
