

**A RESOLUTION AMENDING RESOLUTION 991 BY AMENDING THE ADOPTED
BUILDING VALUE TABLE USED TO CALCULATE BUILDING PERMIT FEES
FOR THE CITY OF LYNDEN**

WHEREAS, the City Council of the City of Lynden has determined that it is in the best interest of the city to update building fees to be consistent with current practice and to recoup some of the costs associated with the Building Division services; and

WHEREAS, building value data is used to determine permit fees and serve as a minimum assigned value as determined by building occupancy and construction type; and

WHEREAS, the International Code Council (ICC) provides regular guidance on the average construction costs per square foot; and

WHEREAS, the City of Lynden last updated construction costs in 2018 to reflect the 2016 ICC guidance; and

WHEREAS, construction costs have increased significantly since that time.

NOW THEREFORE, BE IT RESOLVED by the City Council of the City of Lynden, that the following Building Valuation Data be amended as follows:

Section 1: Building Valuation

Plan Review and Permit Fees are based on the determined valuation of a project, rather than the cost, to ensure permit fees are consistent. Valuation means the estimated total cost of building construction. It is not meant to determine market value of a structure.

The Square Foot Construction Costs in the following table are from the updated August 2021 Building Valuation Data Table provided by the International Code Council (ICC) and represent average valuations for various occupancy types. The average costs include foundation work, structural and nonstructural building components, electrical, plumbing, mechanical and interior finish material.

The charges to Plan Check Fees outlines in the city's adopted unified fee schedule shall be based on this table unless project valuation submitted by the applicant is higher than the calculated valuation using this table, in which case the City will use the submitted valuation. Construction Type VB shown in this table represents approximately 95% of all building projects in our area; however, the Building Official will refer to the complete ICC 2021 table *for other valuation types* if the project is not Construction Type VB.
